A grammar of Sanzhi Dargwa Diana Forker, 2020 Sanzhi Dargwa belongs to the Dargwa (Dargi) languages (ISO dar; Glottocode sanz1248) which form a subgroup of the East Caucasian (Nakh-Dagestanian) language family. Sanzhi Dargwa is spoken by approximately 250 speakers and is severely endangered. This book is the first comprehensive descriptive grammar of Sanzhi, written from a typological perspective. It treats all major levels of grammar (phonology, morphology, syntax) and also information structure. Sanzhi Dargwa is structurally similar to other East Caucasian languages, in particular Dargwa languages. It has a relatively large consonant inventory including pharyngeal and ejective consonants. Sanzhi morphology is concatenative and mainly suffixing. The language exhibits a mixture of dependent-marking in the form of a rich case inventory and head-marking in the form of verbal agreement. Nouns are divided into three genders. Verbal inflection conflates tense/aspect/mood/evidentiality in a rich array of synthetic and analytic verb forms as well as participles, converbs, a masdar (verbal noun), and infinitive and some other forms used in analytic tenses and subordinate clauses. Salient traits of the grammar are two independently operating agreement systems: gender/number agreement and person agreement. Within the nominal domain, modifiers agree with the head nominal in gender/number. Agreement within the clausal domain is mainly controlled by the argument in the absolutive case. Person agreement operates only at the clausal level and according to the person hierarchy 1, 2 > 3. Sanzhi has ergative alignment in the form of gender/number agreement and ergative case marking. The most frequent word order at the clause level is SOV, though all other logically possible word orders are also attested. In subordinate clauses, word order is almost exclusively head-final.

The Mehweb language Michael Daniel, Nina Dobrushina, Dmitry Ganenkov, 2019-10-23 This book is an investigation into the grammar of Mehweb (Dargwa, East Caucasian also known as Nakh-Daghestanian) based on several years of team fieldwork. Mehweb is spoken in one village community in Daghestan, Russia, with a population of some 800 people. In many ways, Mehweb is a typical East Caucasian language: it has a rich inventory of consonants; an extensive system of spatial forms in nouns and converbs and volitional forms in verbs; pervasive gender-number agreement; and ergative alignment in case marking and in gender agreement. It is also a typical language of the Dargwa branch, with symmetrical verb inflection in the imperfective and perfective paradigm and extensive use of spatial encoding for experiencers. Although Mehweb is clearly close to the northern varieties of Dargwa, it has been long isolated from the main body of Dargwa varieties by speakers of Avar and Lak. As a result of both independent internal evolution and contact with its neighbours, Mehweb developed some deviant properties, including accusatively aligned egophoric agreement, a split in the feminine class, and the typologically rare grammatical categories of verificative and apprehensive. But most importantly, Mehweb is where our friends live.

Fluorinated Surfactants and Repellents, Second Edition, Erik Kissa, 2001-02-09 A discussion of the synthesis, problems, theories and applications of fluorinated surfactants, this second edition is updated with four new chapters on repellency and protection against soiling and staining and over 2900 references, equations, and drawings (800 more than the previous edition). Cloud Native Infrastructure Justin Garrison,Kris Nova,2017-10-25 Cloud native infrastructure is more than servers, network, and storage in the cloud—it is as much about operational hygiene as it is about elasticity and scalability. In this book, you'll learn practices, patterns, and requirements for creating infrastructure that meets your needs, capable of managing the full life cycle of cloud native applications. Justin Garrison and Kris Nova reveal hard-earned lessons on architecting infrastructure from companies such as Google, Amazon, and Netflix. They draw inspiration from projects adopted by the Cloud Native Computing Foundation (CNCF), and provide examples of patterns seen in existing tools such as Kubernetes. With this book, you will: Understand why cloud native infrastructure is necessary to effectively run cloud native applications Use guidelines to decide when—and if—your business should adopt cloud native practices Learn patterns for deploying and managing infrastructure and applications Design tests to prove that your infrastructure works as intended, even in a variety of edge cases Learn how to secure infrastructure with policy as code

Improving Recycling Markets OECD,2006-11-13 Markets for many classes of recyclable materials are growing, but market failures and barriers are constraining some markets. This report presents the case for the use of 'industrial' policies which address such market failures and barriers.

New Austrian Film Robert von Dassanowsky,Oliver C. Speck,2011-04-30 Out of a film culture originally starved of funds have emerged rich and eclectic works by film-makers that are now achieving the international recognition that they deserve: Barbara Albert, Michael Haneke, Ulrich Seidl, and Stefan Ruzowitzky, to give four examples. This comprehensive critical anthology, by leading scholars of Austrian film, is intended to introduce and make accessible this much under-represented phenomenon. Although the book covers the full development of the Austrian new wave it focuses on the period that has brought it global attention: 1998 to the present. *New Austrian Film* is the only book currently available on this topic and will be an essential reference work for academics, students and filmmakers, interested in modern Austrian film.

