Roger Freeman

Lavochkin Fighters of the Second World War Jason Moore ,2017-03-13 The Lavochkin fighters remain little known in the West, although with the Yakovlev fighter series they were the backbone of the Red Air Force fighter force during the Second World War. The author rectifies that with this comprehensive history of these fighters. With this book he describes in great detail the three main variants of the Lavochkin fighter series during the Second World War: the only partially successful LaGG-3 inline-engined fighter, the successful radial-engined La-5 fighter, and the superb radial engined La-7 fighter, one of the best piston-engined fighter aircraft of the entire Second World War. Both the design and history of these fighters are featured, including how the mediocre inline engined LaGG-3 was turned into a top notch fighter by the replacement of the Klimov inline engine by the Shvetsov M-82 radial engine. Besides describing the wartime designs he includes a section on the postwar successors to the Second World War fighters, the completely new all metal La-9 and La-11, which saw extensive postwar service. Accurate color profiles illustrate all variants.

The Lavochkin La-7 Dariusz Paduch,2022-09-30 La-7 Soviet single-engine, single-seat fighter aircraft of the World War II period. Developed in the design bureau of S. A. Lavochkin as a successor to the La-5FN aircraft. The La-7 was a development of the La-5 design. Both the sizes and shapes of the two aircraft models differed slightly.

F-35b V2. 0 Glenn Hoover,2018-10-27 This book contains detailed instructions on building the F-35B Lightning II 1/48 scale model aircraft from Kitty Hawk. This book covers VERSION 2.0 of the model. If the box on your model kit does not say Version 2.0 then you need my other book for the initial version. A spiral bound version is also available on my website. (glennhoovermodels.com) The F-35 Fighter Aircraft has three versions. The F-35A is for the Air Force. The F-35C is for the Navy and has a longer wingspan that can fold for carrier operations. The F-35B is for the Marines and can perform vertical takeoffs and landings. The F-35B Model is the most complex if you want to display its VSTOL capability that has many open access panels. I take the model kit instructions from Kitty Hawk and break them up into individual steps. I reorder the steps so that the small pieces (antennas, etc.) are assembled last which reduces the risk of damage when building the model. The steps are organized to insert the paint and decal steps in the best spot. This book provides a little history of the F-35B, photos of the model kit contents including the photo etch frets, a detailed list of tools that I used to build this model, along with a list of paints. The actual instruction section contains 649 steps that tells you what to dry fit, glue, and/or paint for each individual piece. Each step instruction shows the source (section) along with a block for you to mark that you completed the step. If the last column contains an X, that means there's a photo in the back with more details about the step. The major instruction sequence for this model is 1. Ejection Seat & Ladder (Build) 2. Instrument Panels 3. Nose Gear Wheel Well 4. Engine 5. Engine Exhaust Nozzle (Build) 6. Main Landing Gear Wheel Wells 7. Lower Lift Fan Intake 8. Fuselage and Wings Assembly, Paint, and Decals 9. Internal Weapons 10. Nose and Main Landing Gear 11. Engine Exhaust Nozzle (Install) 12. Doors (Flare/Chaff, Engine Exhaust, Weapons Bay) 13. Doors (Nose and Main Landing Gear) 14. External Missiles 15. Vent and Lift Fan Doors (Top) 16. Tails (Decals) 17. Speed Brake and Antenna 18. Cockpit Detail 19. Ejection Seat (Install) 20. Canopy, Pitot Tubes, & Ladder I provide an index of the individual sprue parts that show where in the book the part is mentioned. This index was a great way to make sure that no pieces were overlooked. Finally, there are several pages of in-process photos with assembly tips and the final photos of my build. This book is a great checklist to make your build go smoothly. Of course, you can feel free to use different tools, paint, weathering, etc. or even add your own diorama. It took me several weeks write the first cut of this book then another 2 months to do the actual build to test my instructions. I make tweaks to improve the instructions and add the photos. I did a lot of research and didn't see anything this detailed about a model build. Most articles or videos concentrate on parts of their build or just give a summary review. I wanted to go down to the piece level and take you thru the whole build. This is a nice tool. If you have this F-35B V2 model kit and get this book, you can dive right into the build with confidence. See a 16 page sample along with photos of finished models and other books at glennhoovermodels.com.

