Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Thin Within Judy Halliday,Arthur Halliday,2005-04-17 I want to lose weight, but dieting just doesn't

seem to work. I've tried everything, and I'm still three sizes too big. Help! I hate the way my body looks. Sound familiar? Like many women and men, perhaps you have tried virtually every weight-loss plan that exists only to give up in disappointment and despair. Have you faithfully counted fat grams and calories? Have you subjected yourself, week after week, to the humiliation of hearing what your current weight should be compared to what it is? Have you exercised excessively, given up your favorite foods, and felt guilty when you've failed to meet your weight goals? Time tested for more than 30 years, Thin Within is the original hunger-fullness plan. Tens of thousands of participants in the program have joyfully reported the release of unwanted weight. More importantly, they have maintained that weight with a new and incomparable peace with themselves and with the One who designed them. Thin Within makes it possible to: Identify and resolve issues that cause you to eat more than your body needs Leave diets behind forever Discover and enjoy those foods that promote health and vitality Experience the abundant life as you reach and maintain your natural God-given size

Adhesives and Adhesive Tapes Gerhard Gierenz, Werner Karmann, 2008-09-26 Adhesion is among the oldest technologies known to mankind, but the technology of adhesives began to boom with the developments in chemistry in the early 1900s. The last few years have seen tremendous progress in the performance of adhesives, allowing two pieces to be connected inseparably. Modern adhesives perform so well that more sophisticated joining methods, e.g. welding, can often be replaced by adhesion, meaning that adhesives have found new areas of application. This book allows readers to quickly gain an overview of the adhesives available and to select the best adhesive for each purpose.

How Bad Are Bananas? Mike Berners-Lee, 2011-04-01 Part green-lifestyle guide, part popular science, *How Bad Are Bananas?* is the first book to provide the information we need to make carbon-savvy purchases and informed lifestyle choices and to build carbon considerations into our everyday thinking. The book puts our decisions into perspective with entries for the big things (the World Cup, volcanic eruptions, the Iraq war) as well as the small (email, ironing, a glass of beer). And it covers the range from birth (the carbon footprint of having a child) to death (the carbon impact of cremation). Packed full of surprises – a plastic bag has the smallest footprint of any item listed, while a block of cheese is bad news – the book continuously informs, delights, and engages the reader. Solidly researched and referenced, the easily digestible figures, statistics, charts, and graphs (including a section on the carbon footprint of various foods) will encourage discussion and help people to make up their own minds about their consumer choices.

The Mellotron Book Frank Samagaio,2002 The Mellotron was a favorite instrument of such famed acts as the Beatles, the Moody Blues, Tangerine Dream and Mike Oldfield. This legendary organ used pre-recorded tape loops to produce the world's first sampled sounds, like the flute intro to the Beatles' Strawberry Fields. Back in production after a 20-year hiatus, the Mellotron is still one of the most sought-after pieces of vintage musical gear on the market. The Mellotron Book is the first title to explore the unique history and complex inner workings of this one-of-a-kind instrument.

The Play Versus Story Divide in Game Studies Matthew Wilhelm Kapell, 2015-11-16 Since the emergence of digital game studies, a number of debates have engaged scholars. The debate between ludic (play) and narrative (story) paradigms remains the one that famously never happened. This collection of new essays critically frames that debate and urges game scholars to consider it central to the field. The essayists examine various digital games, assessing the applicability of play-versus-narrative approaches or considering the failure of each. The essays reflect the broader history while applying notions of play and story to recent games in an attempt to propel serious analysis.