Managing Intercollegiate Athletics Daniel Covell,Sharianne Walker,2019-03-07 This practical, comprehensive book combines solid theoretical concepts with relevant examples, extensive factual information, and important insider perspectives to help prepare students who are interested in pursuing a career in collegiate athletics management. The authors' in-depth discussions reveal the inner workings of athletic departments and the conferences and governing organizations that impact them. Using examples from institutions of varying sizes and representing numerous conferences, associations, and divisions, *Managing Intercollegiate Athletics*, second edition, provides an

extensive view of management processes such as generating revenue to cover expenses; recruiting and its mechanics and regulations; the role of the conferences and national governing bodies; and academic standards, reform, and fraud. New to the second edition is an increased emphasis on the impact of division, institution, and department missions and goals on decision making. The book also includes new discussions of the application of management functions--including goal setting, decision making, and strategic management--on intercollegiate athletics at various levels. Adding to the practical nature of the book, and providing an important critical-thinking component to each chapter, are Practitioner Perspectives. These contributions demonstrate how and why administrators make and implement their decisions, and they present creative problem-solving ideas for readers that they can use in their own careers. New Practitioner Perspectives in this edition provide, for example, an insider's view from an NCAA vice president, a conference commissioner, and a Division I athletic director. Chapters also feature one or more Case Studies offering an in-depth look at how institutions grapple with management challenges. In the second edition, new case studies look at the NCAA's leadership role in the Penn State University abuse case, the role of the TRAC model to ensure data-based decision making in terminating the University of Alabama at Birmingham football program, and others. These case studies and accompanying questions can serve as starting points for class discussion.

Angels and Demons in Art Rosa Giorgi, 2005 This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, *Angels and Demons in Art* will delight readers with an interest in art or religious symbolism.

From the Abode of Islam to the Turkish Vatan Behlül (Behlul) Özkan (Ozkan), 2012-06-26 Examining the complex and pivotal case of Turkey, this fascinating ontology of this country's protean imagining of its nationhood and the construction of a modern national-territorial consciousness traces its cultural and religious evolution.

Working Drawings Handbook Keith Styles, 2014-05-16 Working Drawings Handbook focuses on the principles, styles,

methodologies, and approaches involved in drawings. The book first takes a look at the structure of information, types of drawing, and draftsmanship. Discussions focus on dimensioning, drawing conventions, techniques, materials, drawing reproduction, location drawing, component and sub-component drawings, assembly drawing, schedule, pictorial views, and structure of working drawings. The manuscript then ponders on working drawing management and other methods. Topics include planning the set, drawing register, drawing office programming, and introducing new methods. Building elements and external features, conventions for doors and windows, symbols indicating materials, electrical, telecommunications, and fire symbols, and non-active lines and symbols are also discussed. The book is a fine reference for draftsmen and researchers interested in studying the elements of drawing.

Now Is the Time for Running Michael Williams, 2013-03-12 Just down the road from their families, Deo and his friends play soccer in the dusty fields of Zimbabwe, cheered on by Deo's older brother, Innocent. It is a day like any other... until the soldiers arrive and Deo and Innocent are forced to run for their lives, fleeing the wreckage of their village for the distant promise of safe haven in South Africa. Along the way, they face the prejudice and poverty that greet refugees everywhere, but eventually Deo finds hope, joining dozens of other homeless, displaced teens on the World Cup Street Soccer team--a possible ticket out of extreme hardship to a new life. Captivating and timely, *Now Is the Time for Running* is a staggering story of survival that follows Deo and his brother on a transformative journey that will stay with readers long after the last page.

Cold War Modern David Crowley, Jane Pavitt, 2008 Modern life after 1945 seemed to promise both utopia and catastrophe. Both could, it seemed, be achieved at the 'push of a button'. Published to accompany a major V & A exhibition, 'Cold War Modern: Design 1945-1970', this book explores how the politics of the Cold War shaped architecture and design. Reassessing 'classic' designs and introducing many little-known objects.

Origins of the Sphinx Robert M. Schoch, Robert Bauval, 2017-03-16 New research and evidence that the Sphinx is thousands of years older than previously thought • Contrasts what Egyptologists claim about the Sphinx with historical accounts and new research including reanalysis of seismic studies and updates to Schoch's water weathering research and Bauval's Orion Correlation Theory • Examines how the Sphinx is contemporaneous with Göbekli Tepe, aligned with the constellation Leo, and was recarved during the Old Kingdom era of Egypt • Reveals that the Sphinx was built during the actual historical Golden Age of ancient Egypt, the period known in legend as Zep Tepi No other monument in the world evokes mystery like the Great Sphinx of Giza. It has survived the harsh

climate of Egypt for thousands of years and will remain long after our own civilization is gone. According to orthodox Egyptology, the Sphinx was built around 2500 BCE as a memorial to the pharaoh Khafre. Yet this “fact” has scant to no supportive evidence. When was the Sphinx really built and, most importantly, why? In this provocative collaboration from two Egyptology outsiders, Robert M. Schoch, Ph.D., and Robert Bauval combine their decades of research to show how the Sphinx is thousands of years older than the conventional Egyptological timeline and was built by a long forgotten pre-Pharaonic civilization. They examine the known history of the Sphinx, contrasting what Egyptologists claim with prominent historical accounts and new research, including updates to Schoch’s geological water weathering research and reanalysis of seismic studies. Building on Bauval’s Orion Correlation Theory, they investigate the archaeoastronomical alignments of the monuments of the Giza Plateau and reveal how the pyramids and Sphinx were built to align with the constellations of Orion and Leo. Analyzing the evidence for a significantly older construction phase at Giza and the restoration and recarving of the Sphinx during the Old Kingdom era, they assert that the Sphinx was first built by an advanced pre-Pharaonic civilization that existed circa 12,000 years ago on the Giza Plateau, contemporaneous with the sophisticated Göbekli Tepe complex. The authors examine how the monuments at Giza memorialize Zep Tepi, the Golden Age of legend shown here to be an actual historical time period from roughly 10,500 BCE through 9700 BCE. Moving us closer to an understanding of the true age and purpose of the Great Sphinx, Schoch and Bauval provide evidence of an early high civilization witnessed by the Great Sphinx before the end of the last ice age.