The Lavochkin La-5 Family In Profile & Scale Erik Pilawskii,2021-05-04

Lavochkin La-5 In Profile & Scale Erik Pilawskii,2017-09-28 Volume no.3 of the Profile & Scale series details the Lavochkin La-5 family of fighters as never seen before. One hundred La-5 examples are faithfully documented in full-colour profile. Moreover, the work contains many pages of original, never previously published 1:48 scale line drawings of the entire La-5 family. These line drawings are the culmination of nearly 25 years' dedicated work on the La-5, and should present the most complete, accurate and illuminating scale work regarding the aircraft at the present time. The book presents many production, development and detail facts about the La-5 family, some never before illustrated. A guide is included to explain the curious Gor'ki Type naming system, as well as diagrams and text detailing Gor'ki camouflage.

Lawoczkin La-5 Vol.II Dariusz Paduch,2022-06-30 The La-5 is a Soviet single-engine single-seat fighter from World War II. The plane was developed in the S.A. design office. Lavochkin as a development version and successor of the LaGG-3, a wooden low wing with an in-line engine. It was one of the best fighter planes of the Soviet aviation and the first to compete on an equal footing with the German Messerschmitt Bf 109.

La 5/7 Fighters in Action Hans-Heiri Stapfer,1998 Beskrivelse af La-5/7 konstrueret af Semyon Alekseevich Lavochkin som nogle af de vigtigste russiske jagerfly under 2. verdenskrig.

MIG Alley: The Fight For Air Superiority [Illustrated Edition] William Y'Blood,2014-08-15 Includes more than 20 photo illustrations The fight for air superiority began the day the Korean War started and only ended with the armistice three years later. Once the shock of the North Koreans' invasion wore off, it did not take long for the United States Air Force, assisted by other United Nations air forces, to destroy the North Korean Air Force. The arrival of the MiG-15 in November 1950, often flown by Soviet pilots, changed things considerably however. For the remainder of the war, bitterly contested air battles were fought almost daily. Yet despite a decided numerical superiority in jet fighters, the Communists were never able to gain air superiority, testament to the skill and training of the UN fighter pilots, primarily those U.S. Air Force airmen flying the magnificent F-86 Sabre.

Korean War Aces Robert F Dorr,2013-01-20 The first virtually all-jet war, the conflict in Korea saw F-86 Sabres of the USAF take on MiG-15s of the North Korean and Chinese air forces. Although the Allied pilots were initially taken aback by the ability of the communist fighter in combat, sound training and skilful leadership soon enabled Sabre pilots to dominate the dogfights over the Yalu River. In all 39 F-86 pilots achieved ace status, and a number of these are profiled in this volume, as are notable pilots from the US Navy, Marine Corps and Royal Navy and, for the first time, the handful of MiG-15 aces.

Fundamentals of Aircraft and Rocket Propulsion Ahmed F. El-Sayed,2016-05-25 This book provides a comprehensive basics-to-advanced course in an aero-thermal science vital to the design of engines for either type of craft. The text classifies engines powering aircraft and single/multi-stage rockets, and derives performance parameters for both from basic aerodynamics and thermodynamics laws. Each type of engine is analyzed for optimum performance goals, and mission-appropriate engines selection is explained. Fundamentals of Aircraft and Rocket Propulsion provides information about and analyses of: thermodynamic cycles of shaft engines (piston, turboprop, turboshaft and propfan); jet engines (pulsejet, pulse detonation engine, ramjet, scramjet, turbojet and turbofan); chemical and non-chemical rocket engines; conceptual design of modular rocket engines (combustor, nozzle and turbopumps); and conceptual design of different modules of aero-engines in their design and off-design state. Aimed at graduate and final-year undergraduate students, this textbook provides a thorough grounding in the history and classification of both aircraft and rocket engines, important design features of all the engines detailed, and particular consideration of special aircraft such as unmanned aerial and short/vertical takeoff and landing aircraft. End-of-chapter exercises make this a valuable student resource, and the provision of a downloadable solutions manual will be of further benefit for course instructors.

Energiya-Buran Bart Hendrickx,Bert Vis,2007-12-05 This absorbing book describes the long development of the Soviet space shuttle system, its infrastructure and the space agency's plans to

follow up the first historic unmanned mission. The book includes comparisons with the American shuttle system and offers accounts of the Soviet test pilots chosen for training to fly the system, and the operational, political and engineering problems that finally sealed the fate of Buran and ultimately of NASA's Shuttle fleet.