The Canadian Oral History Reader Kristina R. Llewellyn, Alexander Freund, Nolan Reilly, 2015-06-01 Despite a long and rich tradition of oral history research, few are aware of the innovative and groundbreaking work of oral historians in Canada. For this first primer on the practices within the discipline, the editors of The Canadian Oral History Reader have gathered some of the best contributions from a diverse field. Essays survey and explore fundamental and often thorny aspects in

oral history methodology, interpretation, preservation and presentation, and advocacy. In plain language, they explain how to conduct research with indigenous communities, navigate difficult relationships with informants, and negotiate issues of copyright, slander, and libel. The authors ask how people's memories and stories can be used as historical evidence – and whether it is ethical to use them at all. Their detailed and compelling case studies draw readers into the thrills and predicaments of recording people's most intimate experiences, and refashioning them in transcripts and academic analyses. They also consider how to best present and preserve this invaluable archive of Canadian memories. The Canadian Oral History Reader provides a rich resource for community and university researchers, undergraduate and graduate students, and independent scholars and documentarians, and serves as a springboard and reference point for global discussions about Canadian contributions to the international practice of oral history. Contributors include Brian Calliou (independent scholar), Elise Chenier (Simon Fraser University), Julie Cruikshank (University of British Columbia), Alexander Freund (University of Winnipeg), Steven High (Concordia University), Nancy

Janovicek (University of Calgary), Jill Jarvis-Tonus (independent scholar), Kristina R. Llewellyn (Renison University College, University of Waterloo), Bronwen Low (McGill University), Claudia Malacrida (University of Lethbridge), Joy Parr (Western University), Joan Sangster (Trent University), Emmanuelle Sonntag (Université du Québec à Montréal), Pamela Sugiman (Toronto Metropolitan University), Winona Wheeler (University of Saskatchewan), and Stacey Zembrzycki (Concordia University).

Feminist Pedagogy in Higher Education Tracy Penny Light, Jane Nicholas, Renée Bondy, 2015-07-31

In this new collection, contributors from a variety of disciplines provide a critical context for the relationship between feminist pedagogy and academic feminism by exploring the complex ways that critical perspectives can be brought into the classroom. This book discusses the processes employed to engage learners by challenging them to ask tough questions and craft complex answers, wrestle with timely problems and posit innovative solutions, and grapple with ethical dilemmas for which they seek just resolutions. Diverse experiences, interests, and perspectives—together with the various

teaching and learning styles that participants bring to twenty-first-century universities—necessitate inventive and evolving pedagogical approaches, and these are explored from a critical perspective. The contributors collectively consider the implications of the theory/practice divide, which remains central within academic feminism’s role as both a site of social and gender justice and as a part of the academy, and map out some of the ways in which academic feminism is located within the academy today.

Beyond the Sea Felan Parker, Jessica Aldred, 2018-11-09 The Bioshock series looms large in the industry and culture of video games for its ambitious incorporation of high-minded philosophical questions and retro-futuristic aesthetics into the ultraviolent first-person shooter genre. Beyond the Sea marks ten years since the release of the original game with an interdisciplinary collection of essays on Bioshock, Bioshock 2, and Bioshock Infinite. Simultaneously lauded as landmarks in the artistic growth of the medium and criticized for their compromised vision and politics, the Bioshock games have been the subject of significant scholarly and critical discussion. Moving past well-trodden debates, Beyond

the Sea broadens the conversation by putting video games in dialogue with a diverse range of other disciplines and cultural forms, from parenting psychology to post-humanism, from Thomas Pynchon to German expressionist cinema. Offering bold new perspectives on a canonical series, *Beyond the Sea* is a timely contribution to our understanding of the aesthetics, the industry, and the culture of video games. Contributors include Daniel Ante-Contreras (Miracosta), Luke Arnott (Western Ontario), Betsy Brey (Waterloo), Patrick Brown (Iowa), Michael Fuchs (Graz), Jamie Henthorn (Catawba), Brendan Keogh (Queensland), Cameron Kunzelman (Georgia), Cody Mejeur (Michigan State), Matthew Thomas Payne (Notre Dame), Gareth Schott (Waikato), Karen Schrier (Marist), Sarah Stang (York/Ryerson), Sarah Thorne (Carleton), John Vanderhoef (California State, Dominguez Hills), Matthew Wysocki (Flagler), Jordan R. Youngblood (Eastern Connecticut State), and Sarah Zaidan (Emerson).
