**The Hunt for Zero Point** Nick Cook,2007-12-18 This riveting work of investigative reporting and history exposes classified government projects to build gravity-defying aircraft--which have an uncanny resemblance to flying saucers. The atomic bomb was not the only project to occupy government scientists in the 1940s. Antigravity technology, originally spearheaded by scientists in Nazi Germany, was another high priority, one that still may be in effect today. Now for the first time, a reporter with an unprecedented access to key sources in the intelligence and military communities reveals suppressed evidence that tells the story of a quest for a discovery that could prove as powerful as the A-bomb. The Hunt for Zero Point explores the scientific speculation that a zero point of gravity exists in the universe and can be replicated here on Earth. The pressure to be the first nation to harness gravity is immense, as it means having the ability to build military planes of unlimited speed and range, along with the most deadly weaponry the world has ever seen. The ideal shape for a gravity-defying vehicle happens to be a perfect disk, making antigravity tests a possible explanation for the numerous UFO sightings of the past 50 years. Chronicling the origins of antigravity research in the world's most advanced research facility, which was operated by the Third Reich during World War II, The Hunt for Zero Point traces U.S. involvement in the project, beginning with the recruitment of former Nazi scientists after the war. Drawn from interviews with those involved with the research and who visited labs in Europe and the United States, The Hunt for Zero Point journeys to the heart of the twentieth century's most puzzling unexplained phenomena.

»**Truth« and Fiction** Peter Deutschmann,Jens Herlth,Alois Woldan,2020-07-31 Several of the most prolific and influential conspiracy theories have originated in Eastern Europe. The far reaching influence of conspiracy narratives can be observed in recent developments in Poland or with regard to the wars waged in Eastern Ukraine and in former Yugoslavia. This volume analyses the history behind this widespread phenomenon as well the role it has played in Eastern European cultures and literature both past and present.

From Newspeak to Cyberspeak Slava Gerovitch,2004-09-17 In this book, Slava Gerovitch argues that Soviet cybernetics was not just an intellectual trend but a social movement for radical reform in science and society as a whole. Followers of cybernetics viewed computer simulation as a universal method of problem solving and the language of cybernetics as a language of objectivity and truth. With this new objectivity, they challenged the existing order of things in economics and politics as well as in science. The history of Soviet cybernetics followed a curious arc. In the 1950s it was labeled a reactionary pseudoscience and a weapon of imperialist ideology. With the arrival of Khrushchev's political thaw, however, it was seen as an innocent victim of political oppression, and it evolved into a movement for radical reform of the Stalinist system of science. In the early 1960s it was hailed as science in the service of communism, but by the end of the decade it had turned into a shallow fashionable trend. Using extensive new archival materials, Gerovitch argues that these fluctuating attitudes reflected profound changes in scientific language and research methodology across disciplines, in power relations within the scientific community, and in the political role of scientists and engineers in Soviet society. His detailed analysis of scientific discourse shows how the Newspeak of the late Stalinist period and the Cyberspeak that challenged it eventually blended into CyberNewspeak.

*Stalin's Agent* Boris Volodarsky,2015 This is the history of an unprecedented deception operation - the biggest KGB deception of all time. It has never been told in full until now. There are almost certainly people who would like it never to be told. It is the story of General Alexander Orlov. Stalin's most loyal and trusted henchman during the Spanish Civil War, Orlov was also the Soviet handler controlling Kim Philby, the British spy, defector, and member of the notorious 'Cambridge Five'. Escaping Stalin's purges, Orlov fled to America in the late 1930s and lived underground. He only dared reveal his identity to the world after Stalin's death, in his 1953 best-seller *The Secret History of Stalin's Crimes*, after which he became perhaps the best known of all Soviet defectors, much written about, highly praised, and commemorated by the US Congress on his death in 1973. But there is a twist in the Orlov story beyond the dreams of even the most ingenious spy novelist: 'General Alexander Orlov' never actually existed. The man known as 'Orlov' was in fact born Leiba Feldbin. And while he was a loyal servant of Stalin and the controller of Philby, he was never a General in the KGB, never truly defected to the West after his 'flight' from the USSR, and remained a loyal Soviet agent until his death. The 'Orlov' story as it has been accepted until now was largely the invention of the KGB - and one perpetuated long after the end of the Cold War. In this meticulous new biography, Boris Volodarsky, himself a former Soviet intelligence officer, now tells the true story behind 'Orlov' for the first time. An intriguing tale of Russian espionage and deception, stretching from the time of Lenin to the Putin era, it is a story that many people in the world's intelligence agencies would almost definitely prefer you not to know about.

