Re-Inventing Africa's Development Jong-Dae Park,2018-12-31 This open access book analyses the development problems of sub-Saharan Africa (SSA) from the eyes of a Korean diplomat with knowledge of the economic growth Korea has experienced in recent decades. The author argues that Africa's development challenges are not due to a lack of resources but a lack of management, presenting an alternative to the traditional view that Africa's problems are caused by a lack of leadership. In exploring an approach based on mind-set and nation-building, rather than unity - which tends to promote individual or party interests rather than the broader country or national interests - the author suggests new solutions for SSA's economic growth, inspired by Korea's successful economic growth model much of which is focused on industrialisation. This book will be of interest to researchers, policymakers, NGOs and governmental bodies in economics, development and politics studying Africa's economic development, and Korea's economic growth model.

The 3rd ASEAN Reader Ooi Kee Beng, 2015-08-24 Over the past two decades, ISEAS has compiled abridged articles that analyse key aspects of Southeast Asia's development and the ASEAN process. The ASEAN Reader was published in 1992 just as the Cold War ended, while The Second ASEAN Reader came in 2003 in the wake of the 1997 Asian crisis and the September 11 attacks in 2001. The past decade has not been spared its share of intense changes, with the rise of China and India bringing new challenges to the region's power equation, and the impact of the 2008 global financial crisis. Despite this, the momentum towards an integrated ASEAN community has been maintained. The articles in The Third ASEAN Reader study the trends and events of recent years, and discuss the immediate future of Southeast Asia.

Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

SuperSight David Rose, 2021-11-09 NATIONAL INDIE EXCELLENCE AWARDS WINNER – NONFICTION • 2022 IPPY AWARDS BRONZE MEDALIST – SCIENCE For thousands of years, human vision has been largely unchanged by evolution. We're about to get a software update. Today, Apple, Google, Microsoft, Facebook, Snap, Samsung, and a host of startups are racing to radically change the way we see. The building blocks are already falling into place: cloud computing and 5G networks, AI computer vision algorithms, smart glasses and VR headsets, and mixed reality games like Pokémon GO. But what's coming next is a fundamental shift in how we experience the world and interact with each other. Over the next decade, what we see and how we see it will no longer be bound by biology. Instead, our everyday vision will be augmented with digital information to give us what spatial computing pioneer David Rose calls "SuperSight." And as our view of the world becomes blended layers of information delivered via glasses, contact lenses, or projected light, it will fundamentally change learning, shopping, work, play, and much, much more. David provides an insider's guide to the way our lives are about to change, while also unpacking the downsides of this coming world—what he calls the hazards of SuperSight, from equity and access issues to bubble filter problems—and proposing rational, actionable ways around them. From AI mirrors that advise us on our outfits, to museums that let us talk with deceased explorers and artists, to the ways we envision sustainable cities, the scope of augmented vision is boundless. SuperSight offers a rich speculative preview of the future and its implications, both shocking and thrilling.

The Mobile Wave Michael J. Saylor, 2013-05-28 In the tradition of international bestsellers, Future Shock and Megatrends, Michael J. Saylor, CEO of MicroStrategy, brings The Mobile Wave, a ground-breaking analysis of the impact of mobile intelligence -- the fifth wave of computer technology. The Mobile Wave argues that the changes brought by mobile computing are so big and widespread that it's impossible for us to see it all, even though we are all immersed in it. Saylor explains that the current generation of mobile smart phones and tablet computers has set the stage to become the universal computing platform for the world. In the hands of billions of people and accessible anywhere and anytime, mobile computers are poised to become an appendage of the human being and an essential tool for modern life. With the perspective of a historian, the precision of a technologist, and the pragmatism of a CEO, Saylor provides a panoramic view of the future mobile world. He describes how: A Harvard education will be available to anyone with the touch of a screen. Cash will become virtual software and crime proof. Cars, homes, fruit, animals, and more will be tagged so they can tell you about themselves. Buying an item will be as easy as pointing our mobile device to scan and pay. Land and capital will become more of a liability than an asset. Social mobile media will push all businesses to think and act like software companies. Employment will shift as more service-oriented jobs are

automated by mobile software. Products, businesses, industries, economies, and even society will be altered forever as the Mobile wave washes over us and changes the landscape. With so much change, The Mobile Wave is a guidebook for individuals, business leaders, and public figures who must navigate the new terrain as mobile intelligence changes everything.
