Youth, Identity, Power Carlos Muñoz, 1989 Youth, Identity, Power is a study of the origins and development of Chicano radicalism in America. Written by a leader of the Chicano Student Movement of the 1960s who also played a role in the creation of the wider Chicano Power Movement, this is the first full-length work

to appear on the subject. It fills an important gap in the history of political protest in the United States. The author places the Chicano movement in the wider context of the political development of Mexicans and their descendants in the US, tracing the emergence of Chicano student activists in the 1930s and their initial challenge to the dominant racial and class ideologies of the time. Munoz then documents the rise and fall of the Chicano Power Movement, situating the student protests of the sixties within the changing political scene of the time, and assessing the movement's contribution to the cultural development of the Chicano population as a whole. He concludes with an account of Chicano politics in the 1980s. *Youth, Identity, Power* was named an Outstanding Book on Human Rights in the United States by the Gustavus Myers Center in 1990.

Claude Monet Claire Joyes, Claude Monet, 1985 For forty-three years Monet lived and painted at Giverny and he created there one of the loveliest gardens ever known. For the first time, in this book both the gardens Monet planted and the gardens as they have been lovingly restored by Gérald Van der Kemp are seen together. In his introduction Van der Kemp tells how he brought the badly neglected garden and house back to their original condition. The

restored gardens are beautifully photographed by Jena Barhto. In her fascinating essay, Claire Joyes captures Monet's vigor and great love of life, his temper and his famous cuisine. To accompany the essay the Monet family has contributed many period photographs of the irascible old master. The gardens inspired some of Monet's greatest painting -- the Water Lilies, (the Nymphaea) the Grand Allée. Seeing them side by side with the gardens as they are now and as they were is a great delight, and with Claire Joyes' text the book is an important aid in understanding Monet both as man and as painter. -- From publisher's description.

The Lost Universe Gene Weltfish, 1977-01-01 A fascinating insight into the life and culture of the Pawnee people is achieved here by the author's presentation of carefully gathered information in the form of a narrative of one year in Pawnee village. The first few chapters lay the groundwork of kinship lines, followed by a

narration of the life of one person in the village. Customs, ceremonies, beliefs, and hard work become apparent as the author leads one through the intricacies of the activities. Although it presents a great deal of detailed anthropological material, the manner of presentation turns the book into a readable account. . . . The book is based on years of first-hand study as well as scholarly research and is recommended as an in-depth study of Plains Indian life.—Reprint Bulletin-Book Reviews Gene Weltfish is coauthor, with Ruth Benedict, of *The Races of Mankind*. She is also the author of *The Origins of Art* and other books.
