## **Radioman** Carol Edgemon Hipperson, 2008-10-28

Radioman is the biography of Ray Daves, a noncommissioned officer in the U.S. Navy and an eyewitness to World War II. It is based on the author's handwritten notes from a series of interviews that began on the eighty-second birthday of the combat veteran and gives a first-person account of the world's first battles

between aircraft carriers. Ray Daves grew up on a small farm near Little Rock, Arkansas. Impatient with school and the prospect of becoming a farmer like his father, he joined the CCC and went from there to the navy, where he learned to use the radio to send messages, and soon found himself in the momentary peacefulness of Pearl Harbor. Most of America's World War II veterans were not in uniform when the war began. Daves is one of the few who was. He could also tell what was happening on the bridge of the famous carrier Yorktown before it went down and of the secretive relationship between the Russian and American forces in Alaska at the time. Carol Edgemon Hipperson's discovery of this one man's inspiring story is shared with great skill and energy. A must-read for those looking for a personal, intimate account of the events of this tumultuous time in American history.

*Fireman, Fire Department* National Learning Corporation, 2016 The Fireman, Fire Department Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: judgment in fire fighting situations; advising and interacting with others; using logical reasoning to draw valid conclusions; understanding and interpreting written material; mechanical reasoning; spatial orientation and visual memory; and more.

*Eaglewall's Table Top Navy* Donald D. Hood, 2011-04-01 The first in depth study of the

Eagle 1:1200 scale plastic model warships produced by Eaglowall Plastics, LTD, Eaglowall's Table Top Navy explores the birth, growth, and death of the legendary model company. The book covers the history of the company, the tie-in with the Eagle magazine, related producers such as the American company Pyro, and probes the mysterious fate of the Eagle molds. The detailed lists of models produced and variations are essential to any Eaglowall collector. This hard cover book is illustrated with over 100 full color images with example of Eagle artwork, advertisements, completed kits, and kit parts.

British Battleships of World War One R. A. Burt, 2012-11-15 This new edition of a classic work on British battleships is the most sought after book on the subject. Containing many new photographs from the author's exhaustive collection this superb reference book presents the complete technical history of British capital ship design and construction during the dreadnought era. Beginning with Dreadnought, all of the fifty dreadnoughts, 'super-dreadnoughts' and battlecruisers that served the Royal Navy during this era are described and superbly illustrated with photographs and line drawings.

*U. S. Aircraft Carriers* Norman Friedman, 2022 U.S. Aircraft Carriers Revised Edition is one of the most comprehensive references available on the entire development of U.S. Aircraft Carriers, starting in 1920, with USS Langley CV-1, continuing to Enterprise, the mass-produced Essex-class, and the large Midway-class of post-World War II. Friedman authoritatively analyzes the

design and performance histories of this popular type. The long careers of the Nimitz-class and the new Ford-class are also included. Like Friedman's other design history books, *U.S. Aircraft Carriers* is based largely on formerly classified internal U.S. Navy records--

U.S. Amphibious Ships and Craft Norman Friedman, 2002 In this latest addition to his acclaimed U.S. warship design history series, Norman Friedman describes the ships and the craft of the U.S. amphibious force, from its inception in the 1920s through World War II to the present. He explains how and why the United States successfully created an entirely new kind of fleet to fight and win such World War II battles as D-Day and the island landings in the Pacific. To an extent not previously documented, his book lays out the differing views and contributions of the U.S. Army, Navy, and Marines as well as the British, and how they affected the development of prewar and wartime amphibious forces. Current and future amphibious forces and tactics are explained, together with their implications for ships and craft, from 40,000-ton amphibious carriers down to tracked amphibious vehicles. As in earlier volumes in the series, this study uses previously unpublished sources to illustrate not only what was actually built but what was planned and never brought into service. For example, the book offers the first comprehensive and fully illustrated account of abortive attempts in the 1960s and beyond to build new fire support ships (LFS). With nearly two hundred photographs and specially commissioned line drawings and extensive

appendixes, the work conveniently brings together details of the ships and their service histories found elsewhere only in scattered official references.

Haiti Ron Haviv, Simon Winchester, 2010-06 A unique, arresting and versatile document of the traumatic earthquake which hit Haiti in 2010 and its aftermath. Encased in a cardboard box, the project comprises 16 unbound posters and a map page which draws attention to the epicentre and its rippling impact on the population of the island. The unique format allows the viewer to absorb each page individually or to hang the entire project. The visual testimony to the events of the the first days after the event are provided by award-winning photographer Ron Haviv and the essay by esteemed writer Simon Winchester.

