**First Overland** Tim Slessor,2016-03-07 Why Not? After all, no-one had ever done it before. It would be one of the longest of all overland journeys – half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the deserts of Persia; a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were ‘just too many rivers and too few roads’. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work – wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them) ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore – to flash bulbs and champagne. Now, fifty years on, their book, ‘First Overland’, is republished – with a foreword by Sir David Attenborough. After all, it was he who gave them that film.

**Black Sea Affair** Don Brown, 2009-05-26 It's a mission that could bring the world to the brink of nuclear war. Now time is running out. It starts with a high-stakes theft: weapons-grade plutonium is stolen from Russia. The Russian army is about to attack Chechnya to get it back. But U.S. intelligence discovers that the stolen shipment is actually on a rogue Russian freighter in the Black Sea. It turns into a global nightmare: a secret mission gone awry; an American submarine commander arrested and hauled before a military tribunal in Moscow; and a game of brinksmanship so dangerous that war might be its only possible conclusion. As the U.S. Navy searches for weapons-grade plutonium that has been smuggled out of Russia by terrorists, a submarine mishap escalates the international crisis. With the world watching, JAG Officer Zack Brewer is called to Moscow to defend submarine skipper Pete Miranda and his entire crew. It is a heart-stopping race against the clock. With Russian missiles activated and programmed for American cities, Brewer stalls for time as the U.S. Navy frantically searches the high seas for a floating hydrogen bomb that could threaten New York Harbor.

*The Rejection of Consequentialism* Samuel Scheffler, 1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially

plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.
