American Secret Projects 1 Tony Buttler,Alan Griffith (Military aircraft researcher),2016-04-07 Featuring the obscure, the unusual, the unbuilt and the unseen. The secret is out - Secret Projects is back. This is a new title in this highly acclaimed series, this time looking at concepts developed by the US aircraft industry in the years immediately prior to and during World War 2. This book includes and describes the major fighter and bomber proposals form the American aircraft industry which embrace various fighter and interceptor concepts, medium, heavy and intercontinental bombers, attack aircraft and anti-submarine aircraft, both for the USAF and US Navy. Particular emphasis is placed on 'Circular Proposals' - a system of submitting designs against requirements circulated around the industry by the Army Air Force in the 1930s and early 1940s. The illustrations show drawings and photographs of unbuilt designs merged with the history and photographs of real aeroplanes. Very little has been published previously about American projects from this time period and much of the material will not have been seen widely before. it will therefore be fascinating reading for all lovers of the previously highly successful 'Secret Projects' series and aviation historians.

Sustainability Michael Redclift,2002-02-07 The concept of sustainability is traditionally viewed in exclusively environmental terms. Sustainability: Life Chances and Livelihoods links peoples livelihoods and life chances to the concept of sustainability by examining the way in which social and economic processes complement and compound environmental change. Looking at the main ingredients of sustainable development - health, economic policy, land use, ethics and education, in both the north and south, this book demonstrates the way in which the life chances of individuals both effect and are affected by, their environments. Sustainability: Life Chances and Livelihoods shows that the scope of sustainability thinking needs to be widened to embrace public policies and experiences in both developed and developing countries.By providing a comparative focus, both spatially and temporally, the contributors demonstrate how the environmental concerns of the northern developed world are culturally translated into the south, often into immediate survival questions.

Actor-Network Theory and Tourism René van der Duim,Carina Ren,Gunnar Thór Jóhannesson,2012-03-16 The recent surfacing of actor-network theory (ANT) in tourism studies correlates to a rising interest in understanding tourism as emergent thorough relational practice connecting cultures, natures and technologies in multifarious ways. Despite the widespread application of ANT across the social sciences, no book has dealt with the practical and theoretical implications of using ANT in Tourism research. This is the first book to critically engage with the use of ANT in tourism studies. By doing so, it challenges approaches that have dominated the literature for the last twenty years and casts new light on issues of materiality, ordering and networks in tourism. The book describes the approach, its possibilities and limitations as an ontology and research methodology, and advances its use and research in the field of tourism. The first three chapters of the book introduce ANT and its key conceptual premises, the book itself and the relation between ANT and tourism studies. Using illustrative cases and examples, the subsequent chapters deal with specific subject areas like materiality, risk, mobilities and ordering and show how ANT contributes to tourism studies. This part presents examples and cases which illustrate the use of the approach in a critical way. Inherently, the study of tourism is a multi-disciplinary field of research and that is reflected in the diverse academic backgrounds of the contributing authors to provide a broad post-disciplinary context of ANT in tourism studies. This unique book, focusing on emerging approaches in tourism research, will be of value to students, researchers and academics in tourism as well as the wider Social Sciences.

China and International Relations Zheng Yongnian,2010-09-13 Despite Beijing’s repeated assurance that China’s rise will be peaceful, the United States, Japan and the European Union as well as many of China's Asian neighbours feel uneasy about the rise of China. Although China’s rise could be seen as inevitable, it remains uncertain as to how a politically and economically powerful China will behave, and how it will conduct its relations with the outside world. One major problem with understanding China’s international relations is that western concepts of international relations only partially explain China’s approach. China’s own flourishing, indigeneous community of international relations scholars have borrowed many concepts from the west, but their application has not been entirely successful, so the work of conceptualizing and theorizing China’s approach to international relations remains incomplete. Written by some of the foremost scholars in the field of China studies, this book focuses on the work of Wang Gungwu - one of the most influential scholars writing on international relations - including topics such as empire, nation-state, nationalism, state ideology, and the Chinese view of world order. Besides honouring Wang Gungwu as a great scholar, the book explores how China can be integrated more fully into international relations studies and theories; discusses the extent to which existing IR theory succeeds or fails to explain Chinese IR behaviour, and demonstrates how the study of Chinese experiences can enrich the IR field.
