The Global Industrial Complex Steven Best,2011 The Global Industrial Complex: Systems of Domination is a groundbreaking collection of essays by a diverse set of leading scholars who examine the entangled and evolving global array of corporate-state structures of hegemonic power--what the editors refer to as the power complex--that was first analyzed by C. Wright Mills in his 1956 classic work, The Power Elite. In this new volume edited by Steven Best, Richard Kahn, Anthony J. Nocella II, and Peter McLaren, the power complex is conceived as co-constituted, interdependent and imbricated systems of domination. Spreading insidiously on a global level, the transnational institutional relationships of the power complex combine the logics of capitalist exploitation and profits and industrialist norms of efficiency, control, and mass production, While some have begun to analyze these institutional complexes as separate entities, this book is unique in analyzing them as overlapping, mutually-enforcing systems that operate globally and which will undoubtedly frame the macro-narrative of the 21st century (and perhaps beyond). The global industrial complex--a grand power complex of complexes--thus poses one of the most formidable challenges to the sustainability of planetary democracy, freedom and peace today. But there can be no serious talk of opposition to it until it is more popularly named and understood. The Global Industrial Complex aims to be a foundational contribution to this emerging educational and political project.

Cicero, On Pompey's Command (De Imperio), 27-49 Ingo Gildenhard,Louise Hodgson,2014-09-03 In republican times, one of Rome's deadliest enemies was King Mithridates of Pontus. In 66 BCE, after decades of inconclusive struggle, the tribune Manilius proposed a bill that would give supreme command in the war against Mithridates to Pompey the Great, who had just swept the Mediterranean clean of another menace: the pirates. While powerful aristocrats objected to the proposal, which would endow Pompey with unprecedented powers, the bill proved hugely popular among the people, and one of the praetors, Marcus Tullius Cicero, also hastened to lend it his support. In his first ever political speech, variously entitled pro lege Manilia or de imperio Gnaei Pompei, Cicero argues that the war against Mithridates requires the appointment of a perfect general and that the only man to live up to such lofty standards is Pompey. In the section under consideration here, Cicero defines the most important hallmarks of the ideal military commander and tries to demonstrate that Pompey is his living embodiment. This course book offers a portion of the original Latin text, study aids with vocabulary, and a commentary. Designed to stretch and stimulate readers, the incisive commentary will be of particular interest to students of Latin at both AS and undergraduate level. It extends beyond detailed linguistic analysis and historical background to encourage critical engagement with Cicero's prose and discussion of the most recent scholarly thought.

Being Wrong Kathryn Schulz,2011-01-04 To err is human. Yet most of us go through life assuming (and sometimes insisting) that we are right about nearly everything, from the origins of the universe to how to load the dishwasher. In *Being Wrong*, journalist Kathryn Schulz explores why we find it so gratifying to be right and so maddening to be mistaken. Drawing on thinkers as varied as Augustine, Darwin, Freud, Gertrude Stein, Alan Greenspan, and Groucho Marx, she shows that error is both a given and a gift—one that can transform our worldviews, our relationships, and ourselves.

Iranophobia Haggai Ram,2009-04-16 Israel and Iran invariably are portrayed as sworn enemies, engaged in an unending conflict with potentially apocalyptic implications. *Iranophobia* offers an innovative and provocative new reading of this conflict. Concerned foremost with how Israelis perceive Iran, the author steps back from all-too-common geopolitical analyses to show that this conflict is as much a product of shared cultural trajectories and entangled histories as it is one of strategic concerns and political differences. Haggai Ram, an Israeli scholar, explores prevalent Israeli assumptions about Iran to look at how these assumptions have, in turn, reflected and shaped Jewish Israeli identity. Drawing on diverse political, cultural, and academic sources, he concludes that anti-Iran phobias in the Israeli public sphere are largely projections of perceived domestic threats to the prevailing Israeli ethnocratic order. At the same time, he examines these phobias in relation to the Jewish state's use of violence in the Palestinian territories and Lebanon in the post-9/11 world. In the end, Ram demonstrates that the conflict between Israel and Iran may not be as essential and polarized as common knowledge assumes. Israeli anti-Iran phobias are derived equally from domestic anxieties about the Jewish state's ethnic and religious identities and from exaggerated and displaced strategic concerns in the era of the war on terrorism.
