Introductory Grammar of Amharic Wolf Leslau, 2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

Original Grin Ron English, 2019-07-16 Through his highly subversive art Ron English (b. 1959) has bombed the global landscape with striking and often unsettling imagery. He coined the term POPaganda to describe his signature and darkly satirical renderings of corporate branding icons. Ranging from superhero mythology to pillars of art history, his work is populated with a vast and constantly growing arsenal of original characters such as MC Supersized, the obese fast-food mascot featured in the hit movie Supersize Me; and Abraham Obama, which fused America's 16th and 44th Presidents, an image that was posited by the media as having directly impacted the 2008 election. His cameo on The Simpsons secured his position as America's premier pop iconoclast. This book is the first complete retrospective of English's work, compiling his paintings, illustrations, toys, sculpture, street art, and agit-pop. Additionally, it contains a lengthy and comprehensive interview with the artist conducted exclusively for this publication.

The Films of Terrence Malick James

Morrison, Thomas Schur, 2003-09-30 Despite overwhelming acclaim for his work, director Terrence Malick remains an under-examined figure of an era of filmmaking that also produced such notables as Robert Altman, Francis Ford Coppola, and Martin Scorsese. His films *Badlands* and *Days of Heaven* remain benchmarks of American cinema, while his recent *The Thin Red Line* returned him to the pantheon of American directors. In this new study, authors James Morrison and Thomas Schur examine each of his films in detail, drawing on extensive archival research to construct a portrait of his working methods as a director as well as the thematic, aesthetic, and cultural components of his work. Moreover, aside from tracing the development of Malick's filmmaking from its beginnings to the present, the book compares his finished pictures to their original shooting scripts, and so provides a unique means

of exploring the nature of his working methods and the ways in which they influence the final products. Revealing the ways in which these films connect to and depart from evolving traditions of the last 30 years, *The Films of Terrence Malick* provides a comprehensive and penetrating study as well as an informative and adventurous work of film criticism.

Hand-drawn Perspectives and Sketches ,2021-05-14
ARCHITECTURAL RENDERING: HAND-DRAWN PERSPECTIVES & SKETCHES is a unique book in the form of a compendium of 412 hand-drawn perspectives, sketches, isometrics, axonometrics, paintings and posters collected personally from 27 renowned architects and artists. These drawings have been selected to represent as many styles, types, periods, and regions as possible. The architects and artists whose works have been included in this treatise belong to countries like India, Italy, Kenya, Peru, and the United States of America. They represent about four generations of illustrators - the eldest one was born in 1910 and the youngest one is 1995-born. This range covers a period of almost a century and thus is witness to the many styles and changing trends in architectural rendering. It is hoped that the drawings featured in this book are sufficient to inspire young minds to adopt, adapt and continue the trend of hand-drawn perspectives, sketches, and paintings. The drawings featured in this book are grouped into four Sections. These include: Graphic Section-1: PERSPECTIVES (224 drawings) Graphic Section-2: SKETCHES (108 drawings) Graphic Section-3: ISOMETRICS and AXONOMETRICS (34

drawings) Graphic Section-4: PAINTINGS and POSTERS (46 drawings) The book was conceived of and is presented as a reference book for the use of architects, artists, painters, sketchers, sculptors, and students of these related disciplines. It is hoped that this book will enable them to have an overview of different styles of architectural rendering in the last century and to draw inspiration to continue this art in today's digital world.
