**Corcoran Gallery of Art** Corcoran Gallery of Art, Sarah Cash, Emily Dana Shapiro, Jennifer Carson, 2011 This authoritative catalogue of the Corcoran Gallery of Art's renowned collection of pre-1945 American paintings will greatly enhance scholarly and public understanding of one of the finest and most important collections of historic American art in the world. Composed of more than 600 objects dating from 1740 to 1945.

**Game Feel** Steve Swink, 2008-10-13 Game Feel exposes feel as a hidden language in game design that no one has fully articulated yet. The language could be compared to the building blocks of music (time signatures, chord progressions, verse) - no matter the instruments, style or time period - these building blocks come into play. Feel and sensation are similar building blocks where

**Intelligence Revolution 1960** Ingard Clausen, Edward A. Miller, 2012 Overview: Provides a history of the Corona Satellite photo reconnaissance Program. It was a joint Central Intelligence Agency and United States Air Force program in the 1960s. It was then highly classified.

**Volcanoes** John P. Lockwood, Richard W. Hazlett, 2013-04-26 Volcanoes are essential elements in the delicate global balance of elemental forces that govern both the dynamic evolution of the Earth and the nature of Life itself. Without volcanic activity, life as we know it would not exist on our planet. Although beautiful to behold, volcanoes are also potentially destructive, and understanding their nature is critical to prevent major loss of life in the future. Richly illustrated with over 300 original color photographs and diagrams the book is written in an informal manner, with minimum use of jargon, and relies heavily on first-person, eye-witness accounts of eruptive activity at both red (effusive) and grey (explosive) volcanoes to illustrate the full spectrum of volcanic processes and their products. Decades of teaching in university classrooms and fieldwork on active volcanoes throughout the world have provided the authors with unique experiences that they have distilled into a highly readable textbook of lasting value. Questions for Thought, Study, and Discussion, Suggestions for Further Reading, and a comprehensive list of source references make this work a major resource for further study of volcanology. Volcanoes maintains three core foci: Global perspectives explain volcanoes in terms of their tectonic positions on Earth and their roles in earth history. Environmental perspectives describe the essential role of volcanism in the moderation of terrestrial climate and atmosphere. Humanitarian perspectives discuss the major influences of volcanoes on human societies. This latter is especially important as resource scarcities and environmental issues loom over our world, and as increasing numbers of people are threatened by volcanic hazards. Readership: Volcanologists, advanced undergraduate, and graduate students in earth science and related degree courses, and volcano enthusiasts worldwide. **The Glaciers of Iceland** Helgi Björnsson, 2016-10-04 This book is the first comprehensive overview and evaluation of the origins, history and current size and condition of all of Iceland's major glaciers (including Vatnajökull, the largest in Europe) at the beginning of the twenty-first century. It is not only illustrated with many beautiful photographs and graphs of recent statistics and scientific data, but is also a collection of historical writings and drawings from annals, sagas, folk tales, diaries, reports, stories and poems, as it presents a unique approach to the study of glaciers on an island in the North Atlantic. Balancing and comparing the world of man with the world of nature, the perceptions of art and culture with the systematic and pragmatic analyses of science, The Glaciers of Iceland present a wide spectrum of readers with a new and stimulating view of the origins, development and possible future of these massive natural phenomena, as well as the study and role of glaciology, within specific time lines and geographical locations. Icelandic glaciers the author argues could prove essential for understanding the current unsettling progress of global warming. The glaciers of Iceland, therefore, aims at presenting to a wide readership an original, historical, cultural and scientific overview of these geophysical features in Iceland while also suggesting increasingly important lessons and models for man's future interaction with the world's glaciers as a whole.