Tupolev Tu-16 Badger Yefim Gordon, Vladimir Rigmant, 2004-06-21 The establishment of NATO posed the need for the Soviet war machine to create a fast jet bomber capable of reaching targets throughout Western Europe and combatting the carrier task forces with which the US Navy could throw its weight around the world. The basic Tu-16 which first flew in the mid-1950s was developed into nearly 50 versions adopted for various roles, including nuclear-capable bombers, anti-shipping missile strike aircraft, torpedo-bombers and minelayers, numerous reconnaissance and ECM variants, assorted development aircraft for testing new engines, avionics and systems. The Tu-16 even found civil uses as a fast mailplane and a weather research/rainmaking aircraft! The Badger, as the bomber was known to the West, served as the basis for the Soviet Union's first jet airliner, the Tu-104. The nearly 1,500 Tu-16s built in the Soviet Union were an important factor in preventing all-out military confrontation between the East and the West. Since the mid-1950s and until the 1980s the Badger has been a regular picture on the pages of the Western press, snooping around Western naval groups every now and then. The type also had its share of 'hot' wars, getting its baptism of fire in the Six-Day War of 1967. Apart from three factories in the USSR, the Tu-16 was built under license in China as the H-6 and remains in service with the People's Liberation Army Air Force. Other foreign users were Egypt, Indonesia and Iraq. All known versions are described and a full account is given of the Tu-16's operational career in the USSR and abroad during the Cold War and in the days after that when many of the surviving Badgers were used as target drones. The book features many previously unpublished photos and a detailed production list.

The Spy Who Changed History Svetlana Lokhova, 2019-10-01 On a sunny September day in 1931, Soviet spy Stanislav Shumovsky walked down the gangplank of the SS Europa and into New York, concealed in a group of 65 Soviet students. Joseph Stalin had sent him to acquire American secrets to help close the USSR's yawning technology gap, and the road to victory began in the classrooms and laboratories of MIT. Using information gleaned from this mission, the USSR first transformed itself into a military powerhouse able to defeat Nazi Germany. Then in 1947, American innovation exfiltrated by Shumovsky made it possible to build and unveil the most advanced strategic bomber in the world. Later, other MIT-trained Soviet spies would go on to acquire the secrets of the Manhattan Project. In this thrilling history, Svetlana Lokhova takes the reader on a journey through Stalin's most audacious intelligence operation, piecing together every aspect of Shumovsky's life and character using information derived from American and Russian archives.

The Chief Culprit Viktor Suvorov, 2013-03-15 Bestselling author Victor Suvorov probes newly released Soviet documents and reevaluates existing material to analyze Stalin's strategic design to conquer Europe and the reasons behind his controversial support for Nazi Germany. A former Soviet army intelligence officer, the author explains that Stalin's strategy leading up to World War II grew from Vladimir Lenin's belief that if World War I did not ignite the worldwide Communist revolution, then a second world war would be needed to achieve it. Stalin saw Nazi Germany as the power that would fight and weaken capitalist countries so that Soviet armies could then sweep across Europe. Suvorov reveals how Stalin conspired with German leaders to bypass the Versailles Treaty, which forbade German rearmament, and secretly trained German engineers and officers and provided bases and factories for war. He also calls attention to the 1939 nonaggression pact between the Soviet Union and Germany that allowed Hitler to proceed with his plans to invade Poland, fomenting war in Europe. Suvorov debunks the theory that Stalin was duped by Hitler and that the Soviet Union was a victim of Nazi aggression. Instead, he makes the case that Stalin neither feared Hitler nor mistakenly trusted him. Suvorov maintains that after Germany occupied Poland, defeated France, and started to prepare for an invasion of Great Britain, Hitler's intelligence services detected the Soviet Union's preparations for a major war against Germany. This detection, he argues, led to Germany's preemptive war plan and the launch of an invasion of the USSR. Stalin emerges from the pages of this

book as a diabolical genius consumed by visions of a worldwide Communist revolution at any cost—a leader who wooed Hitler and Germany in his own effort to conquer the world. In contradicting traditional theories about Soviet planning, the book is certain to provoke debate among historians throughout the world.

