Yo La Tengo has lit up the indie scene for three decades, part of an underground revolution that defied corporate music conglomerates, eschewed pop radio, and found a third way. Going behind the scenes of one of the most remarkable eras in American music history, Big Day Coming traces the patient rise of husband-and-wife team Ira Kaplan and Georgia Hubley, who—over three decades—helped forge a spandex-and-hairspray-free path to the global stage, selling millions of records along the way and influencing countless bands. Using the continuously vital Yo La Tengo as a springboard, Big Day Coming uncovers the history of the legendary clubs, bands, zines, labels, record stores, college radio stations, fans, and pivotal figures that built the infrastructure of the now-prevalent indie rock world. Journalist and freeform radio DJ Jesse Jarnow draws on all-access interviews and archives for mesmerizing trip through contemporary music history told through one of its most creative and singular acts.

*I Must Say* Martin Short, 2014-11-04 In this engagingly witty, wise, and heartfelt memoir, Martin Short tells the tale of how a showbiz-obsessed kid from Canada transformed himself into one of Hollywood's favorite funnymen, known to his famous peers as the comedian's comedian. Short takes the reader on a rich, hilarious, and occasionally heartbreaking ride through his life and times, from his early years in Toronto as a member of the fabled improvisational troupe Second City to the all-American comic big time of Saturday Night Live, and from memorable roles in such movies as *Three Amigos!* and *Father of the Bride* to Broadway stardom in *Fame Becomes Me* and the Tony-winning *Little Me*. He reveals how he created his most indelible comedic characters, among them the manic man-child Ed Grimley, the slimy corporate lawyer Nathan Thurman, and the bizarrely insensitive interviewer Jiminy Glick. Throughout, Short freely shares the spotlight with friends, colleagues, and collaborators, among them Steve Martin, Tom Hanks, Gilda Radner, Mel Brooks, Nora Ephron, Eugene Levy, Catherine O'Hara, Paul Shaffer, and David Letterman. But there is another side to Short's life that he has long kept private. He lost his eldest brother and both parents by the time he turned twenty, and, more recently, he lost his wife of thirty years to cancer. In *I Must Say*, Short talks for the first time about the pain that these losses inflicted and the upbeat life philosophy that has kept him resilient and carried him through. In the grand tradition of comedy legends, Martin Short offers a show-business memoir densely populated with boldface names and rife with retellable tales: a hugely entertaining yet surprisingly moving self-portrait that will keep you laughing—and crying—from the first page to the last.

The Hokey Pokey Larry La Prise, 1999 A lively group of children from various ethnic backgrounds dances to the lyrics and music of this popular novelty tune.

All the logos are grouped into categories such as crosses, stars, crowns, animals, and people, and are shown in black and white to emphasize the visual form of the logos. This offers designers a ready resource to draw upon in the research phase of identity projects. Logos are also indexed alphabetically by name of designer, and by industrial sector for ease of use.

**Atlas of Novel Tectonics** Jesse Reiser, Nanako Umemoto, 2006-03-09 Architects Jesse Reiser and Nanako Umemoto have been generating some of the most provocative thinking in the field for nearly twenty years. With *Atlas of Novel Tectonics*, Reiser+Umemoto hone in on the many facets of architecture and illuminate their theories with great thought and simplicity. The Atlas is organized as an accumulation of short chapters that address the workings of matter and force, material science, the lessons of art and architectural history, and the influence of architecture on culture (and vice versa). Reiser+Umemoto see architectural design as a series of problem situations, and each chapter is an argument devoted to a specific condition or case. Influenced by a wide range of fields and phenomena Brillat-Savarin's classic *The Physiology of Taste* is one of their primary models the authors provide a cross-section of thinking and inspiration. The result is both an elucidation of the concepts that guide Reiser+Umemoto through their own design process and a series of meditations on topics that have formed their own sense as architects. *Atlas of Novel Tectonics* offers an entirely fresh perspective on subjects that are generally taken for granted, and does so with a welcome punch and energy.

