C62 is a type of 4-6-4 steam locomotive built by the Japanese National Railways. The C classification indicates three sets of driving wheels. The C62 was built with a 4-6-4 frame, upon which was mounted the boiler of the JNR D52 class 2-8-2 locomotives. These were the largest and fastest steam passenger locomotives to run in Japan, and hauled the Tsubame express on the T kaid Main Line between Tokyo and Osaka. Forty nine were built from 1948 to 1949. The last examples in regular service were withdrawn in 1973.

Vehicle-Track Coupled Dynamics Wanming

Zhai, 2019-08-31 This book systematically presents the theory, numerical implementation, field experiments and practical engineering applications of the 'Vehicle-Track Coupled Dynamics'. Representing a radical departure from classic vehicle system dynamics and track dynamics, the vehicle-track coupled dynamics theory considers the vehicle and track as one interactive and integrated system coupled through wheel-rail interaction. This new theory enables a more comprehensive and accurate solution to the train-track dynamic interaction problem which is a fundamental and important research topic in railway transportation system, especially for the rapidly developed high-speed and heavy-haul railways. It has been widely applied in practical railway engineering. Dr. Wanming Zhai is a Chair Professor of Railway Engineering at Southwest Jiaotong University, where he is also chairman of the Academic Committee and Director of the Train and Track Research Institute. He is a member of the Chinese Academy of Sciences and one of the leading scientists in railway system dynamics. Professor Zhai is Editor-in-Chief of both the International Journal of Rail Transportation, published by Taylor & Francis Group, and the Journal of Modern Transportation, published by Springer. In addition, he is a trustee of the International Association for Vehicle System Dynamics, Vice President of the Chinese Society of Theoretical and Applied

Mechanics, and Vice President of the Chinese Society for Vibration Engineering. /div

Foreign Policy Analysis Jean-Frédéric Morin,Jonathan Paquin,2018-01-03 This book presents the evolution of the field of foreign policy analysis and explains the theories that have structured research in this area over the last 50 years. It provides the essentials of emerging theoretical trends, data and methodological pitfalls and major case-studies and is designed to be a key entry point for graduate students, upper-level undergraduates and scholars into the discipline. The volume features an eclectic panorama of different conceptual, theoretical and methodological approaches to foreign political analysis, focusing on different models of analysis such as two-level game analysis, bureaucratic politics, strategic culture, cybernetics, poliheuristic analysis, cognitive mapping, gender studies, groupthink and the systemic sources of foreign policy. The authors also clarify conceptual notions such as doctrines, ideologies and national interest, through the lenses of foreign policy analysis.

Dressing Modern Frenchwomen Mary Lynn Stewart,2020-03-03 At a glance, high fashion and feminism seem unlikely partners. Between the First and Second World Wars, however, these forces combined femininity and modernity to create the new, modern French woman. In this engaging study, Mary Lynn Stewart reveals the fashion industry as an integral part of women's transition into modernity. Analyzing what female columnists in fashion magazines and popular women novelists wrote about the new silhouette, Stewart shows how bourgeois women feminized the more severe, masculine images that elite designers promoted to create a hybrid form of modern that both emancipated women and celebrated their femininity. She delves into the intricacies of marketing the new clothes and the new image to middle-class women and examines the nuts and bolts of a changing industry—including textile production, relationships between suppliers and department stores, and privacy and

intellectual property issues surrounding ready-to-wear couture designs. *Dressing Modern Frenchwomen* draws from thousands of magazine covers, advertisements, fashion columns, and features to uncover and untangle the fascinating relationships among the fashion industry, the development of modern marketing techniques, and the evolution of the modern woman as active, mobile, and liberated.

Design and Development of Medical Electronic

Instrumentation David Prutchi, Michael Norris, 2005-01-28 *Design and Development of Medical Electronic Instrumentation* fills a gap in the existing medical electronic devices literature by providing background and examples of how medical instrumentation is actually designed and tested. The book includes practical examples and projects, including working schematics, ranging in difficulty from simple biopotential amplifiers to computer-controlled defibrillators. Covering every stage of the development process, the book provides complete coverage of the practical aspects of amplifying, processing, simulating and evoking biopotentials. In addition, two chapters address the issue of safety in the development of electronic medical devices, and providing valuable insider advice.

