What Cars Say Rachael Alfonso,2020-03-10

Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles National Research Council,Division on Engineering and Physical Sciences,Board on Energy and Environmental Systems,Committee on the Assessment of Technologies for Improving Fuel Economy of Light-Duty Vehicles, Phase 2,2015-09-28 The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and

aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. **Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles** estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.

A Different Kind of Life Virginia Williams, 2017-07-28 In 1986, racing car constructor Frank Williams' life was turned upside down when a crash left him quadriplegic. For his wife, Ginny, the accident meant becoming head of the household while also struggling to overcome grief and anger. In this memoir, she tells her story with honesty and humor, set against the backdrop of Formula One racing.

Design Between the Lines Patrick Le Quément,2019-08-28 The car industry and the way in which cars are created have changed beyond all recognition over the last half-century. Automotive styling was once the grudging afterthought when the engineers had finished their work. Now, following a short flirtation with exotic Italian design houses, it has evolved into sophisticated design carried out by multitalented in-house teams honing carefully crafted brand identities. One of the visionary designers at the forefront of that revolution has been Patrick le Quément. Most widely acclaimed for his 22 years in charge of Renault Design, resulting in such standout models as the Twingo, Scénic and Avantime, le Quément has enjoyed a 50-year career

that has also taken in Simca, Ford and Volkswagen-Audi. In his foreword to the book, Stephen Bayley calls le Quément 'perhaps the very most original designer working in the conservative car business at the turn of the millennium'. Some 60 million cars across the world now bear the unmistakable stamp of le Quément. Design: Between the Lines is not a straightforward autobiography; rather, le Quément charts his journey through five decades of thoughts, actions, failures and successes. He offers fascinating commentaries on design and the creative process, and on some of the extraordinary automotive brands that make up our shared cultural heritage. As Bayley notes, for le Quément, design is 'as much a matter of thinking as a matter of drawing'. On a broader, more philosophical level, le Quément also shares his views about life in general and that remarkable contraption called 'the automobile', which has so influenced the lives of millions of people the world over from the late 1800s to the present day. Presented as a series of 50 brief essays or 'perspectives', le Quément's thoughtful and astute observations from the street, from the design studio and from his seat in the boardroom give the reader a penetrating and often amusing insight into the high-level workings of a global industry, its triumphs and tragedies, and the foibles of the decision-makers responsible for running it. A lively complementary text by the automotive journalist Stéphane Geffray accompanies each of le Quément's perspectives, and illustrations are provided by the automobile designer Gernot Bracht. Design: Between the Lines will appeal to all motoring fans and enthusiasts of good design. As Chris Bangle, the former Director of BMW Design, remarks: 'Few car designers have had a career so filled with innovative successes that they have inspired a whole industry; fewer still have the skills to share it. Engaging and revealing, Patrick relates his personal experience and deep knowledge of car design in a very enjoyable manner.'

Strategic Management Gregory G. Dess,G. T. Tom Lumpkin,Alan Eisner,2005 Strategic Management: Text and Cases, 2nd Edition, by Dess/Lumpkin/Eisner is both readable and rigorous - written for today's student. A rocket-ship in its first edition, the revision continues to provide solid treatment of traditional topics in strategic management, as well as contemporary topics like entrepreneurship, knowledge management, and internet strategies. The prestigious author team understands the importance of thorough, modern concepts illustrated by rich, relevant and teachable cases. The new case selections emphasize variety, currency, and familiar company names. The cases are up-to-date in terms of both financial data and strategic issues. This group of cases gives both instructors and students unparalleled quality and variety. Based on consistent reviewer feedback, these selections combine comprehensive and shorter length cases about well known companies.