**When Women Invented Television** Jennifer Keishin Armstrong, 2021-03-23 New and Noteworthy —New York Times Book Review Must-Read Book of March —Entertainment Weekly Best Books of March —HelloGiggles “Leaps at the throat of television history and takes down the patriarchy with its fervent, inspired prose. When *When Women Invented Television* offers proof that what we watch is a reflection of who we are as a people.” —Nathalia Holt, New York Times bestselling author of *Rise of the Rocket Girls* New York Times bestselling author of *Seinfeldia* Jennifer Keishin Armstrong tells the little-known story of four trailblazing women in the early days of television who laid the foundation of the industry we know today. It was the Golden Age of Radio and powerful men were making millions in advertising dollars reaching thousands of listeners every day. When television arrived, few radio moguls were interested in the upstart industry and its tiny production budgets, and expensive television sets were out of reach for most families. But four women—each an independent visionary—saw an opportunity and carved their own paths, and in so doing invented the way we watch TV today. Irna Phillips turned real-life tragedy into daytime serials featuring female dominated casts. Gertrude Berg turned her radio show into a Jewish family comedy

that spawned a play, a musical, an advice column, a line of house dresses, and other products. Hazel Scott, already a renowned musician, was the first African American to host a national evening variety program. Betty White became a daytime talk show fan favorite and one of the first women to produce, write, and star in her own show. Together, their stories chronicle a forgotten chapter in the history of television and popular culture. But as the medium became more popular—and lucrative—in the wake of World War II, the House Un-American Activities Committee arose to threaten entertainers, blacklisting many as communist sympathizers. As politics, sexism, racism, anti-Semitism, and money collided, the women who invented television found themselves fighting from the margins, as men took control. But these women were true survivors who never gave up—and thus their legacies remain with us in our television-dominated era. It's time we reclaimed their forgotten histories and the work they did to pioneer the medium that now rules our lives. This amazing and heartbreaking history, illustrated with photos, tells it all for the first time.

*Overstated* Colin Quinn,2020-09-22 In Colin Quinn's new book, the popular comedian, social commentator, and star of the shows Red State Blue State and Unconstitutional tackles the condition of our union today. Utah: The Church of States Vermont: The Old Hippie State Florida: The Hot Mess State Arizona: The Instagram Model State Wisconsin: The Diet Starts Tomorrow State The United States is in a fifty-states-wide couples’ counseling session, thinking about filing for divorce. But is that really what we want? Can a nation composed of states that are so different possibly hang together? Colin Quinn, comedian, social commentator, and writer and star of Red State Blue State and Unconstitutional, calls us out state-by-state, from Connecticut to Hawaii. He identifies the hypocrisies inherent in what we claim to believe and what we actually do. Within a framework of big-picture thinking about systems of government—after all, how would you put this country together if you started from scratch today?—to dead-on observations about the quirks and vibes of the citizens in each region, *Overstated* skewers us all: red, blue, and purple. It’s ultimately infused with the same blend of optimism and practicality that sparked the U.S. into being.

The Future of the Internet Jonathan Zittrain,2009-05-28 In *The Future of the Internet: And How to Stop It* Jonathan Zittrain explores the dangers the internet faces if it fails to balance ever more tightly controlled technologies with the flow of innovation that has generated so much progress in the field of technology. Zittrain argues that today's technological market is dominated by two contrasting business models: the generative and the non-generative. The generative models - the PCs, Windows and Macs of this world - allow third parties to build upon and share through them. The non-generative model is more restricted; appliances such as the xbox, iPod and tomtom might work well, but the only entity that can change the way they operate is the vendor. If we want the internet to survive we need to change. People must wake up to the risk or we could lose everything.

**Promises to Keep** William W. Fisher, III,2004 During the past fifteen years, changes in technology have generated an extraordinary array of new ways in which music and movies can be produced and distributed. Both the creators and the consumers of entertainment products stand to benefit enormously from the new systems. Sadly, we have failed thus far to avail ourselves of these opportunities. Instead, much energy has been devoted to interpreting or changing legal rules in hopes of defending older business models against the threats posed by the new technologies. These efforts to plug the multiplying holes in the legal dikes are failing and the entertainment industry has fallen into crisis. This provocative book chronicles how we got into this mess and presents three alternative proposals--each involving a combination of legal reforms and new business models--for how we could get out of it.

Fan Fiction and Fan Communities in the Age of the Internet Kristina Busse,2014-09-17 Fans have been responding to literary works since the days of Homer's *Odyssey* and Euripedes' *Medea*. More recently, a number of science fiction, fantasy, media, and game works have found devoted fan followings. The advent of the Internet has brought these groups from relatively limited, face-to-face enterprises to easily accessible global communities, within which fan texts proliferate and are widely read and even more widely commented upon. New interactions between readers and writers of fan texts are possible in these new virtual communities. From *Star Trek* to *Harry Potter*, the essays in this volume explore the world of fan fiction--its purposes, how it is created, how the fan experiences it. Grouped by subject matter, essays cover topics such as genre intersection, sexual relationships between characters, character construction through narrative, and the role of the beta reader in online communities. The work also discusses the terminology used by creators of fan artifacts and comments on the effects of technological advancements on fan communities. Instructors considering this book for use in a course may request an examination copy here.
