*Don "The Snake" Prudhomme: My Life Beyond the 1320* Elana Scherr,Don Prudhomme,2020-10-16 Don The Snake Prudhomme reveals for the first time ever his incredible life and career on and off of the drag strip.

Imagine spending a year with Don The Snake Prudhomme, having coffee together and talking about his life, his racing, his friends, and his family. He'd tell you about how he rose from being a high school drop-out who was painting cars to a respected Top Fuel dragster driver and successful businessman. You'd hear how he toured the country with Tommy Ivo and The Hawaiian Roland Leong, racing all the legends from Big Daddy Don Garlits to The Golden Greek [Chris] Karamesines. He'd say how he met Tom McEwen and recall how they became the Snake and the Mongoose, leading to a career in Funny Cars that netted him four championships in a row. He'd talk about the thrill of first wins and owning his own teams but also the struggles of bad seasons, crashes and fires, broken parts, and broken contracts. Along the way, he'd speak about the people in his life, such as engine-builder Keith Black and NHRA president Wally Parks, and those who were killed in the wild and unpredictable sport of nitro racing. It wouldn't be only racing, though. Prudhomme would share lessons he learned about business and life from such varied sources as a neighbor in Granada Hills to Ford GT40 driver Dan Gurney. He also would talk about the importance of family: how his wife, Lynn, and daughter, Donna, changed his world and how finding out about his African-American roots opened his eyes to a culture and inheritance he'd always wanted. This is the experience you'll get in Don The Snake Prudhomme: My Life Beyond the 1320.

From the impact of SOM's Cathedral of Christ the Light in Oakland to the spark that inspired Thomas Heatherwick's U.K. Pavilion in Shanghai; from the new processes fueling Zaha Hadid's extraordinary architecture to the digital tools Ford is using to transform car design, each of these stories explores questions that swirl around the idea of design. How does design change our lives for the better? How is our capacity to produce good design evolving? How will the next generation of designers work? What will they make? What new areas of human experience is design opening for us? Now that designers can do almost anything--what should they do? The Publisher has two cover versions for this title. **The Western Desert of Egypt** Cassandra Vivian,2008 Already the most comprehensive guide ever for desert and oasis travel in Egypt west of the Nile, The Western Desert of Egypt: An Explorer's Handbook has now been fully revised and updated for the latest generation of twenty-first century desert adventurers. Fully illustrated with some 50 maps and plans and over 270 drawings, the guide covers both the natural history and the human history of the desert and the oases. It then explores chapter by chapter the oases of Kharga, Dakhla, Farafra, Bahariya, Fayoum, and Siwa, and the desert areas of al-Diffa (the northern, semiarid edge of the desert), the Darb al-Arbain caravan route in the south, and Uwaynat (including Gilf Kebir) in the southwest. Descriptions of routes, sites, people, and places are complemented by practical information on places to stay, eat, and fill your gas tank. Global positioning system (GPS) waypoints are provided as an aid to navigation on many routes--though for the sake of conservation and the protection of unguarded antiquities they are not given for remote sites. Almost encyclopedic in its scope, this is the one guide that belongs on the bookshelf, dashboard, or rucksack of every Western Desert traveler.

**Why Evolution is True** Jerry A. Coyne,2010-01-14 For all the discussion in the media about creationism and 'Intelligent Design', virtually nothing has been said about the evidence in question – the evidence for evolution by natural selection. Yet, as this succinct and important book shows, that evidence is vast, varied, and magnificent, and drawn from many disparate fields of science. The very latest research is uncovering a stream of evidence revealing evolution in action – from the actual observation of a species splitting into two, to new fossil discoveries, to the deciphering of the evidence stored in our genome. Why Evolution is True weaves together the many threads of modern work in genetics, palaeontology, geology, molecular biology, anatomy, and development to demonstrate the 'indelible stamp' of the processes first proposed by Darwin. It is a crisp, lucid, and accessible statement that will leave no one with an open mind in any doubt about the truth of evolution.

**Biology of Spiders** Rainer Foelix,2011-05-05 One of the only books to treat the whole spider, from its behavior and physiology to its neurobiology and reproductive characteristics, Biology of Spiders is considered a classic in spider literature. First published in German in 1979, the book is now in its third edition, and has established itself as the supreme authority on these fascinating creatures. Containing five hundred new references, this book incorporates the latest research while dispelling many oft-heard myths and misconceptions that surround spiders. Of special interest are chapters on the structure and function of spider webs and silk, as well as those on spider venom. A new subchapter on tarantulas will appeal especially to tarantula keepers and breeders. The highly accessible text is supplemented by exceptional, high-quality photographs, many of them originals, and detailed diagrams. It will be of interest to arachnologists, entomologists, and zoologists, as well as to academics, students of biology, and the general reader curious about spiders.

**Refractions of Reality: Philosophy and the Moving Image** John Mullarkey,2008-12-11 This is the first book to explore all central issues surrounding the relationship between the film-image and philosophy. It tackles the work of particular philosophers of film (Žižek, Deleuze and Cavell) as well as general philosophical positions (Cognitivist and Culturalist), and analyses the ability of film to teach and create philosophy.

**What Technology Wants** Kevin Kelly,2011-09-27 From the author of the New York Times bestseller The Inevitable– a sweeping vision of technology as a living force that can expand our individual potential In this provocative book, one of today's most respected thinkers turns the conversation about technology on its head by viewing technology as a natural system, an extension of biological evolution. By mapping the behavior of life, we paradoxically get a glimpse at where technology is headed–or what it wants. Kevin Kelly offers a dozen trajectories in the coming decades for this near-living system. And as we align ourselves with technology's agenda, we can capture its colossal potential. This visionary and optimistic book explores how technology gives our lives greater meaning and is a must-read for anyone curious about the future.