European-Russian Space Cooperation Brian Harvey, 2021-04-10 The story of European-Russian collaboration in space is little known and its importance all too often understated. Because France was the principal interlocutor between these nations, such cooperation did not receive the attention it deserved in English-language literature. This book rectifies that history, showing how Russia and Europe forged a successful partnership that has continued to the present day. Space writer Brian Harvey provides an in-depth picture of how this European-Russian relationship evolved and what factors—scientific, political and industrial—propelled it over the decades. The history begins in the cold war period with the first collaborative ventures between the Soviet Union and European countries, primarily France, followed later by Germany and other European countries. Next, the chapters turn to the missions when European astronauts flew to Russian space stations, the Soyuz rocket made a new home in European territory in the South American jungle and science missions were flown to study deep space. Their climax is the joint mission to explore Mars, called ExoMars, which has already sent a mission to Mars. Through this close examination of these European-Russian efforts, readers will appreciate an altogether new perspective on the history of space exploration, no longer defined by competition, but rather by collaboration and cooperation.

56th Fighter Group Roger Freeman, 2012-09-20 One of the first Thunderbolt groups to see action in the European Theatre of Operations (ETO) with the US Army Air Forces, the 56th Fighter Group (FG) was also the only fighter unit within the Eighth Air Force to remain equipped with the mighty P-47 until war's end. Led by the inspirational 'Hub' Zemke, this group was responsible for devising many of the bomber escort tactics employed by VIII Fighter Command between 1943 and 1945. By VE-Day the 56th FG had shot down 100 more enemy aircraft than any other group in the Eighth Air Force, its pilots being credited with 677 kills during 447 missions. The exploits of this elite fighter unit are detailed in this volume together with photographs, their aircraft profiles and insignia.

Hidden Tibet Sergius L. Kuzmin, 2011-01-01 This book traces the history of Tibetan statehood from ancient times to our days, describes the life of the Tibetans at the times of Feudalism and Socialism, the coercive inclusion of Tibet into People's Republic of China, the suppression of the national liberation movement, the Cultural Revolution, and subsequent reforms. Many pictures and data concerning these events are being published for the first time.

The First Team John Lundstrom, 2013-04-11 Hailed as one of the finest examples of aviation research, this comprehensive 1984 study presents a detailed and scrupulously accurate operational history of carrier-based air warfare. From the earliest operations in the Pacific through the decisive Battle of Midway, it offers a narrative account of how ace fighter pilots like Jimmy Thach and Butch O'Hare and their skilled VF squadron mates - called the first team - amassed a remarkable combat record in the face of desperate odds. Tapping both American and Japanese sources, historian John B. Lundstrom reconstructs every significant action and places these extraordinary fighters within the context of overall carrier operations. He writes from the viewpoint of the pilots themselves, after interviewing some fifty airmen from each side, to give readers intimate details of some of the most exciting aerial engagements of the war. At the same time he assesses the role the fighter squadrons played in key actions and shows how innovations in fighter tactics and gunnery techniques were a primary reason for the reversal of American fortunes. After more than twenty years in print, the book remains the definitive account and is being published in paperback for the first time to reach an even larger audience.

The Woes of Young Rennslauer Eulis S. Morgan, 2014-06-09 A teenager accidentally becomes a vampire slayer.

Spitfire VC vs A6M2/3 Zero-sen Peter Ingman, 2019-05-30 Just weeks after Pearl Harbor, Darwin was mauled by a massive Japanese attack. Without a single fighter to defend Australian soil, the Australian government made a special appeal to Britain for Spitfires. A year later the Spitfire VC-

equipped No 1 Fighter Wing, RAAF, faced the battle-hardened 202nd Kokutai of the IJNAF, equipped with A6M2 Zero-sens, over Darwin. This was a gruelling campaign between evenly matched foes, fought in isolation from the main South Pacific battlegrounds. Pilots on either side had significant combat experience, including a number of Battle of Britain veterans. The Spitfire had superior flight characteristics but was hampered by short range and material defects in the tropical conditions, while the Japanese employed better tactics and combat doctrine inflicting serious losses on the over-confident Commonwealth forces. Fully illustrated with detailed full-colour artwork, this is the gripping story of two iconic aircraft facing off against each other above Australia.
