Primary Documents Mário Pedrosa, 2015 The seventh release in an ambitious series of documentary anthologies published under the auspices of MoMA's International Program, this volume offers Anglophone readers an excellent introduction to the work of Mário Pedrosa (1900-81), one of Brazil's most influential art critics and social commentators. Organized in eight thematic groupings, the well-chosen, elegantly translated texts--most of which originally appeared in Brazilian newspapers--range in date from 1927 to 1981 and draw from Pedrosa's extensive writings on art, architecture, the role of criticism and the critic, and the politics of culture and from his professional and personal correspondence. Informative brief essays by critics and scholars, including some who knew and collaborated with Pedrosa, introduce the volume as a whole and preface each of the eight sections. Pedrosa's life and career are detailed in a chronology created by his grandson. This long-overdue volume makes an important contribution to the literature of modernism. -- Choice.

Food in Medieval Times Melitta Weiss Adamson, 2004-10-30 Students and other readers will learn about the common foodstuffs available, how and what they cooked, ate, and drank, what the regional cuisines were like, how the different classes entertained and celebrated, and what restrictions they followed for health and faith reasons. Fascinating information is provided, such as on imitation food, kitchen humor, and medical ideas. Many period recipes and quotations flesh out the narrative. The book draws on a variety of period sources, including as literature, account books, cookbooks, religious texts, archaeology, and art. Food was a status symbol then, and sumptuary laws defined what a person of a certain class could

eat—the ingredients and preparation of a dish and how it was eaten depended on a person's status, and most information is available on the upper crust rather than the masses. Equalizing factors might have been religious strictures and such diseases as the bubonic plague, all of which are detailed here.

The Cold War Konrad H. Jarausch, Christian Ostermann, Andreas Etges, 2017-02-06 The traces of the Cold War are still visible in many places all around the world. It is the topic of exhibits and new museums, of memorial days and historic sites, of documentaries and movies, of arts and culture. There are historical and political controversies, both nationally and internationally, about how the history of the Cold War should be told and taught, how it should be represented and remembered. While much has been written about the political history of the Cold War, the analysis of its memory and representation is just beginning. Bringing together a wide range of scholars, this volume describes and analyzes the cultural history and representation of the Cold War from an international perspective. That innovative approach focuses on master narratives of the Cold War, places of memory, public and private memorialization, popular culture, and schoolbooks. Due to its unique status as a center of Cold War confrontation and competition, Cold War memory in Berlin receives a special emphasis. With the friendly support of the Wilson Center.

Amour Fou André Breton, 1988-10-01 Mad Love has been acknowledged an undisputed classic of the surrealist movement since its first publication in France in 1937. Its adulation of love as both mystery and revelation places it in the most abiding of literary traditions, but its stormy history and technical difficulty

have prevented it from being translated into English until now. There has never been any forbidden fruit. Only temptation is divine, writes André Breton, leader of the surrealists in Paris in the 1920s and '30s. *Mad Love* is dedicated to defying the widespread opinion that love wears out, like the diamond, in its own dust. Celebrating breton's own love and lover, the book unveils the marvelous in everyday encounters and the hidden depths of ordinary things.

The Esoteric Secrets of Surrealism Patrick Lepetit, 2014-04-24 A profound understanding of the surrealists' connections with alchemists and secret societies and the hermetic aspirations revealed in their works • Explains how surrealist paintings and poems employed mythology, gnostic principles, tarot, voodoo, alchemy, and other hermetic sciences to seek out unexplored regions of the mind and recover lost "psychic" and magical powers • Provides many examples of esoteric influence in surrealism, such as how Picasso's *Demaiselles d'Avignon* was originally titled *The Bath of the Philosophers* Not merely an artistic or literary movement as many believe, the surrealists rejected the labels of artist and author bestowed upon them by outsiders, accepting instead the titles of magician, alchemist, or--in the case of Leonora Carrington and Remedios Varo--witch. Their paintings, poems, and other works were created to seek out unexplored regions of the mind and recover lost "psychic" and magical powers. They used creative expression as the vehicle to attain what André Breton called the "supreme point," the point at which all opposites cease to be perceived as contradictions. This supreme point is found at the heart of all esoteric doctrines, including the Great Work of alchemy, and enables communication with higher states of being. Drawing on an extensive range of writings by the surrealists and those in their circle of influence, Patrick Lepetit shows how the

