The Critical Makers Loes Bogers,2019

From Cave Man to Cave Martian Manfred "Dutch" von Ehrenfried,2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Digital Culture in Architecture Antoine Picon,2010-04-09 Today's explosive developments in digital technology have also affected architecture and the urban landscape. The new possibilities opened up by digital simulation have led to an increasingly strategic approach to planning, an approach based on generating scenarios, which thus represents a radical departure from traditional planning. From the preliminary sketch all the way to the production of individual building components, digital tools offer new possibilities that were still inconceivable just a few years ago. This volume provides a profound introduction to the important role of digital technologies in design and execution. In four chapters, the author systematically examines the influence of digital culture on architecture but also on the urban landscape as well as product design. The relationship of digital architecture to the city is also an important focus.

Visual Diary Guide - Student Workbook Hilary Senhali,2015-06-30 In 2014, the Australian Government was investing into creativity and innovation as part of a growth strategy. Critical & creative thinking ranked 4th in the Australian Curriculum after Literacy, Numeracy and ICT, across all subjects. In the Arts, it made explicit references to how to achieve this with the use of visual journals. In a way, this represented a sea change in the way creativity was being taught. But by what means? Where would teachers get practical help to make this happen?The Visual Diary Guides provide just this kind of help. Produced by an artist-teacher, in two integrated parts they address both students and teachers while aligning with the Australian Curriculum.They begin by identifying 'inspiration' as the fuel for the creative activity. But it is hard to store inspiration for later use. And even harder to make it fun!The books argue that the 'storage' is that ordinary art journal, the Visual Diary, which in the present classroom setting is often wasted as a portfolio. Its explosive creative potential is there to be unlocked. The books set out to do that in the classroom. Contrary to common belief, a structured approach with limits and boundaries is required for creativity to truly flourish.The Visual Diary becomes a students' personal treasure-trove much like an ordinary diary. The main premise of these books is that everyone has an artist in them and a trustworthy guide is needed to locate it.The Visual Diary Guide - Student Work book is written for students in accessible language. Through more than 40 specially designed activities, students find and capture inspiration and ideas that personally resonate for them. It opens the door for students to explore the visual culture they are immersed in, making it accessible in the art room for refinement, analysis and development as a supplement to the art room program.

Sketching with Watercolour Pencils ,2002 Children will find everything they need to master a new art medium with these easy-to-follow art books. Each title includes a practice pad and the tools required to learn a variety of artistic techniques.

Watson-Gandy on Accountants Mark Watson-Gandy,2008 Accountants play an increasingly important and diverse role in society today. Traditionally, in the UK, accountants are the first port of call for businessmen seeking any form of professional advice or assistance. They undertake a wide range of functions which stretch far beyond their traditional roles of preparing accounts, financial reporting, auditing, and tax planning. Today, accountants also offer management consultancy, give corporate finance advice, provide company secretarial services, undertake financial management, give personal finance advice, advise on computer software, and act as trustees in bankruptcy, liquidators, administrative receivers, and administrators. This major work provides UK legal practitioners and accountants with clear and practical guidance from non-contentious but vital governance issues, to the complex issues pertaining to professional negligence. The book's 6 checklists and 32 precedents guide the reader through the key topics: partnership creation, cl

Folding in Architecture Greg Lynn,2004-06-07 This seminal book from Architectural Design was originally published in 1993, at a time of crucial change and on the eve of the digital revolution. It brought together a series of essays that many believe created the favourable environment in which computer-based design could thrive. Considered one of the most influential architecture publications of the 1990s, this book ranks as a classic and in itself is a crucial chapter of history, though one that has been out of print since 1999. This faithful reprinting includes a substantial new introductory essay by Mario Carpo, Head of the Study Centre at the Canadian Centre for Architecture, which examines the impact of the original texts and their ongoing significance. Thereafter, the book is true to its original content showcasing projects by ground-breaking architects such as Greg Lynn, Jeffrey Kipnis, Bahram Shirdel, Frank Gehry and Philip Johnson.

Introducing Transformational Grammar Jamal Ouhalla,1999 The first edition of this book quickly established itself as one of the clearest and most readable introductions to generative grammar. Together with a complete introduction to the principles of Universal Grammar, it traced the major shifts of perspective that have influenced the developments of the theory over the last forty years. This revised and expanded new edition introduces students with no previous training to Transformational Grammar. When is the Digital in Architecture? Andrew Goodhouse,2017 But it's not just about articulating a variety of responses. Asking a question like When is the digital in architecture? can produce millions of stories in response and millions of digressions and redirections that narrow in focus and change geographies, producing a Tristram Shandy of the digital as the CCA continues to build its digital archive and make it increasingly accessible to researchers. If this novel of digressions is distributed across future research projects and extended with studies of new archival material, so much the better for the reader, in our opinion.