**Miniature Ship Models** Paul Jacobs, 2008-05-30 This book is the first comprehensive history of how the 1:1200 scale and its 1:1250 continental equivalent became accepted as the modern standard for miniature ship models. The origins can be traced back to the first years of the twentieth century and their use as identification aids by the military during the First World War, but when peace came the manufacturers aimed their increasingly sophisticated products at collectors, and acquiring, modifying or scratch-building miniature ship models has been an avidly pursued hobby ever since. This book charts the commercial rise and fall of the manufacturers, and the advancing technology that produces ever more detailed and accurate replicas. The author - himself a lifetime collector and builder of models

- looks at the products of each manufacturer, past and present, rating their quality and suggesting why some are regarded as more collectible than others. But the book deals with more than off-the-shelf models, covering subsidiary issues like painting, modifying and diorama settings, and is illustrated throughout with many of the finest examples of the genre. The combination of fascinating background information with stunning visual presentation will make this book irresistible to any collector or enthusiast.

Bassett-Lowke Derek Head, 2006-07-25 The nostalgia for the great passenger ships of the first half of the 20th century is vividly recalled in this book on the world famous model-making firm of Bassett-Lowke, with their production of small scale waterline ship models manufactured between 1908

### **Dreadnought Gunnery and the Battle of Jutland**

John Brooks, 2005-03-09 This new book reviews critically recent studies of fire control, and describes the essentials of naval gunnery in the dreadnought era. With a foreword by Professor Andrew Lambert, it shows how, in 1913, the Admiralty rejected Arthur Pollen's Argo system for the Dreyer fire control tables.

*Naval Camouflage 1914-1945* David L. Williams, 2001 Although it is a subject of immense importance to warship enthusiasts, modelmakers, photograph collectors, and indeed academic naval historians, there has never been an authoritative history of camouflage. Apart from the huge scale of the subject, the reason for this lies largely in the fragmented nature of the surviving

evidence, and the ad hoc nature of much wartime development. This book does not claim to be such a narrative history, but it does set out to provide a comprehensive study. Visual and illustrative in its approach, it is Anglo-American in emphasis, but the camouflage patterns of enemy navies (and selected neutrals) are covered as well.

Miniature Merchant Ships John Bowen, 1997 This practical guide to waterline ship modelling in 1/1200 scale contains 30 sets of plans for the reader to construct their own models.

**More Miniature Merchant Ships** John Bowen, 2003 John Bowen brings his knowledge and expertise of waterline ship modelling to a second volume of miniature merchant ships, including examples such as Haverford (1901), Carpathia (1903), Oronsay (1925) and Braemar Castle (1952). The book opens with a section giving advice on initial preparations - finding and using plans, suitable materials and tools. This section also presents an alphabetical list of the principal fittings on a ship (those that would be included on this type of model) - hatches, winches, capstans, anchors, etc - with details and diagrams on how to make them. Section II comprises 30 sets of plans of ships built between 1900 and 1969. These are accompanied with at least one photograph of the ship, a full specification, brief history, and notes on essential constructional details, including colour scheme. Readers will recognise the authoritative yet approachable style John has brought to several ship modelling titles, which will appeal to both beginners and more experienced modellers. A companion volume to the highly successful

Miniature Merchant Ships, More Miniature Merchant Ships includes 30 1/1200 scale plans of liners, cargo ships and passenger cargo ships, each supplied with comprehensive modelling notes. More than 60 photographs of the prototype ships underway supply detailed pictorial references. This book, like Miniature Merchant Ships, is an essential addition to the library of any ship modeller. John Bowen is the author of several acclaimed titles for Conway Maritime Press, including Miniature Merchant Ships, published in 1997. Building waterline models has always been his favourite form of modelling and this book is a culmination of his continuing achievements in this area of ship modelling. John was deputy editor of Conway's quarterly journal Model Shipwright when it was launched in 1972 and has been its editor since 1974. He contributes a plan and instructions for a miniature merchant ship to each issue. John is a member of the Royal Institution of Naval Architects.

**A Holiday Roundelay** , 2013-09 Joyous noels resound in this bright, festive holiday celebration from gifted composer Victor Johnson. Contrasting legato sections add to the musical interest and help to spell success in this excellent programming choice for young and developing choirs.

**Average Is Over** Tyler Cowen, 2013-09-12 Renowned economist and author of Big Business Tyler Cowen

brings a groundbreaking analysis of capitalism, the job market, and the growing gap between the one percent and minimum wage workers in this follow-up to the New York Times bestseller *The Great Stagnation*. The United States continues to mint more millionaires and billionaires than any country ever. Yet, since the great recession, three quarters of the jobs created here pay only marginally more than minimum wage. Why is there growth only at the top and the bottom? Economist and bestselling author Tyler Cowen explains that high earners are taking ever more advantage of machine intelligence and achieving ever-better results. Meanwhile, nearly every business sector relies less and less on manual labor, and that means a steady, secure life somewhere in the middle—average—is over. In *Average is Over*, Cowen lays out how the new economy works and identifies what workers and entrepreneurs young and old must do to thrive in this radically new economic landscape.
