Tony Judt

The Great Transformation Karl Polanyi,2024-06-20 Tracing the history of capitalism in England and beyond, Karl Polanyi's landmark 1944 classic brilliantly exposed the myth of laissez-faire economics. From the great transformation that occurred during the industrial revolution onwards, he showed, there has been nothing 'natural' about the market state. Instead, the economy must always be embedded in society, and human needs and relations. Witnessing the 'avalanche of social dislocation' of his time - from the Great Depression, to the rise of fascism and communism and the First and Second World Wars - Polanyi ends with a rallying cry for freedom, and a passionate vision to protect our common humanity.

Postwar Tony Judt,2006-09-05 Finalist for the Pulitzer Prize • Winner of the Council on Foreign Relations Arthur Ross Book Award • One of the New York Times' Ten Best Books of the Year “Impressive . . . Mr. Judt writes with enormous authority.” —The Wall Street Journal “Magisterial . . . It is, without a doubt, the most comprehensive, authoritative, and yes, readable postwar history.” —The Boston Globe Almost a decade in the making, this much-anticipated grand history of postwar Europe from one of the world's most esteemed historians and intellectuals is a singular achievement. Postwar is the first modern history that covers all of Europe, both east and west, drawing on research in six languages to sweep readers through thirty-four nations and sixty years of political and cultural change-all in one integrated, enthralling narrative. Both intellectually ambitious and compelling to read, thrilling in its scope and delightful in its small details, Postwar is a rare joy. Judt's book, Ill Fares the Land, republished in 2021 featuring a new preface by bestselling author of Between the World and Me and The Water Dancer, Ta-Nehisi Coates.

Rise and Kill First Ronen Bergman,2018-01-30 NEW YORK TIMES BESTSELLER • The first definitive history of the Mossad, Shin Bet, and the IDF’s targeted killing programs, hailed by The New York Times as “an exceptional work, a humane book about an incendiary subject.” WINNER OF THE NATIONAL JEWISH BOOK AWARD IN HISTORY NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY JENNIFER SZALAI, THE NEW YORK TIMES NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Economist • The New York Times Book Review • BBC History Magazine • Mother Jones • Kirkus Reviews The Talmud says: “If someone comes to kill you, rise up and kill him first.” This instinct to take every measure, even the most aggressive, to defend the Jewish people is hardwired into Israel’s DNA. From the very beginning of its statehood in 1948, protecting the nation from harm has been the responsibility of its intelligence community and armed services, and there is one weapon in their vast arsenal that they have relied upon to thwart the most serious threats: Targeted assassinations have been used countless times, on enemies large and small, sometimes in response to attacks against the Israeli people and sometimes preemptively. In this page-turning, eye-opening book, journalist and military analyst Ronen Bergman—praised by David Remnick as “arguably [Israel’s] best investigative reporter”—offers a riveting inside account of the targeted killing programs: their successes, their failures, and the moral and political price exacted on the men and women who approved and carried out the missions. Bergman has gained the exceedingly rare cooperation of many current and former members of the Israeli government, including Prime Ministers Shimon Peres, Ehud Barak, Ariel Sharon, and Benjamin Netanyahu, as well as high-level figures in the country’s military and intelligence services: the IDF (Israel Defense Forces), the Mossad (the world’s most feared intelligence agency), Caesarea (a “Mossad within the Mossad” that carries out attacks on the highest-value targets), and the Shin Bet (an internal security service that implemented the largest targeted assassination campaign ever, in order to stop what had once appeared to be unstoppable: suicide terrorism). Including never-before-reported, behind-the-curtain accounts of key operations, and based on hundreds of on-the-record interviews and thousands of files to which Bergman has gotten exclusive access over his decades of reporting, Rise and Kill First brings us deep into the heart of Israel’s most secret activities. Bergman traces, from statehood to the present, the gripping events and thorny ethical questions underlying Israel’s targeted killing campaign, which has shaped the Israeli nation, the Middle East, and the entire world. “A remarkable feat of fearless and responsible reporting . . . important, timely, and informative.”—John le Carré

Racial Folly Gordon Briscoe,2010-02-01 Briscoe's grandmother remembered stories about the first white men coming to the Northern Territory. This extraordinary memoir shows us the history of an Aboriginal family who lived under the race laws, practices and policies of Australia in the twentieth century. It tells the story of a people trapped in ideological folly spawned to solve 'the half-caste problem'. It gives life to those generations of Aboriginal people assumed to have no history and whose past labels them only as shadowy figures. Briscoe's enthralling narrative combines his, and his contemporaries, institutional and family life with a high-level career at the heart of the Aboriginal political movement at its most dynamic time. It also documents the road he travelled as a seventeen year old fireman on the South Australia Railways to becoming the first Aboriginal person to achieve a PhD in history.

