Clean My Space Melissa Maker, 2017-03-07 The wildly popular YouTube star behind CLEAN MY SPACE presents the breakthrough solution to cleaning better with less effort. Melissa Maker is beloved by fans all over the world for her completely re-engineered approach to cleaning. As the dynamic new authority on home and living, Melissa knows that to invest any of our precious time in cleaning, we need to see big, long-lasting results. So, she developed her method to help us get the most out of our effort and keep our homes fresh and welcoming every day. In her long-awaited debut book, she shares her revolutionary 3-step solution: • Identify the most important areas (MIAs) in your home that need attention • Select the proper products, tools, and techniques (PTT) for the job • Implement these new cleaning routines so that they stick. Clean My Space takes the chore out of cleaning with Melissa's incredible tips and cleaning hacks (the power of pretreating!), her lightning fast 5-10 minute "express clean" routines for every room when time is tightest, and her techniques for cleaning even the most daunting places and spaces. And a big bonus: Melissa gives guidance on the best non-toxic, eco-conscious cleaning products and offers natural cleaning solution recipes you can make at home using essential oils to soothe and refresh. With Melissa's simple, groundbreaking method you can truly live in a cleaner, more cheerful, and calming home all the time.

Kings of Disaster Simon Simonse, 2018-05-01 The long-awaited, revised, and illustrated edition of Simon Simonse's study of the Rainmakers of the Nilotic Sudan marks a breakthrough in anthropological thinking on African political systems. Taking his inspiration from René Girard's theory of consensual scapegoating, the author shows that the

longstanding distinction of states and stateless societies as two fundamentally different political types does not hold. Centralized and segmentary systems only differ in the relative emphasis put on the victimary role of the king as compared with that of enemy. Kings of Disaster proposes an elegant and powerful solution to the vexed problem of regicide.

Blood Rites Barbara Ehrenreich, 2020-01-07 A New York Times Notable Book An ALA Notable Book Original and illuminating. --The Washington Post What draws our species to war? What makes us see violence as a kind of sacred duty, or a ritual that boys must undergo to become men? Newly reissued in paperback, Blood Rites takes readers on an original journey from the elaborate human sacrifices of the ancient world to the carnage and holocaust of twentieth-century total war. Ehrenreich sifts deftly through the fragile records of prehistory and discovers the wellspring of war in an unexpected place -- not in a killer instinct unique to the males of our species, but in the blood rites early humans performed to reenact their terrifying experiences of predation by stronger carnivores. Brilliant in conception and rich in scope, Blood Rites is a monumental work that continues to transform our understanding of the greatest single threat to human life.

Venomous Snakes of the World Mark O'Shea, 2005 All major and unusual venomous snakes, their range, habitats and venom, along with personal anecdotes (including snakebite stories) feature in this excellent book. Written by Mark O'Shea - one of the leading authorities on reptiles.

World Development Report 2020 World Bank, 2019-11-19 Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. *World Development Report 2020: Trading for Development in the Age of Global Value Chains* examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation.

Social Computing: Concepts, Methodologies, Tools, and Applications Dasgupta, Subhasish, 2009-11-30 Uncovers the growing and expanding phenomenon of human behavior, social constructs, and communication in online environments.

In Defiance of Painting Christine Poggi, 1992-01-01 The invention of collage by Picasso and Braque in 1912 proved to be a dramatic turning point in the development of Cubism and Futurism and ultimately one of the most significant innovations in twentieth-century art. Collage has traditionally been viewed as a new expression of modernism, one allied

with modernism's search for purity of means, anti-illusionism, unity, and autonomy of form. This book - the first comprehensive study of collage and its relation to modernism - challenges this view. Christine Poggi argues that collage did not become a new language of modernism but a new language with which to critique modernism. She focuses on the ways Cubist collage - and the Futurist multimedia work that was inspired by it - undermined prevailing notions of material and stylistic unity, subverted the role of the frame and pictorial ground, and brought the languages of high and low culture into a new relationship of exchange.