Injuries in Athletics: Causes and Consequences

Semyon M. Slobounov, 2008-06-17 Over the past decade, the scientific information on psychology of injury has increased considerably. Despite dramatic advances in physical education of coaches, field of medicine, athletic training, and physical therapy, the sport-related traumatic injuries is our major concern. Athletic injuries, both single and multiple, have a tendency to grow dramatically. Accordingly, prevention of sport-related injuries is a major challenge facing the sport medicine world today. The purpose of this book is to accumulate the latest development in psychological analyses, evaluation, and management of sport-related injuries, including traumatic brain injuries. No two traumatic injuries are alike in mechanism, symptoms, or symptoms resolution. There is

still no agreement upon psychological diagnosis and there is no known comprehensive treatment for sport-related injuries for regaining pre-injury status. Physical symptoms resolution is not an indication of psychological trauma resolution.

Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods

Methods R. Venkata Rao, 2012-08-27 Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods presents the concepts and details of applications of MADM methods. A range of methods are covered including Analytic Hierarchy Process (AHP), Technique for Order Preference by Similarity to Ideal Solution (TOPSIS), Višekriterijumsko KOMpromisno Rangiranje (VIKOR), Data Envelopment Analysis (DEA), Preference Ranking METHod for Enrichment Evaluations (PROMETHEE), ELimination Et Choix Traduisant la Réalité (ELECTRE), COMplex PROportional ASsessment (COPRAS), Grey Relational Analysis (GRA), UTILITY Additive (UTA), and Ordered Weighted Averaging (OWA). The existing MADM methods are improved upon and three novel multiple attribute decision making methods for solving the decision making problems of the manufacturing environment are proposed. The concept of integrated weights is introduced in the proposed subjective and objective integrated weights (SOIW) method and the weighted Euclidean distance based approach (WEDBA) to consider both the decision maker's subjective preferences as well as the distribution of the attributes data of the decision matrix. These methods, which use fuzzy logic to convert the qualitative attributes into the quantitative attributes, are supported by various real-world application examples. Also, computer codes for AHP, TOPSIS, DEA, PROMETHEE, ELECTRE, COPRAS, and SOIW methods are included. This comprehensive coverage makes Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods a key reference for the designers, manufacturing

engineers, practitioners, managers, institutes involved in both design and manufacturing related projects. It is also an ideal study resource for applied research workers, academicians, and students in mechanical and industrial engineering.

Homo- and Heterobimetallic Complexes in Catalysis

Philippe Kalck, 2016-06-14 The series Topics in Organometallic Chemistry presents critical overviews of research results in organometallic chemistry. As our understanding of organometallic structure, properties and mechanisms increases, new ways are opened for the design of organometallic compounds and reactions tailored to the needs of such diverse areas as organic synthesis, medical research, biology and materials science. Thus the scope of coverage includes a broad range of topics of pure and applied organometallic chemistry, where new breakthroughs are being achieved that are of significance to a larger scientific audience. The individual volumes of Topics in Organometallic Chemistry are thematic. Review articles are generally invited by the volume editors. All chapters from Topics in Organometallic Chemistry are published OnlineFirst with an individual DOI. The Entrepreneurial Personality Elizabeth Chell, David E. Wicklander, Shane G. Sturman, L. Wayne Hoover, 2008-05-09 Is there such a thing as an 'entrepreneurial personality'? What makes someone an entrepreneur is a question that has intrigued the lay person and the scholar for many years, but can such a personality be identified or is it simply a socially constructed phenomenon? Elizabeth Chell pursues an alternative line of argument: to show that the entrepreneurial personality is, on the one hand, socially constructed, but on the other hand, presents consistency in behaviours, skills and competencies. This second edition of the highly acclaimed *The Entrepreneurial Personality* revisits the topic and updates the evidence from a multi-disciplinary perspective. The book carefully weaves together the arguments and views from economists, sociologists and psychologists in order to develop a strong conceptual foundation. It discusses the inferences that these experts have made about the nature of entrepreneurs and the entrepreneurial process, and explores whether such evidence has enabled psychometricians to develop robust instruments for assessing the characteristics of entrepreneurs. The evidence for a range of purported traits is reviewed and the models and research designs of interested social scientists are explained and evaluated. Throughout, Chell laces her argument richly with a set of cases derived from primary and secondary sources. This book presents a timely set of views on the entrepreneurial personality, and will be of great interest to academics in the fields of entrepreneurship, economics, management, applied psychology and sociology. This accessible text will also appeal to the interested general reader, as well as practitioners and consultants dealing with entrepreneurs in the field.
