Edible Insects Arnold van Huis, Food and Agriculture Organization of the United Nations, 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body of research on issues such as insect nutrition and food safety, the use of insects as animal feed, and the processing and preservation of insects and their products. It highlights the need to develop a regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of stakeholders. This publication will boost

awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

River Basin Development and Human Rights in Eastern Africa – A Policy Crossroads Claudia J. Carr, 2017-01-05 This book is open access under a CC BY-NC 2.5 license. This book offers a devastating look at deeply flawed development processes driven by international finance, African governments and the global consulting industry. It examines major river basin development underway in the semi-arid borderlands of Ethiopia, Kenya and South Sudan and its disastrous human rights consequences for a half-million indigenous people. The volume traces the historical origins of Gibe III megadam construction along the Omo River in Ethiopia—in turn, enabling irrigation for commercial-scale agricultural development and causing radical reduction of downstream Omo and (Kenya's) Lake Turkana waters. Presenting case studies of indigenous Dasanech and northernmost Turkana livelihood systems and Gibe III linked impacts on them, the author predicts agropastoral and fishing economic collapse, region-wide hunger with exposure to disease epidemics, irreversible natural resource destruction and cross-border interethnic armed conflict spilling into South Sudan. The book identifies fundamental failings of government and development bank impact assessments, including their distortion or omission of mandated transboundary assessment, cumulative effects of the Gibe III dam and its linked Ethiopia-Kenya energy transmission

'highway' project, key hydrologic and human ecological characteristics, major earthquake threat in the dam region and widespread expropriation and political repression. Violations of internationally recognized human rights, especially by the Ethiopian government but also the Kenyan government, are extensive and on the increase—with collaboration by the development banks, in breach of their own internal operational procedures. A policy crossroads has now emerged. The author presents the alternative to the present looming catastrophe—consideration of development suspension in order to undertake genuinely independent transboundary assessment and a plan for continued development action within a human rights framework—forging a sustainable future for the indigenous peoples now directly threatened and for their respective eastern Africa states. Claudia Carr's book is a treasure of detailed information gathered over many years concerning river basin development of the Omo River in Ethiopia and its impact on the peoples of the lower Omo Basin and the Lake Turkana region in Kenya. It contains numerous maps, charts, and photographs not previously available to the public. The book is highly critical of the environmental and human rights implications of the Omo River hydropower projects on both the local ethnic communities in Ethiopia and on the downstream Turkana in Kenya. China's Evolving Surface Fleet Peter Dutton,Ryan D. Martinson,2017 Over the past fifteen years, the People's Liberation Army Navy's (PLAN's) missile fast-attack craft and amphibious fleets have been significantly modernized. While these two types of vessels have not increased in numbers, their capabilities have increased exponentially. This publication examines the People's Liberation Army's (PLA's) doctrine and training strategy in order to analyze present and predict future missions by these military vessels. China's deterrence posture is improved greatly by these ships and boats, which aid coastal water defense, and threaten Taiwanese attempts to gain independence. In addition, these two fleets improve China's long-range sealift capabilities, and help with the PLA's traditional, and new, nontraditional security practices. These fleets allow the PLAN to continue offshore operations, and begin blue-water, or far-seas operations, helping the United States to predict the future nature of Chinese maritime missions. The Making of the English Working Class E. P. Thompson, 2016-03-15 A history of the common people and the Industrial Revolution: "A true masterpiece" and one of the Modern Library's 100 Best Nonfiction Books of the twentieth century (Tribune). During the formative years of the Industrial Revolution, English workers and artisans claimed a place in society that would shape the following centuries. But the capitalist elite did not form the working class—the workers shaped their own creations, developing a shared identity in the process. Despite their lack of power and the indignity forced upon them by the upper classes, the working class emerged as England's greatest cultural and political force. Crucial to contemporary trends in all aspects of society, at the turn of the nineteenth century, these workers united into the class that we recognize all across the Western world today. E. P. Thompson's magnum opus, *The Making of the English Working Class* defined early twentieth-century English social and economic history, leading many to consider him Britain's greatest postwar historian. Its publication in 1963 was highly controversial in academia, but the work has become a seminal text on the history of the working class. It remains incredibly relevant to the social and economic issues of current times, with the Guardian saying upon the book's fiftieth anniversary that it "continues to delight and inspire new

readers.”

