Owning the Olympics Monroe Price, Daniel Dayan, 2009-12-10 A major contribution to the study of global events in times of global media. Owning the Olympics tests the possibilities and limits of the concept of 'media events' by analyzing the mega-event of the information age: the Beijing Olympics. . . . A good read from cover to cover. —Guobin Yang, Associate Professor, Asian/Middle Eastern Cultures & Sociology, Barnard College, Columbia University From the moment they were announced, the Beijing Games were a major media event and the focus of intense scrutiny and speculation. In contrast to earlier such events, however, the Beijing Games are also unfolding in a newly volatile global media environment that is no longer monopolized by broadcast media. The dramatic expansion of media outlets and the growth of mobile communications technology have changed the nature of media events, making it significantly more difficult to regulate them or control their meaning. This volatility is reflected in the multiple, well-publicized controversies characterizing the run-up to Beijing 2008. According to many Western commentators, the People's Republic of China seized the Olympics as an opportunity to reinvent itself as the New China---a global leader in economics, technology, and environmental issues, with an improving human-rights record. But China's maneuverings have also been hotly contested by diverse global voices, including prominent human-rights advocates, all seeking to displace the official story of the Games. Bringing together a distinguished group of scholars from Chinese studies, human rights, media studies, law, and other fields, *Owning the Olympics* reveals how multiple entities---including the Chinese Communist Party itself---seek to influence and control the narratives through which the Beijing Games will be understood. digitalculturebooks is an imprint of the University of Michigan Press and the Scholarly Publishing Office of the University of Michigan Library dedicated to publishing innovative and accessible work exploring new media and their impact on society, culture, and scholarly communication. Chinese Martial Arts Cinema Stephen Teo, 2015-11-13 This is the first comprehensive, fully-researched account of the historical and contemporary development of the traditional martial arts genre in the Chinese cinema known as wuxia (literal translation: martial chivalry) - a genre which audiences around the world became familiar with through the phenomenal 'crossover' hit *Crouching Tiger, Hidden Dragon* (2000). The book unveils rich layers of the wuxia tradition as it developed in the early Shanghai cinema in the late 1920s, and from the 1950s onwards, in the Hong Kong and Taiwan film industries. Key attractions of the book are analyses of: *The history of the tradition as it began in the Shanghai cinema, its rise and popularity as a serialized form in the silent cinema of the late 1920s, and its eventual prohibition by the government in 1931. *The fantastic characteristics of the genre, their relationship with folklore, myth and religion, and their similarities and differences with the kung fu sub-genre of martial arts cinema. *The protagonists and heroes of the genre, in particular the figure of the female knight-errant. *The chief personalities and masterpieces of the genre - directors such as King Hu, Chu Yuan, Zhang Che, Ang Lee, Zhang Yimou, and films such as *Come Drink With Me* (1966), *The One-Armed Swordsman* (1967), *A Touch of Zen* (1970-71), *Hero* (2002), *House of Flying Daggers* (2004), and *Curse of the Golden Flower* (2006).

Field Programmable Logic and Applications Patrick Lysaght, James Irvine, Reiner Hartenstein, 1999-08-20 This book contains the papers presented at the 9th International Workshop on Field Programmable Logic and Applications (FPL'99), hosted by the University of Strathclyde in Glasgow, Scotland, August 30 - September 1, 1999. FPL'99 is the ninth in the series of annual FPL workshops. The FPL'99

programme committee has been fortunate to have received a large number of high-quality papers addressing a wide range of topics. From these, 33 papers have been selected for presentation at the workshop and a further 32 papers have been accepted for the poster sessions. A total of 65 papers from 20 countries are included in this volume. FPL is a subject area that attracts researchers from both electronic engineering and computer science. Whether we are engaged in research into software or hardware seems to be primarily a question of perspective. What is unquestionable is that the interaction of groups of researchers from different backgrounds results in stimulating and productive research. As we prepare for the new millennium, the premier European forum for researchers in field programmable logic remains the FPL workshop. Next year the FPL series of workshops will celebrate its tenth anniversary. The contribution of so many overseas researchers has been a particularly attractive feature of these events, giving them a truly international perspective, while the informal and convivial atmosphere that pervades the workshops have been their hallmark. We look forward to preserving these features in the future while continuing to expand the size and quality of the events.

Consilience E. O. Wilson, 2014-11-26 A dazzling journey across the sciences and humanities in search of deep laws to unite them. -- The Wall Street Journal One of our greatest living scientists--and the winner of two Pulitzer Prizes for *On Human Nature* and *The Ants*--gives us a work of visionary importance that may be the crowning achievement of his career. In *Consilience* (a word that originally meant jumping together), Edward O. Wilson renews the Enlightenment's search for a unified theory of knowledge in disciplines that range from physics to biology, the social sciences and the humanities. Using the natural sciences as his model, Wilson forges dramatic links between fields. He explores the chemistry of the mind and the genetic bases of culture. He postulates the biological principles underlying works of art from cave-drawings to *Lolita*. Presenting the latest findings in prose of wonderful clarity and oratorical eloquence, and synthesizing it into a dazzling whole, *Consilience* is science in the path-clearing traditions of Newton, Einstein, and Richard Feynman.