Granite Mountain Brendan McDonough,2016-05-03 The true story behind the events that inspired the major motion picture Only the Brave. A unique and bracing (Booklist) first-person account by the sole survivor of Arizona's disastrous 2013 Yarnell Hill Fire, which took the lives of 19 hotshots--firefighters trained specifically to battle wildfires. Brendan McDonough was on the verge of becoming a hopeless, inveterate heroin addict when he, for the sake of his young daughter, decided to turn his life around. He enlisted in the Granite Mountain Hotshots, a team of elite firefighters based in Prescott, Arizona. Their leader, Eric Marsh, was in a desperate crunch after four hotshots left the unit, and perhaps seeing a glimmer of promise in the skinny would-be recruit, he took a chance on the unlikely McDonough, and the chance paid off. Despite the crew's skepticism, and thanks in large part to Marsh's firm but loving encouragement, McDonough unlocked a latent drive and dedication, going on to successfully battle a number of blazes and eventually win the confidence of the men he came to call his brothers. Then, on June 30, 2013, while McDonough--Donut as he'd been dubbed by his team--served as lookout, they confronted a freak, 3,000-degree inferno in nearby Yarnell, Arizona. The relentless firestorm ultimately trapped his hotshot brothers, tragically killing all 19 of them within minutes. Nationwide, it was the greatest loss of firefighter lives since the 9/11 attacks. Granite Mountain is a gripping memoir that traces McDonough's story of finding his way out of the dead end of drugs, finding his purpose among the Granite Mountain Hotshots, and the minute-by-minute account of the fateful day he lost the very men who had saved him. A harrowing and redemptive tale of resilience in the face of tragedy, Granite Mountain is also a powerful reminder of the heroism of the people who put themselves in harm's way to protect us every day.

Deception in War Jon Latimer, 2003-04-29 From the Trojan Horse to Gulf War subterfuge, this far-reaching military history examines the importance and ingenuity of wartime deception campaigns. The art of military deception is as old as the art of war. This fascinating account of the practice draws on conflicts from around the world and across millennia. The examples stretch from the very beginnings of recorded military history—Pharaoh Ramses II's campaign against the Hittites in 1294 B.C.—to modern times, when technology has placed a stunning array of devices into the arsenals of military commanders. Military historians often underestimate the importance of deception in warfare. This book is the first to fully describe its value. Jon Latimer demonstrates how simple tricks have been devastatingly effective. He also explores how technology has increased the range and subtlety of what is possible—including bogus radio traffic, virtual images, even false smells. Deception in War includes examples from land, sea, and air to show how great commanders have always had, as Winston Churchill put it, that indispensable “element of legerdemain, an original and sinister touch, which leaves the enemy puzzled as well as beaten.”

Good Public Governance in a Global Pandemic Paul Joyce, 2020-12-05 This book provides the readers with a set of vivid studies of the variety of national approaches that were taken to responding to COVID-19 in the first few

months of the pandemic. At its core is a series of reports addressing the national responses to COVID-19 in Africa, Asia, Europe, North America, Latin America, and the Middle East and North Africa. Country reports present the actions, events and circumstances of governmental response and make an early attempt at producing insights and at distilling lessons. Eyewitness reports from civil servants and public managers contain practical points of view on the challenges of the coronavirus pandemic. In different chapters, editors and contributors provide an analytical framework for the description and explanation of government measures and their consequences in a rich variety and diversity of national settings. They also situate the governmental responses to the pandemic in the context of the global governance agenda, stress the important relationship between governmental authorities and citizens, and emphasize the role of ideological factors in the government response to COVID-19. A bold attempt is made in the concluding chapter to model government strategies for managing the emergency of the pandemic and the consequences for trajectories of infection and mortality. As the editors argue, the principles of good governance are of relevance to countries everywhere. There was evidence of them in action on the COVID-19 pandemic all over the world, in a wide range of institutional settings. COVID-19 experiences have a lot to teach us about the governance capabilities that will be needed when future emergency situations occur, emergencies that might be created by pandemics or climate change, or various other global risks. Governments will need to be agile, able to learn in real time, good at evaluating evidence in fast changing and complex situations, and good at facilitating coordination across the whole-of-government and in partnership with citizens and the private sector. Paul Joyce is an Associate at the Institute of Local Government Studies, University of Birmingham, Visiting Professor at Leeds University, and Director of Publications at IIAS. Fabienne Maron is Guest Lecturer at Université de Reims Champagne Ardenne (URCA) and Scientific Director at IIAS. Purshottama Sivanarain Reddy is Senior Professor at University of KwaZulu-Natal, Vice-President for Programmes of IASIA and Chairperson of the Scientific Committee (PRAC) of IIAS. The International Institute of Administrative Sciences (IIAS) is a learned society in public administration established in 1930 and headquartered in Brussels. The Public Governance Series aims at diffusing the scientific knowledge it produces.