The Austronesians Peter Bellwood, James J. Fox, Darrell Tryon, 2006-09-01 The Austronesian-speaking population of the world are estimated to number more than 270 million people, living in a broad swathe around half the globe, from Madagascar to Easter Island and from Taiwan to New Zealand. The seventeen papers in this volume provide a general survey of these diverse populations focusing on their common origins and historical transformations. The papers examine current ideas on the linguistics, prehistory, anthropology and recorded history of the Austronesians.

Form, Fit, Fashion Jay Calderin, 2009-12-01 An indispensable primer for students and first-stop reference for professionals, Form, Fit, and Fashion guides the fashion designer through the entire design process, from conceiving a garment to marketing it. This handbook collects the information and ideas essential to planning and executing fashion projects of every scale and distills them in an easy-to-use format that is compact enough to slip into a tote. Linking six central phases in the cycle of fashion—research, editing, design, construction, connection, and evolution—Form, Fit, and Fashion will help designers to develop effective strategies for building a cohesive collection and communicating their vision.

Bringing PPPs into the Sunlight Marcos Siqueira, Gerardo Reyes-Tagle, Carlos León Gómez, Yery Park, Kyeong Eun Heo, Julian Marquez, 2018-08-03 This publication covers PPPs with a focus on the implications for public finances

in developing economies. Chapter 1 seeks to answer the question of whether PPPs are the “genie in the bottle” for governments seeking to plug the infrastructure gap: do they solve more problems than they create? This discussion lays the groundwork for further analysis. Chapter 2 explores the underlying reasons for the expansion of PPPs, the definitions and scope of PPPs in different contexts, and the historical trajectory of PPPs throughout the world, highlighting the common factors that have led to their current popularity. Chapter 3 details the multitude of institutional frameworks built to accommodate PPPs. It highlights the frameworks for national and subnational entities commissioning PPPs and deals with the involvement of state-owned enterprises. It also introduces fiscal frameworks for PPPs. Chapter 4 considers the fiscal and budgetary implications of PPPs from various perspectives. Chapter 5 covers the multiple forms of government financial support extended to PPPs and the practical implications of various countries’ experiences with direct, indirect, explicit, and implicit forms of project support. Finally, Chapter 6 discusses unsolicited PPP proposals coming directly from private-sector firms that hope to service them. The publication concludes with a brief summation of the outlook for PPPs as well as concise policy recommendations.

Textiles and Clothing Mohd Shabbir, 2019-07-12 This timely and important book aims to help achieve a more sustainable textile industry; researchers

from both textile and environmental domains will benefit from reading it. Since it is imperative to rehabilitate our damaged environmental ecosystems, there is a pressing demand for more sustainable green processes in the textile and clothing industry. As a consequence, greater emphasis needs to be placed on research into eco-friendly processes particularly suited for this industry. With this goal in mind, all environmental aspects relating to the textile and clothing industry are discussed in this book in four broad areas: Highlights the negative impact on the environment by textile industries; Discusses textiles finishing by natural or eco-friendly means; Promotes natural dyes as environment-friendly alternatives to synthetics; Reviews textile effluents remediation via chemical, physical and bioremediation. Included in the 11 informative chapters are topics covering the correlation between the environment and the processing and utilization of textiles and clothing. The book opens with a discussion on the direct impact that the textile industry has on the environment. The hazardous environmental consequences that synthetic dyes used to color textiles have on the environment are highlighted in the next chapter. Greener alternatives to dyeing are discussed in detail in the next chapters followed by a discussion of eco-friendly ways of finishing textiles. The book concludes with a section of chapters providing solutions to address the environmental hazards associated with the textile industry.

