First Overland Tim Slessor, 2016-03-07 Why Not? After all, no-one had ever done it before. It would be one of the longest of all overland journeys - half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the deserts of Persia; a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were 'just too many rivers and too few roads'. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work - wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them) ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore - to flash bulbs and champagne. Now, fifty years on, their book, 'First Overland', is republished - with a foreword by Sir David Attenborough. After all, it was he who gave them that film.

Physics for Students of Science and Engineering A. L. Stanford, J. M. Tanner, 2014-05-10 Transparencies to Accompany Physics for Students of Science and Engineering is a collection of 151 transparencies, illustrations, figures, and a table of moments of inertia of some common shapes that

students in physics, science or engineering will find useful in advancing their course. One type of figure concerns vectors, particularly a graphical addition of three vectors, a graphical representation of vector subtraction, and of a particle in uniform circular motion. The illustrations show the construction of a force diagram with the subject block in the force diagram represented as a particle at the origin of a rectangular coordinate system. Other illustrations include the construction of force diagrams for a two-body system and for a block moving down an inclined plane. The illustrations depict an object on a horizontal surface resting, resting with a small horizontal force applied, resting with a great horizontal force applied without moving the object, and moving at a constant velocity with a horizontal force applied. Another figure shows a section of a thin soap film with air on either side of the film, with the light reaching each surface of the film partly reflected and partly transmitted. Each surface in the diagram indicates the phase changes that occur upon reflection. Some examples of moments of inertia include those of a hoop, disk, uniform solid sphere, and a uniform long, thin rod. The book is an aid to students and to professors of physics, calculus, and related courses in science or engineering.

The Red Commissar Jaroslav Hasek, 2015-07-30 Jaroslav Hasek is best known for his satirical masterpiece The Good Soldier Svejk. That has been described as 'Perhaps the funniest novel ever written.' Although his life was short and chaotic, Hasek did however write more as this volume tellingly reveals. In his preface, Cecil Parrott, translator and biographer of Hasek, crisply defines its purpose.. 'All the world has heard of Svejk, but few are familiar with the countless other characters Hasek created in his stories and sketches, which together with his feuilletons and articles are though to number some twelve hundred. The best of these deserve to be made available to the Western public and are included in this volume.' The range is wide. There is a selection from his Bugulma stories (Hasek as Bolshevik and Red

Commissar), some early Svejtek stories, reminiscences of Hasek's apprenticeship days, and the hilariously funny speeches made by Hasek when promoting his political 'Party of Moderate Progress within the bounds of the Law'.

Sand Wolfgang Herrndorf, 2018-06-12 Set in the aftermath of the 1972 Munich Olympics massacre, this darkly sophisticated literary thriller by one of Germany's most celebrated writers is now available in the US for the first time. North Africa, 1972. While the world is reeling from the massacre of Israeli athletes at the Munich Olympics, a series of mysterious events is playing out in the Sahara. Four people are murdered in a hippie commune, a suitcase full of money disappears, and a pair of unenthusiastic detectives are assigned to investigate. In the midst of it all, a man with no memory tries to evade his armed pursuers. Who are they? What do they want from him? If he could just recall his own identity he might have a chance of working it out. . . . This darkly sophisticated literary thriller, the last novel Wolfgang Herrndorf completed before his untimely death in 2013, is, in the words of Michael Maar, "the greatest, grisliest, funniest, and wisest novel of the past decade." Certainly no reader will ever forget it.

Battle for Budapest Krisztián Ungváry, 2011-08-30 This title is presented with a new foreword by Istvan Deak. The battle of Budapest in the bleak winter of 1944-45 was one of the longest and bloodiest city sieges of World War II. From the appearance of the first Soviet tanks on the outskirts of the capital to the capture of Buda Castle, 102 days elapsed. In terms of human trauma, it comes second only to Stalingrad, comparisons to which were even being made by soldiers, both German and Soviet, fighting at the time. This definitive history covers their experiences, and those of the 800,000 non-combatants around whom the battle raged.

Chrysler's Turbine Car Steve Lehto, Jay Leno, 2010-10-01 Offering a behind-the-scenes look into the world of automotive research and development in the 1960s, this engaging narrative traces the birth of Chrysler's alternative "jet" car and reveals the story behind its sudden and mysterious demise. Relying on extensive research and firsthand accounts from surviving members of the turbine car program—including the metallurgist who created the exotic metals for the engine and the test driver who drove it at Chrysler's proving grounds—this chronicle documents the bold development of an automobile with a jet turbine engine. In addition to running well on virtually any flammable liquid—including kerosene, vodka, heating oil, and Chanel N°5 perfume—the pioneering engines had one fifth the number of moving parts and required less maintenance than conventional engines. Despite the fleet's amazing performance over millions of miles by test drivers, Chrysler pulled the plug on the project and crushed almost all of the cars. The reasons behind the surprising end to the jet car fleet are finally explained here.

Social Murder Wayne Michael Dunwell, 2023-03-31 "Ronni's mind fell completely silent. She stopped being aware of the room around her, there was only the hateful figure of a bully and an abuser ahead of her, all else was a blur." You're in a strange city. Your friend is missing. Could you find the courage to do what is necessary? Would you even know where to start? These are the questions faced by law graduate Ronni Wong when her friend Jenny disappears after a date with a man she met online. Finding evidence suggesting that Jenny's internet lover hides the darkest of secrets, Ronni is forced to embark on a journey through social media to discover the identity of a kidnapper, and then a dangerous race against time through the streets of Metro Manila to save her friend's life. The clock is ticking, can Ronni make it in time? Join Ronni as her investigation into one disappearance leads her into mortal danger. Social Murder will keep you on the edge of your seat, and at the same time challenge you to think about how you use social media. Are you safe online?

That Winter Pamela Gillilan, 1986 Pamela Gillilan was born in London in 1918, married in 1948 and moved to Cornwall in 1951. When she sat down to write her poem *Come Away* after the death of her husband David, she had written no poems for a quarter of a century. Then came a sequence of incredibly moving elegies. Other poems followed, and two years after starting to write again, she won the Cheltenham Festival poetry competition. Her first collection *That Winter* (Bloodaxe, 1986) was shortlisted for the Commonwealth Poetry Prize.

War on the Eastern Front James Lucas, 2014-10-30 This classic WWII history presents a comprehensive yet vividly detailed account of the Third Reich's epic and bitter clash with the Red Army. The opening onslaughts of Operation Barbarossa began on June 22nd, 1941, as German forces stormed into the Soviet Union. Few of them were to survive the five long years of bitter struggle. A posting to the Eastern Front during the Second World War was rightly regarded with dread by the German soldiers. They faced the unremitting hostility of the climate, the people and even, at times, their own leadership. There were epic conflicts, such as the battles of Stalingrad and Kursk. But surrounding these famous events was a daily war of attrition which ultimately ground Hitler's war machine to a halt. In this classic account, military historian James Lucas examines the Eastern Front from trench warfare to a bicycle-mounted antitank unit fighting against the oncoming Russian hordes. Told through the experiences of the German soldiers who endured these nightmarish years of warfare, *War on the Eastern Front* is a unique record of this cataclysmic campaign.