**The Cinema of Attractions Reloaded** Wanda Strauven, 2006 Twenty years ago, noted film scholars Tom Gunning and André Gaudreault introduced the phrase "cinema of attractions" to describe the essential qualities of films made in the medium's earliest days, those produced between 1895 and 1906. Now, The Cinema of Attractions Reloaded critically examines the term and its subsequent wide-ranging use in film studies. The collection opens with a history of the term, tracing the collaboration between Gaudreault and Gunning, the genesis of the term in their attempts to explain the spectacular effects of motion that lay at the heart of early cinema, and the pair's debts to Sergei Eisenstein and others. This reconstruction is followed by a look at applications of the term to more recent film productions, from the works of the Wachowski brothers to virtual reality and video games. With essays by an impressive collection of international film scholars—and featuring contributions by Gunning and Gaudreault as well—The Cinema of Attractions Reloaded will be necessary reading for all scholars of early film and its continuing influence.

**Information and Communication Technology for Intelligent Systems** Suresh Chandra Satapathy, Amit Joshi, 2018-12-30 The book gathers papers addressing state-of-the-art research in all areas of Information and Communication Technologies and their applications in intelligent computing, cloud storage, data mining and software analysis. It presents the outcomes of the third International Conference on Information and Communication Technology for Intelligent Systems, which was held on April 6–7, 2018, in Ahmedabad, India. Divided into two volumes, the book discusses the fundamentals of various data analytics and algorithms, making it a valuable resource for researchers' future studies.

**Geomorphological Techniques** Andrew Goudie, 2003-09-02 The specialist contributors to Geomorphological Techniques have thoroughly augmented and updated their original, authoritative coverage with critical evaluations of major recent developments in this field. A new chapter on neotectonics reflects the impact of developments in tectonic theory, and heavily revised sections deal with advances in remote sensing, image analysis, radiometric dating, geomorphometry, data loggers, radioactive tracers, and the determination of pore water pressure and the rates of denudation.

**Swoon: Great Seducers and Why Women Love Them** Betsy Prioleau, Elizabeth Stevens Prioleau, 2013-02-04 Casanovas: where are those great romancers of women? In Swoon, Betsy Prioleau gives us a smart, entertaining study of ladies' men, demystifying their character, seductive secrets, and killer charm. Combining history, science, culture, and colorful contemporary research, Prioleau gives us a portrait of the successful seducer that explodes every stereotype and shatters every cliché. Instead of a satanic rake, slick player, or rich, handsome powerbroker, he's an unlikely, often homely Romeo who cares about women and understands what they want. Through analyses of history's legendary lovers and interviews with today's heartthrobs, Prioleau uncovers the surprising seductive secrets that really rock female hearts, from unfeigned ardor to conversational flair. In doing so, she destroys the pick-up artists' advice of such books as *The Game*. Finally, Prioleau critiques the twenty-first-century sexual malaise, especially women's record discontent with men, and argues that it's high time to retrieve and celebrate the great seducer.

Dictionary of Construction Terms Simon Tolson, 2014-04-16 The Dictionary of Construction Terms offers clear and concise explanations of the most commonly encountered legal and technical terms, phrases and abbreviations used throughout the construction industry. It will save valuable time when searching for an authoritative explanation of a frequently used term and will become a practical reference for construction lawyers, practitioners and students, as well as those in related industries including planning, property and insurance. Why you should buy this book: There is no other all-inclusive collection of legal and technical terms available at present Convenient source of information for lawyers, practitioners and students Includes a list of common technical acronyms (ie. DPC, DPM, FFL) Lists acronyms of common institutions such as the ICE, JCT and ACE Examples of definitions: Modular construction A modern construction method whereby the building is constructed using prefabricated or pre-assembled building sections or modules. The three-dimensional building sections are typically fabricated and assembled in an enclosed factory environment and then delivered to site, ready for installation. Modular construction is aimed at minimising construction time by standardising design components, providing consistent quality and allowing site preparation and building activities to commence concurrently with the construction of the factory-made modules. Snagging The process of formally inspecting the construction works to identify any incomplete works or defects in completed works. A snagging list (or 'punch list') is a schedule of defects resulting from this inspection. These items typically need to be rectified prior to the issuing of a completion certificate or handing-over of the works although in some cases a completion certificate will be issued with a snagging list attached.