Lyophilized Biologics and Vaccines Dushyant Varshney, Manmohan

Singh, 2015-05-19 This book provides a detailed account of the most recent developments, challenges and solutions to seamlessly advance and launch a lyophilized biologics or vaccine product, based on diverse modalities, ranging from antibodies (e.g., monoclonal, fused), complex biologics (e.g., antibody drug conjugate, PEGylated proteins), and vaccines (e.g., recombinant-protein based). The authors adeptly guide the reader through all crucial aspects, from biophysical and chemical stability considerations of proteins, analytical methods, advances in controlled ice nucleation and quality-by-design approaches, alternate drying technology, to latest regulatory, packaging and technology transfer considerations to develop a stable, safe and effective therapeutic protein, vaccine and biotechnology products. *Lyophilized Biologics and Vaccines: Modality-Based Approaches* is composed of four sections with a total of 17 chapters. It serves as a reference to all critical assessments and steps from early pre-formulation stages to product launch: Provides recent understanding of heterogeneity of protein environment and selection of appropriate buffer for stabilization of lyophilized formulations Details the latest developments in instrumental analysis and controlled ice nucleation technology Explains in-depth lyophilized (or dehydrated) formulation strategies considering diverse modalities of biologics and vaccines, including plasmid DNA and lipid-based therapeutics Details an exhaustive update on quality-by-design and process analytical technology approaches, illustrated superbly by case studies and

FDA perspective Provides the latest detailed account of alternate drying technologies including spray drying, bulk freeze-drying and crystallization, supported exceptionally by case studies Provides a step-by-step guide through critical considerations during process scale-up, technology transfer, packaging and drug delivery device selection, for a successful lyophilization process validation, regulatory submission and product launch Chapters are written by one or more world-renowned leading authorities from academia, industry or regulatory agencies, whose expertise cover lyophilization of the diverse modalities of biopharmaceuticals. Their contributions are based on the exhaustive review of literature coupled with excellent hands-on experiences in laboratory or GMP setup, making this an exceptional guide to all stages of lyophilized or dehydrated product development.

Chinese and Japanese Music-Dramas J. I. Crump, William P. Malm, 2020-08-06
Chinese and Japanese Music-Dramas is the result of a conference on the relations between Chinese and Japanese music-drama held at the University of Michigan, Ann Arbor, on October 1–4, 1971. In addition to the Association for Asian Studies, four U-M departments participated in the conference: the Center for Japanese Studies, the Center for Chinese Studies, the School of Music, and the Speech Department. One important inspiration for the creation of such an interdisciplinary conference was the fact that each participant had found, after years of individual research on music-drama in East Asia, consistent frustration caused by attempts to deal on their own with multiple

cultural and technical problems. Another motivating force was an awareness among many members of the four disciplines involved that the topic is in fact one of the largest untouched fields of scholarly endeavor in both Asian and theatrical studies. The collection opens with J. I. Crump's exploration of the Ming commentators who began to subject Yüan musical drama to the same critiques as other literature from the past. In the second chapter, Rulan Chao Pian looks to the structure of arias in Peking Opera for clues about what distinguishes this art form. William P. Malm turns to three key sources for the performance conventions of Japanese Noh drama to glean any Sino-Japanese music relationships that exist in technical terms and practices. In the fourth essay, Carl Sesar analyzes a Noh play that stages the tension between Chinese influence and Japanese originality. Roy E Teele concludes the volume with a formal study of Noh play structure to assess lineages of influence from Chinese dramatic forms. After each contribution, the editors print a transcript of the conference participants' discussion of that paper, providing the reader with a detailed and nuanced view of how the contributors understood and responded to each other's work.

Bioavailability of Contaminants in Soils and Sediments National Research Council, Division on Earth and Life Studies, Water Science and Technology Board, Committee on Bioavailability of Contaminants in Soils and Sediments, 2003-05-03 Bioavailability refers to the extent to which humans and ecological receptors are exposed to contaminants in soil or sediment. The

concept of bioavailability has recently piqued the interest of the hazardous waste industry as an important consideration in deciding how much waste to clean up. The rationale is that if contaminants in soil and sediment are not bioavailable, then more contaminant mass can be left in place without creating additional risk. A new NRC report notes that the potential for the consideration of bioavailability to influence decision-making is greatest where certain chemical, environmental, and regulatory factors align. The current use of bioavailability in risk assessment and hazardous waste cleanup regulations is demystified, and acceptable tools and models for bioavailability assessment are discussed and ranked according to seven criteria. Finally, the intimate link between bioavailability and bioremediation is explored. The report concludes with suggestions for moving bioavailability forward in the regulatory arena for both soil and sediment cleanup.

