Derek Howse

Appellate Practice Handbook Edward J. Horowitz, 1982

Eaglewall's Table Top Navy Donald D. Hood, 2011-04-01 The first in depth study of the Eagle 1:1200 scale plastic model warships produced by Eaglewall Plastics, LTD, Eaglewall's Table Top Navy explores the birth, growth, and death of the legendary model company. The book covers the history of the company, the tie-in with the Eagle magazine, related producers such as the American company Pyro, and probes the mysterious fate of the Eagle molds. The detailed lists of models produced and variations are essential to any Eaglewall collector. This hard cover book is illustrated with over 100 full color images with example of Eagle artwork, advertisements, completed kits, and kit parts.

Radar at Sea Derek Howse, 1993-02-09 This book tells in non-technical language how the British Navy contributed to the development of naval radar in World War 2. Addressed to the general reader, it tells not only the technical story in simple terms, but also of the operational use of shipborne radar at sea - for warning, for fire control, for fighter direction, for navigation, in all theatres of war - and particularly about the people who designed and fitted the equipment, and those who used it at sea.

Zen in English Literature and Oriental Classics R. H. Blyth, 2016-06-12 It was R.H Blyth's belief that all that is good in European literature and culture is simply and solely that which is in accordance with the Spirit of

Zen. He thereafter applied himself to the task of searching the writings of East and West in an attempt to discover that Spirit. Zen in English Literature and Oriental Classics embraces the classical literature of China and Japan and the whole extent of English literature, with numerous quotations not only from English but also from French, German, Italian, and Spanish writing. Don Quixote has a chapter all to himself, and the author considers him possibly the purest example in all of world literature of a man who lives by Zen. In English, the Zen attitude toward life is found most consistently in Shakespeare, Wordsworth, Dickens, and Stevenson. This book is essential reading for anyone interested in Zen, haiku, or indeed English literature. R.H. Blyth was born in London in 1898 and studied English literature at London University. He traveled extensively in the East before moving first to Korea and then Japan and teaching English at several universities. Blyth eventually became the English tutor to the Crown Prince of Japan. He also studied Zen Buddhism under Kayama Taigi Roshi. Blyth was interned during the war years, and it was during this time that he wrote his first book, Zen in English Literature. He went on to write numerous other books on Zen, haiku, senryu, and humor. Blyth was a man whose sensibility took root in two disparate cultures and found a harmony that he beautifully and effectively communicated in his writing.

Carrier Warfare in the Pacific E. T. Wooldridge, 1993 Capturing the times when lives and victory were in peril, this book records the exploits of the

men who fought in WWII in the air and on the sea, including pilots and air crewmen of carrier squadrons, officers and men of the ship's company, and admirals and their staffs. Compelling personal accounts. Illus.

Miniature Ship Models Paul Jacobs,2008-05-30 This book is the first comprehensive history of how the 1:1200 scale and its 1:1250 continental equivalent became accepted as the modern standard for miniature ship models. The origins can be traced back to the first years of the twentieth century and their use as identification aids by the military during the First World War, but when peace came the manufacturers aimed their increasingly sophisticated products at collectors, and acquiring, modifying or scratch-building miniature ship models has been an avidly pursued hobby ever since. This book charts the commercial rise and fall of the manufacturers, and the advancing technology that produces ever more detailed and accurate replicas. The author - himself a lifetime collector and builder of models - looks at the products of each manufacturer, past and present, rating their quality and suggesting why some are regarded as more collectible than others. But the book deals with more than off-the-shelf models, covering subsidiary issues like painting, modifying and diorama settings, and is illustrated throughout with many of the finest examples of the genre. The combination of fascinating background information with stunning visual presentation will make this book

irresistible to any collector or enthusiast.

Bassett-Lowke Derek Head, 2006-07-25 The nostalgia for the great passenger ships of the first half of the 20th century is vividly recalled in this book on the world famous model-making firm of Bassett-Lowke, with their production of small scale waterline ship models manufactured between 1908

The United States Air Force Museum United States Air Force Department, 1958

Naval Camouflage 1914-1945 David L. Williams, 2001 Although it is a subject of immense importance to warship enthusiasts, modelmakers, photograph collectors, and indeed academic naval historians, there has never been an authoritative history of camouflage. Apart from the huge scale of the subject, the reason for this lies largely in the fragmented nature of the surviving evidence, and the ad hoc nature of much wartime development. This book does not claim to be such a narrative history, but it does set out to provide a comprehensive study. Visual and illustrative in its approach, it is Anglo-American in emphasis, but the camouflage patterns of enemy navies (and selected neutrals) are covered as well.

Miniature Merchant Ships John Bowen, 1997 This practical guide to waterline ship modelling in 1/1200 scale contains 30 sets of plans for the reader to construct their own models.

More Miniature Merchant Ships John Bowen, 2003 John Bowen brings his knowledge and expertise of waterline ship modelling to a second volume of miniature merchant ships, including examples such as Haverford (1901),

Carpathia (1903), Oronsay (1925) and Braemar Castle (1952). The book opens with a section giving advice on initial preparations - finding and using plans, suitable materials and tools. This section also presents an alphabetical list of the principal fittings on a ship (those that would be included on this type of model) - hatches, winches, capstans, anchors, etc - with details and diagrams on how to make them. Section II comprises 30 sets of plans of ships built between 1900 and 1969. These are accompanied with at least one photograph of the ship, a full specification, brief history, and notes on essential constructional details, including colour scheme. Readers will recognise the authoritative yet approachable style John has brought to several ship modelling titles, which will appeal to both beginners and more experienced modellers. A companion volume to the highly successful *Miniature Merchant Ships*, *More Miniature Merchant Ships* includes 30 1/1200 scale plans of liners, cargo ships and passenger cargo ships, each supplied with comprehensive modelling notes. More than 60 photographs of the prototype ships underway supply detailed pictorial references. This book, like *Miniature Merchant Ships*, is an essential addition to the library of any ship modeller. John Bowen is the author of several acclaimed titles for Conway Maritime Press, including *Miniature Merchant Ships*, published in 1997. Building waterline models has always been his favourite form of modelling and this book is a culmination of his continuing achievements in this area of ship modelling. John was deputy editor of Conway's quarterly journal *Model*

Shipwright when it was launched in 1972 and has been its editor since 1974. He contributes a plan and instructions for a miniature merchant ship to each issue. John is a member of the Royal Institution of Naval Architects.

Waterline Ship Models John Bowen, 1972-01

The Imperial Japanese Navy Frederick Thomas Jane, 1904

Warships in Miniature Michael Ainsworth, 2001-10 A comprehensive introduction and step-by-step guide to the art of ship modeling, this volume contains complete plans for the construction of forty of the most celebrated warships of the twentieth century. The author includes sections on project planning and research, construction techniques, detailed instructions on the building of turrets and pom-poms, the use of various modeling tools, helpful tips on the variety and application of paints, and methods of displaying completed models. The featured plans include the Dreadnought, North Carolina, Yamato, Gneisenau, Enterprise (US), Guiseppe Garibaldi, Emden, Shimakaze, Volta, Vittorio Veneto, Eritrea, Allen M. Sumner, Glorious, Vincennes, Black Prince, Renown (1939), and Hood. The warship plans are a full-size 1/1200 scale with photographs, building specifications, and the history of each vessel.
