Internet for Nursing Research Joyce J. Fitzpatrick,Kristen S. Montgomery,2004-09-20 This book is a resource for using the internet as a tool in all aspects of nursing research--conducting it, teaching it, and using it. From searching online databases to creating surveys and recruiting research subjects online, the internet opens new possibilities in the research process, as well as new problems. Experienced researchers describe internet-based research methods, information on online methods for teaching research, and accessing the research of others. The appendixes include samples of existing research projects that use internet-based methodologies, as well as a listing of online resources for researchers.

Kissing Architecture Sylvia Lavin,2011-05-09 Architecture's growing intimacy with new types of art Kissing Architecture explores the mutual attraction between architecture and other forms of contemporary art. In this fresh, insightful, and beautifully illustrated book, renowned architectural critic and scholar Sylvia Lavin develops the concept of kissing to describe the growing intimacy between architecture and new types of art—particularly multimedia installations that take place in and on the surfaces of buildings—and to capture the sensual charge that is being designed and built into architectural surfaces and interior spaces today. Initiating readers into the guilty pleasures of architecture that abandons the narrow focus on function, Lavin looks at recent work by Pipilotti Rist, Doug Aitken, the firm Diller Scofidio + Renfro, and others who choose instead to embrace the viewer in powerful affects and visual and sensory atmospheres. Kissing Architecture is the first book in a cutting-edge new series of short, focused arguments written by leading critics, historians, theorists, and practitioners from the world of urban development and contemporary architecture and design. These books are intended to spark vigorous debate. They stake out the positions that will help shape the architecture and urbanism of tomorrow. Addressing one of the most spectacular and significant developments in the current cultural scene, Kissing Architecture is an entertainingly irreverent and disarmingly incisive book that offers an entirely new way of seeing--and experiencing--architecture in the age after representation.

I Like Him, He Likes Her Phyllis Reynolds Naylor,2010-05-18 Find a Penny pick it up and all day long you'll have good luck...except, of course, if that Penny is charming and pretty and funny, and the person picking her up just happens to be your boyfriend. Alice McKinley's freshman year is not as "lucky" as she was hoping it would be. But she's is trying to look on the bright side. There are worse things than being single for a semester... for a school year...for the whole summer.... At least Alice can count on her best friends for support—in theory, anyway. Lately they haven't been all that there-for-her. In fact, it seems like Pam and Liz are suddenly involved in intense, secret conversations whenever Alice is around. Single is starting to feel a whole lot like solo.

Immunobiology of Organ Transplantation David S. Wilkes, William J. Burlingham, 2012-12-06 Currently, individuals interested in seeking an in-depth discussion of transplantation immunology must seek individual articles published in several journals, or extrapolate information from various non-transplant immunology textbooks. The purpose of this text is to provide the reader with a single source of information for the basic science of immunobiology of organ transplantation. It is unique that it focuses on immunobiology from the basic research side, with an emphasis on the cellular and molecular levels. The readers will be physicians, scientists, and graduate students interested and engaged in the study of immunology as it relates to allo- and xenotransplantation. This book is designed to be the reference standard for the immunobiology of transplantation.

Inelastic Analysis of Solids and Structures M. Kojic, Klaus-Jurgen Bathe, 2005-07-28 *Inelastic Analysis of Solids and Structures* presents in a unified manner the physical and theoretical background of inelastic material models and computational methods, and illustrates the behavior of the models in typical engineering conditions. The book describes experimental observations and principles of mechanics, and efficient computational algorithms for stress calculations as typically performed in finite element analysis. The theoretical background is given to an extent necessary to describe the commonly employed material models in metal isotropic and orthotropic plasticity, thermoplasticity and viscoplasticity, and the plasticity of geological materials. The computational algorithms are developed in a unified manner with some detailed derivations of the algorithmic relations. Many solved examples are presented, which are designed to give insight into the material behavior in various engineering conditions, and to demonstrate the application of the computational algorithms.

Investigative Journalism in China David Bandurski,Martin Hala,2010-06-01 Despite persistent pressure from state censors and other tools of political control, investigative journalism has flourished in China over the last decade. This volume offers a comprehensive, first-hand look at investigative journalism in China, including insider accounts from reporters behind some of China's top stories in recent years. While many outsiders hold on to the stereotype of Chinese journalists as docile, subservient Party hacks, a number of brave Chinese reporters have exposed corruption and official misconduct with striking ingenuity and often at considerable personal sacrifice. Subjects have included officials pilfering state funds, directors of public charities pocketing private donations, businesses fleecing unsuspecting consumers - even the misdeeds of journalists themselves. These case studies address critical issues of commercialization of the media, the development of ethical journalism practices, the rising specter of news blackmail, negotiating China's mystifying bureaucracy, the dangers of libel suits, and how political pressures impact different stories. During fellowships at the Journalism & Media Studies Centre of the University of Hong Kong, these narratives and other background materials were fact-checked and edited by JMSC staff to address critical issues related to the media transitions currently under way in the PRC. This engaging narrative gives readers a vivid sense of how journalism is practiced in China. --David Bandurski is a scholar at the University of Hong Kong's China Media Project, a research and fellowship initiative of the Journalism & Media Studies Centre. Martin Hala has taught journalism at the Universities in Prague and Bratislava. -