Laser Cutting Guide for Manufacturing Charles L. Caristan, 2004 Laser Cutting Guide for Manufacturing presents practical information and troubleshooting and design tools from a quality manufacturing perspective. Equally applicable to small shops as it is to large fabricator companies, this guide is a roadmap for developing, implementing, operating, and maintaining a laser-cutting manufacturing enterprise. The book focuses on metal cutting of sheets, plates, tubes, and 3-D shaped stampings. It presents today's reality of the engineering and business challenges, and opportunities presented by the rapid penetration cutting in all facets of industry.

Activist Citizenship in Southeast Europe Adam Fagan, Indraneel Sircar, 2020-04-28 This volume explores recent episodes of progressive citizen-led mobilisation that have spread across Southeast Europe over the past decade. These protests have allowed citizens the opportunity to challenge prevailing notions of citizenship and provided the chance to redress what is perceived to be the unjust balance of power between elites and the masses. Each contribution debunks the myth of inherently passive post-socialist populations

imitating West European forms of civil society activism. Rather, we gain a deeper sense of progressive and innovative forms of activist citizenship that display essentialist and particular forms of protest in combination with the antics of global protest networks. Through richly detailed case study research, the authors illustrate that whilst the catalysts for protest in Southeast Europe were invariably familiar (the expanse of private ownership into urban public spaces; the impact of austerity), the pathology of such protests were undoubtedly indigenous in origin, reflecting the particular post-socialist/post-authoritarian trajectories of these societies. The chapters in this book were originally published as a special issue in Europe-Asia Studies.

Old Yeller Fred Gipson, 2009-08-18 A timeless American classic and one of the most beloved children's books ever written, *Old Yeller* is a Newbery Honor Book that explores the poignant and unforgettable bond between a boy and the stray dog who becomes his loyal friend. When his father sets out on a cattle drive toward Kansas for the summer, fourteen-year-old Travis Coates is left to take care of his family and their farm. Living in Texas Hill Country during the 1860s, Travis comes to face new, unanticipated, and often perilous responsibilities in the frontier wilderness. A particular nuisance is a stray yellow dog that shows up one day and steals food from the family. But the big canine who Travis calls "Old Yeller" proves his worth by defending the family from danger. And Travis ultimately finds help and comfort in the courage and unwavering love of the dog who comes to be his very best friend. Fred Gipson's novel is an eloquently simple story that is both exciting and deeply moving. It stands alongside works like *The Adventures of Huckleberry Finn*, *Where*

The Red Fern Grows, and Shiloh as a beloved and enduring classic of literature. Originally published in 1956 to instant acclaim, Old Yeller later inspired a hit film from Walt Disney. Just as Old Yeller inevitably makes his way into the Coates family's hearts, this book will find its own special place in readers' hearts.

Standards and Standardization: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2015-02-28 Effective communication requires a common language, a truth that applies to science and mathematics as much as it does to culture and conversation. Standards and Standardization: Concepts, Methodologies, Tools, and Applications addresses the necessity of a common system of measurement in all technical communications and endeavors, in addition to the need for common rules and guidelines for regulating such enterprises. This multivolume reference will be of practical and theoretical significance to researchers, scientists, engineers, teachers, and students in a wide array of disciplines.

Composition and Properties of Drilling and Completion Fluids Ryen Caenn, HCH Darley, George R. Gray, 2011-09-29 The petroleum industry in general has been dominated by engineers and production specialists. The upstream segment of the industry is dominated by drilling/completion engineers. Usually, neither of those disciplines have a great deal of training in the chemistry aspects of drilling and completing a well prior to its