surrealists employed mythology, gnostic principles, tarot, voodoo, and alchemy not simply as reference points but as significant elements of their ongoing investigations into the fundamental nature of consciousness. He provides many specific examples of esoteric influence among the surrealists, such as how Picasso's famous *Demoiselles d'Avignon* was originally titled *The Bath of the Philosophers*, how painter Victor Brauner drew from his father's spiritualist vocation as well as the Kabbalah and tarot, and how doctor and surrealist author Pierre Mabille was a Freemason focused on finding initiatory paths where "it is possible to feel a new system connecting man with the universe." Lepetit casts new light on the connection between key figures of the movement and the circle of adepts gathered around Fulcanelli. He also explores the relationship between surrealists and Freemasonry, Martinists, and the Elect Cohen as well as the Grail mythos and the Arthurian brotherhood.

Farewell to the Muse: Love, War and the Women of Surrealism Whitney Chadwick, 2017-11-14 A fascinating examination of the ambitions and friendships of a talented group of midcentury women artists Farewell to the Muse documents what it meant to be young, ambitious, and female in the context of an avant-garde movement defined by celebrated men whose backgrounds were often quite different from those of their younger lovers and companions. Focusing on the 1930s, 1940s, and 1950s, Whitney Chadwick charts five female friendships among the Surrealists to show how Surrealism, female friendship, and the experiences of war, loss, and trauma shaped individual women's transitions from someone else's muse to mature artists in their own right. Her vivid account includes the fascinating story of Claude Cahun and Suzanne Malherbe in occupied Jersey, as well as the experiences of Lee Miller and Valentine Penrose at the front line. Chadwick draws on personal correspondence between women, including the extraordinary letters between Leonora Carrington and Leonor Fini during the months following the arrest and imprisonment of Carrington's lover Max Ernst and the letter Frida Kahlo shared with her friend and lover Jacqueline Lamba years after it was written in the late 1930s. This history brings a new perspective to the political context of Surrealism as well as fresh insights on the vital importance of female friendship to its progress.

The Private Collection of Edgar Degas Julie A. Steiner, Metropolitan Museum of Art (New York, N.Y.), 1997 The art collection assembled by Edgar Degas was remarkable not only for its quality, size, and depth but also for its revelation of Degas's artistic affinities. He acquired great numbers of works by the nineteenth-century French masters Ingres, Delacroix, and Daumier; he bought (or bartered his own

pictures for) art by many of his contemporaries, particularly Manet, Cezanne, Gauguin, and Cassatt; and he acquired works by a wide range of other artists, from eminent to little known. The extent of Degas's holdings was not recognized until after his death, when the collection came up for auction in Paris in 1918 and, in what was called the sale of the century, was widely dispersed. Extensive research has made it possible to reassemble that collection in book form. This summary catalogue contains information on the more than five thousand works owned by Degas. For each work catalogued the entry includes, to the extent possible: a description with medium and dimensions; provenance information about Degas's acquisition and ownership of the work; information pertaining to the sale of the work in 1918 (or its disposal earlier), including the purchaser, purchase price, and other data; the current location; selected references; and an illustration. In a concordance, collection sale lot numbers are listed with their corresponding summary catalogue numbers. This catalogue and its companion volume of essays are published in conjunction with the exhibition *The Private Collection of Edgar Degas*, held at The Metropolitan Museum of Art, New York, from October 1, 1997, to January 11, 1998.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Cultural Practices and Infectious Crop Diseases Josef Palti, 2012-12-06 The development of a crop, and therefore its health, is always the result of interplay between biological and environmental factors, as influenced by human agency. In other words, crop health is a highly complex affair. This book is concerned with only one group of agents affecting crop health, the pathogens, and not with animal pests or direct effects of physiological or weather factors. Even within this one group, however, the interaction of causal

agents with environmental and biotic factors is highly complex. No less complex is the effect of cultural practices on the crop and its health. There is probably no major practice that does not affect diverse facets of crop growth, which in turn affects crop/pathogen relationships. Thus tillage sequentially affects depth and rate of root development, hence nutrient uptake, hence general plant size and habit as well as crop climate and crop susceptibility. Irrigation affects all these parameters, and facilitates crop growth under diverse macro climatic conditions, with all the ensuing implications for disease development. In this book an attempt is made to superimpose one set of complexities, the cultural practices, on another such set, crop health. This may seem overambitious, not to say foolhardy, unless we remember that it has been done by farmers, consciously or unconsciously, ever since the beginnings of agriculture. We are here chiefly trying to rationalize traditional practices, review modern research on the development of further practices, and assess the place of the latter in integrated disease control.