Owning the Olympics Monroe Price, Daniel Dayan, 2009-12-10 A major contribution to the study of global events in times of global media. *Owning the Olympics* tests the possibilities and limits of the concept of 'media events' by analyzing the mega-event of the information age: the Beijing Olympics. . . . A good read from cover to cover. —Guobin Yang, Associate Professor, Asian/Middle Eastern Cultures & Sociology, Barnard College, Columbia University From the moment they were announced, the Beijing Games were a major media event and the focus of intense scrutiny and speculation.

In contrast to earlier such events, however, the Beijing Games are also unfolding in a newly volatile global media environment that is no longer monopolized by broadcast media. The dramatic expansion of media outlets and the growth of mobile communications technology have changed the nature of media events, making it significantly more difficult to regulate them or control their meaning. This volatility is reflected in the multiple, well-publicized controversies characterizing the run-up to Beijing 2008. According to many Western commentators, the People's Republic of China seized the Olympics as an opportunity to reinvent itself as the New China---a global leader in economics, technology, and environmental issues, with an improving human-rights record. But China's maneuverings have also been hotly contested by diverse global voices, including prominent human-rights advocates, all seeking to displace the official story of the Games. Bringing together a distinguished group of scholars from Chinese studies, human rights, media studies, law, and other fields, *Owning the Olympics* reveals how multiple entities---including the Chinese Communist Party itself---seek to influence and control the narratives through which the Beijing Games will be understood. *digitalculturebooks* is an imprint of the University of Michigan Press and the Scholarly Publishing Office of the University of Michigan Library dedicated to publishing innovative and accessible work exploring new media and their impact on society, culture, and scholarly communication. Regenerative Strategies for Maxillary and Mandibular Reconstruction James C. Melville, Jonathan W. Shum, Simon Young, Mark E. Wong, 2019-03-25 This book is designed as a comprehensive and up-to-date instructional guide to the strategies employed for regeneration of the maxillomandibular region, with emphasis on allogeneic and tissue engineering principles. Readers will find information on indications and contraindications for procedures, pertinent anatomy, surgical techniques, postoperative management, and management of complications. Current surgical techniques utilizing biotechnology for

regeneration and reconstruction are described in depth, with explanation of their benefits in minimizing patient morbidity. In addition, state of the art free vascular transfer for maxillary and mandibular reconstruction is extensively discussed, with a particular focus on indications and step-by-step technique. The authors are well-known experts in their field who are keen to share their extensive experience and preferred approaches. The book is intended for all oral and maxillofacial surgeons, head and neck surgeons, and plastic and reconstruction surgeons who wish to increase their knowledge on the latest modalities of maxillary and mandibular reconstruction.

Universities and Regional Engagement Tatiana Iakovleva, Elisa Thomas, Laila Nordstrand Berg, Rómulo Pinheiro, Paul Benneworth, 2022-02-28 The study of universities' role in regional engagement has traditionally been focusing on exceptional cases. This book presents a reconceptualization which embraces its underlying complexity and proposes a roadmap for a renewed research agenda. Starting from the grassroots level of universities' everyday engagements, the book delves into the manifold ways in which university knowledge agents build connections with regional partners. Through 11 empirical chapters, the authors not only chart the diversity among case institutions, engagement mechanisms, and regional contexts but also use that diversity to advance a novel conceptual framework, centered on the process of mundaneness, for unpacking university-regions' everyday activities, taking into account the dynamic, complex, and co-evolving interplay between (a) key

social agents and institutions, (b) the contexts in which they are embedded, as well as (c) the historical trajectories and strategic ambitions underpinning context-specific social arrangements and interactions that are mediated by temporal and spatial dimensions. Drawing on evolutionary economic geography, innovation studies, management and organization studies, and historical perspectives, the volume advances a new mode of understanding university-regional engagement as a form of extendable temporary coupling, which also helps to address perennial policy and managerial questions alike of what to do with universities that do not serve local labour market needs and/or are located in regions suffering from brain drain. The book illustrates such dynamics from diverse national contexts and three continents: Brazil, Caribbean, China, Italy, Norway, and Poland. This book will be valuable reading for advanced students, researchers, and policymakers working in economic geography, regional development, innovation, and higher education management. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.