going on production. The chemistry of drilling fluids and completion fluids have a profound effect on the success of a well. For example, historically the drilling fluid costs to drill a well have averaged around 7% of the overall cost of the well, before completion. The successful delivery of up to 100% of that wellbore, in many cases may be attributable to the fluid used. Considered the bible of the industry, *Composition and Properties of Drilling and Completion Fluids*, first written by Walter Rogers in 1948, and updated on a regular basis thereafter, is a key tool to achieving successful delivery of the wellbore. In its Sixth Edition, *Composition and Properties of Drilling and Completion Fluids* has been updated and revised to incorporate new information on technology, economic, and political issues that have impacted the use of fluids to drill and complete oil and gas wells. With updated content on Completion Fluids and Reservoir Drilling Fluids, Health, Safety & Environment, Drilling Fluid Systems and Products, new fluid systems and additives from both chemical and engineering perspectives, Wellbore Stability, adding the new R&D on water-based muds, and with increased content on Equipment and Procedures for Evaluating Drilling Fluid Performance in light of the advent of digital technology and better manufacturing techniques, *Composition and Properties of Drilling and Completion Fluids* has been thoroughly updated to meet the drilling and completion engineer's needs. Explains a myriad of new products and fluid systems Cover the newest API/SI standards New R&D on water-based muds New emphases on Health, Safety & Environment New Chapter on waste management and disposal

Embryo and Fetal Pathology Enid Gilbert-Barness, Diane Debich-Spicer, 2004-05-31
Exhaustively illustrated in color with over 1000 photographs, figures, histopathology slides,

and sonographs, this uniquely authoritative atlas provides the clinician with a visual guide to diagnosing congenital anomalies, both common and rare, in every organ system in the human fetus. It covers the full range of embryo and fetal pathology, from point of death, autopsy and ultrasound, through specific syndromes, intrauterine problems, organ and system defects to multiple births and conjoined twins. Gross pathologic findings are correlated with sonographic features in order that the reader may confirm visually the diagnosis of congenital abnormalities for all organ systems. Obstetricians, perinatologists, neonatologists, geneticists, anatomic pathologists, and all practitioners of maternal-fetal medicine will find this atlas an invaluable resource.

New Atlantis Revisited Paul R. Josephson, 1997 In 1958 construction began on Akademgorodok, a scientific utopian community modeled after Francis Bacon's vision of a New Atlantis. The city, carved out of a Siberian forest 2,500 miles east of Moscow, was formed by Soviet scientists with Khrushchev's full support. They believed that their rational science, liberated from ideological and economic constraints, would help their country surpass the West in all fields. In a lively history of this city, a symbol of de-Stalinization, Paul Josephson offers the most complete analysis available of the reasons behind the successes and failures of Soviet science--from advances in nuclear physics to politically induced setbacks in research on recombinant DNA. Josephson presents case studies of high energy physics, genetics, computer science, environmentalism, and social sciences. He reveals that persistent ideological interference by the Communist Party, financial uncertainties, and pressures to do big science endemic in the USSR contributed to the failure of Akademgorodok to live up to its promise. Still, a kind of openness reigned that

presaged the glasnost of Gorbachev's administration decades later. The openness was rooted in the geographical and psychological distance from Moscow and in the informal culture of exchange intended to foster the creative impulse. Akademgorodok is still an important research center, having exposed physics, biology, sociology, economics, and computer science to new investigations, distinct in pace and scope from those performed elsewhere in the Soviet scientific establishment.

Store Wars Greg Thain, John Bradley, 2012-07-12 The sequel to the highly successful *Store Wars: the battle for mindspace and shelfspace* published in 1995. The new edition will retain all the strengths of the old book including a comprehensive and complex approach to the consumer & retail market and the interaction between FMCG retailers and manufacturers. The book will be thoroughly revised and updated and will consist of 4 main parts: A section on leading FMCG companies and brands (such as Coke, P&G, Unilever, Nestle, L'Oreal etc.), their marketing and branding strategies in the western markets (USA, Western Europe: UK, France, Germany and others). A section on leading retailers (Wal-Mart, Tesco, Carrefour etc.), their developments and expansion over the last 10 years. A section describing the interaction between retailers and manufacturers, including competition for end-consumers, trade marketing. A section covering the Emerging Markets—the retail landscape in the major developing economies, results of the expansion of major FMCG brands and western retail chains, challenges related to distribution and FMCG marketing in those countries. The book will also discuss the impact of the Global Crisis on the consumer and retail markets as well as predictions and prospects for the future.