Deconstructing Martial Arts Paul Bowman, 2019-06-24 What is the essence of martial arts? What is their place in or relationship with culture and society? *Deconstructing Martial Arts* analyses familiar issues and debates that arise in scholarly, practitioner and popular cultural discussions and treatments of martial arts and argues that martial arts are dynamic and variable constructs whose meanings and values regularly shift, mutate and transform, depending on the context. It argues that deconstructing martial arts is an invaluable approach to both the scholarly study of martial arts in culture and society and also to wider understandings of what and why martial arts are. Placing martial arts in relation to core questions and concerns of media and cultural studies around identity, value, orientalism, and embodiment, *Deconstructing Martial Arts* introduces and elaborates deconstruction as a rewarding method of cultural studies.

Chinese and Japanese Music-Dramas J. I. Crump, William P. Malm, 2020-08-06 *Chinese and Japanese Music-Dramas* is the result of a conference on the relations between Chinese and Japanese music-drama held at the University of Michigan, Ann Arbor, on October 1-4, 1971. In addition to the Association for Asian Studies, four U-M departments participated in the conference: the Center for Japanese Studies, the Center for Chinese Studies, the School of Music, and the Speech Department. One important inspiration for the creation of such an interdisciplinary conference was the fact that each participant had found, after years of individual research on music-drama in

East Asia, consistent frustration caused by attempts to deal on their own with multiple cultural and technical problems. Another motivating force was an awareness among many members of the four disciplines involved that the topic is in fact one of the largest untouched fields of scholarly endeavor in both Asian and theatrical studies. The collection opens with J. I. Crump's exploration of the Ming commentators who began to subject Yüan musical drama to the same critiques as other literature from the past. In the second chapter, Rulan Chao Pian looks to the structure of arias in Peking Opera for clues about what distinguishes this art form. William P. Malm turns to three key sources for the performance conventions of Japanese Noh drama to glean any Sino-Japanese music relationships that exist in technical terms and practices. In the fourth essay, Carl Sesar analyzes a Noh play that stages the tension between Chinese influence and Japanese originality. Roy E Teele concludes the volume with a formal study of Noh play structure to assess lineages of influence from Chinese dramatic forms. After each contribution, the editors print a transcript of the conference participants' discussion of that paper, providing the reader with a detailed and nuanced view of how the contributors understood and responded to each other's work.

Agile Management Ángel Medinilla, 2012-10-09 If you have tried to implement Agile in your organization, you have probably learned a lot about development practices, teamwork, processes and tools, but too little about how to manage such an organization. Yet managerial support is often the biggest impediment to successfully adopting Agile, and limiting your Agile efforts to those of the development teams while doing the same old-style management will dramatically limit the ability of your organization to reach the next Agile level. Ángel Medinilla will provide you with a comprehensive understanding of what Agile means to an organization and the manager's role in such an environment, i.e., how to manage, lead and motivate self-organizing teams and how to create an Agile corporate culture. Based on his background as a "veteran" Agile consultant for companies of all sizes, he delivers insights and experiences, points out possible pitfalls, presents practical approaches and possible scenarios, also including detailed suggestions for further reading. If you are a manager, team leader, evangelist, change agent (or whatever nice title) and if you want to push Agile further in your organization, then this is your book. You will read how to change the paradigm of what management is about: it is not about arbitrary decisions, constant supervision and progress control, and the negotiation of changing requirements. It is about motivation, self-organization, responsibility, and the exploitation of all project stakeholders' knowledge. We live in a different world than the one that most management experts of the 20th century describe, and companies that strive for success and excellence will need a new kind of manager – Agile managers.

Chinese Military Reform in the Age of Xi Jinping: Drivers, Challenges, and Implications Joel Wuthnow, Phillip Charles Saunders, China's People's Liberation Army (PLA) has embarked on its most wide-ranging and ambitious restructuring since 1949, including major changes to most of its key organizations. The restructuring reflects the desire to strengthen PLA joint operation capabilities- on land, sea, in the air, and in the space and cyber domains. The reforms could result in a more adept joint warfighting force, though the PLA will continue to face a number of key hurdles to effective joint operations. Several potential actions would indicate that the PLA is overcoming obstacles to a stronger joint operations capability. The reforms are also intended to increase Chairman Xi Jinping's control over the PLA and to reinvigorate Chinese Communist Party (CCP) organs within the military. Xi Jinping's ability to push through reforms indicates that he has more authority over the PLA than his recent predecessors. The restructuring could create new opportunities for U.S.-China military contacts.
