Simulator Study of Stall/post-stall Characteristics of a Fighter Airplane with Relaxed Longitudinal Static Stability, 1979

Red Army Ralph Peters, 1990 From the cockpit of a MIG to the foot soldiers and tankers on the scarred, bloody battlefields to the four-star general commanding the attack, Red Army is a riveting portrayal of modern war--and of human strengths and weaknesses. Seen entirely through Russian eyes, this extraordinary novel is destined to become a classic.

Full Spectrum Dominance F. William Engdahl, 2011 For the faction that controls the Pentagon, the military industry and the oil industry, the Cold War never ended. It went on 'below the radar' creating a global network of bases and conflicts to advance their long-term goal of Full Spectrum Dominance, the total control of the planet: land, sea, air, space, outer space and cyberspace. Their methods included control of propaganda, use of NGOs for regime change, Color Revolutions to advance NATO east, and a vast array of psychological and economic warfare techniques, a Revolution in Military Affairs as they termed it. The events of September 11, 2001 would allow an American President to declare a war on an enemy who was everywhere and nowhere, who justified a Patriot Act that destroyed that very freedom in the name of the new worldwide War on Terror. This book gives a disturbing look at that strategy of Full Spectrum Dominance.

Introduction to UAV Systems Paul G. Fahlstrom, Thomas J. Gleason, 2012-07-11 Unmanned aerial vehicles (UAVs) have been widely adopted in the military world over the last decade and the success of these military applications is increasingly driving efforts to establish unmanned aircraft in non-military roles. *Introduction to UAV Systems*, 4th edition provides a comprehensive introduction to all of the elements of a complete Unmanned Aircraft System (UAS). It addresses the air vehicle, mission planning and control, several types of mission payloads, data links and how they interact with mission performance, and launch and recovery concepts. This book provides enough information to encourage a student to learn more; to provide a specialist with a basic appreciation of the technical issues that drive other parts of the system and interact with their specialty; or to help a program manager understand system-level tradeoffs and know what questions to ask. Key features: Comprehensive overview of all elements of a UAS and of how they interact. Introduces the underlying concepts of key subsystems. Emphasizes system-integration issues and how they relate to subsystem design choices. Practical discussion of issues informed by lessons learned in UAV programs. *Introduction to UAV Systems*, 4th edition is written both for newcomers to the subject and for experienced members of the UAV community who desire a comprehensive overview at the system level. As well as being a primary text for an introductory course on UAS or a supplementary text in a course that goes into more depth in one of the individual technologies involved in a UAS, this book is a useful overview for practicing engineers, researchers, managers, and consultants interested in UAV systems.

The Development of Jet and Turbine Aero Engines Bill Gunston, 2006 Using language understandable to those without an engineering background and avoiding complex mathematical formulae, Bill Gunston explains the differences between gas-turbine, jet, rocket, ramjet and helicopter turbo shaft aero engines and traces their histories from the early days through to today's complex and powerful units as used in the latest wide-bodied airliners and high performance military jets.

World Encyclopedia of Aero Engines Bill Gunston, 2006 In this new edition, Gunston describes every major aeroplane manufacturer throughout the world. He focuses on the aircraft from the pioneering days to the very latest engines, and places each engine within its technological and historical context.

Aerodynamic Characteristics of the NACA 747A315 and 747A415 Airfoils from Tests in the NACA Two-dimensional Low-turbulence Pressure Tunnel Albert E. Von Doenhoff, Louis S. Stivers, 1944 Summary: Two low-drag airfoils, the NACA 747A315 and the NACA 747A415, designed to have reduced pitching moments about the quarter-chord point and moderately high values of the design lift coefficient have been tested in the NACA two-dimensional low-turbulence pressure tunnel. Section lift, drag, and pitching-moment coefficients are presented for Reynolds numbers of 3×10^6 , 6×10^6 , and 9×10^6 , together with section lift and section drag data for a Reynolds number of 6×10^6 for the same airfoils with roughened leading edges.

Ilyushin IL-76 Yefim Gordon, Dmitriy Kommissarov, Sergey Komissarov, 2001 A familiar sight both in military and worldwide commercial use, the Ilyushin IL-76 was the Soviet's answer to the Lockheed Starlifter. Compiled by noted Russian aviation writers and historians from a wealth of first-hand Russian sources, this book is a comprehensive history of each variant and its service. Extensive tables detail each aircraft built with complete notes on every operator--both civil and military--and their fleets. For military enthusiasts and modelers.

Fear of Barbarians Petar Adonovski, 2021-08-25 Gavdos: a remote island south of Crete, the southernmost point of Europe, surrounded by an endless expanse of sea. To Oksana, who has come from Ukraine with her friends to recover from illness in the aftermath of Chernobyl, it seems like a dream to live in a blue-and-white house with a lemon tree. To Penelope, a Greek woman who was married off to an unsuitable man by nuns from the convent where she spent her teenage years, it is a kind of prison. Their two narratives, interwoven with other stories -- of the other women of the sparse community, of their own past lives and loves -- are skilfully combined with themes of otherness and the notions of 'foreign' and 'barbaric' in this poetic and timely short novel by acclaimed Macedonian writer Petar Andonovski, winner of the European Union Prize for Literature.

Reusable Launch Vehicle Committee on Reusable Launch Vehicle Technology and Test Program, Commission on Engineering and Technical Systems, Division on Engineering and Physical Sciences, National Research Council, 1996-01-22 The key to opening the use of space to private enterprise and to broader public uses lies in reducing the cost of the transportation to space. More routine, affordable access to space will entail aircraft-like quick turnaround and reliable operations. Currently, the space Shuttle is the only reusable launch vehicle, and even parts of it are expendable while other parts require frequent and extensive refurbishment. NASA's highest

priority new activity, the Reusable Launch Vehicle program, is directed toward developing technologies to enable a new generation of space launchers, perhaps but not necessarily with single stage to orbit capability. This book assesses whether the technology development, test and analysis programs in propulsion and materials-related technologies are properly constituted to provide the information required to support a December 1996 decision to build the X-33, a technology demonstrator vehicle; and suggest, as appropriate, necessary changes in these programs to ensure that they will support vehicle feasibility goals.

A History of Soviet Air Power Robert A. Kilmarx,1962

Cat Painters Biljana Dragoslav Obradović,Dubravka Djurić,2016 Poetry. Translated from the Serbian by various translators with an introduction by Charles Bernstein. CAT PAINTERS is the first comprehensive anthology of contemporary Serbian poetry to appear in English. Collecting the work of 71 Serbian poets born since 1940, this book includes Serbs living in Serbia; diasporic Serbs living in the US, France and Italy; Roma and Jewish Serbs; a Japanese who lives in Serbia; and LGBT writers. Half of those included are women. The poetry varies from very traditional forms to experimental, L=A=N=G=U=A=G=E inspired, writing. They speak of all things human: love, war, peace, struggle and loss. Many of the poets were inspired by Americans like T.S. Eliot, Ezra Pound, Allen Ginsberg, Gwendolyn Brooks, past US Poet Laureate Charles Simic (who was born in Serbia and has edited an anthology of Serbian poetry in the US), and Charles Bernstein, who has written the Preface, among others. Editors Biljana D. Obradović, who lives in New Orleans, and Dubravka Djurić, who lives in Belgrade, both poets and critics, have assembled a broad range of work translated by 31 distinguished translators from around the world, revealing a side of Serbia which people in the US and the West may not be familiar with--its deep traditions and its very modern engagement with literature, politics and aesthetics. This remarkable anthology sets a high standard for future collections of Serbian, European, or indeed any literatures.