*Introduction to UAV Systems* Paul Fahlstrom,Thomas Gleason,2012-07-11 Unmanned aerial vehicles (UAVs) have been widely adopted in themilitary world over the last decade and the success of thesemilitary applications is increasingly driving efforts to establishunmanned aircraft in non-military roles. Introduction to UAV Systems,4th edition provides a comprehensiveintroduction to all of the elements of a complete Unmanned AircraftSystem (UAS). It addresses the air vehicle, mission planning andcontrol, several types of mission payloads, data links and how theyinteract with mission performance, and launch and recoveryconcepts. This book provides enough information to encourage astudent to learn more; to provide a specialist with a basicappreciation of the technical issues that drive other parts of thesystem and interact with their specialty; or to help a programmanager understand system-level tradeoffs and know what questionsto ask. Key features: Comprehensive overview of all elements of a UAS and of how theyinteract. Introduces the underlying concepts of key subsystems. Emphasizes system-integration issues and how they relate tosubsystem design choices. Practical discussion of issues informed by lessons learned inUAV programs. Introduction to UAV Systems,4th edition is written both for newcomerto the subject and for experienced members of the UAV community whodesire a comprehensive overview at the system level. As well as being a primary text for an introductory course onUAS or a supplementary text in a course that goes into more depthin one of the individual technologies involved in a UAS, this bookis a useful overview for practicing engineers, researchers,managers, and consultants interested in UAV systems.

**Artificial Hells** Claire Bishop,2012-07-24 Since the 1990s, critics and curators have broadly accepted the notion that participatory art is the ultimate political art: that by encouraging an audience to take part an artist can promote new emancipatory social relations. Around the world, the champions of this form of expression are numerous, ranging from art historians such as Grant Kester, curators such as Nicolas Bourriaud and Nato Thompson, to performance theorists such as Shannon Jackson. *Artificial Hells* is the first historical and theoretical overview of socially engaged participatory art, known in the US as social practice. Claire Bishop follows the trajectory of twentieth-century art and examines key moments in the development of a participatory aesthetic. This itinerary takes in Futurism and Dada; the Situationist International; Happenings in Eastern Europe, Argentina and Paris; the 1970s Community Arts Movement; and the Artists Placement Group. It concludes with a discussion of long-term educational projects by contemporary artists such as Thomas Hirschhorn, Tania Bruguera, Pawe? Althamer and Paul Chan. Since her controversial essay in *Artforum* in 2006, Claire Bishop has been one of the few to challenge the political and aesthetic ambitions of participatory art. In *Artificial Hells*, she not only scrutinizes the emancipatory claims made for these projects, but also provides an alternative to the ethical (rather than artistic) criteria invited by such artworks. *Artificial Hells* calls for a less prescriptive approach to art and politics, and for more compelling, troubling and bolder forms of participatory art and criticism.

*Hitler's Flying Saucers* Henry Stevens,2012-11-29 WWII expert Stevens shows us the incredible and suppressed technology of the Third Reich and their desire to create highly advanced "wingless" aircraft-yes, flying saucers! Learn why the Schriever-Habermohl project was actually two projects and read the written statement of a German test pilot who actually flew one of these saucers; about the Leduc engine, the key to Dr. Miethes saucer designs; how US government officials kept the truth about foo-fighters hidden for almost sixty years and how they were finally forced to come clean about the German origin of foo fighters. Learn of the Peenemuende saucer project and how it was slated to go atomic. Read the testimony of a German eyewitness who saw magnetic discs. Read the U.S. governments own reports on German field propulsion saucers. Read how the post-war German KM-2 field propulsion rocket worked. Learn details of the work of Karl Schappeller and Viktor Schauburger. Learn how their ideas figure in the quest to build

field propulsion flying discs. Find out what happened to this technology after the war. Find out how the Canadians got saucer technology directly from the SS. Find out about the surviving Third Power of former Nazis. Learn of the US government’s methods of UFO deception and how they used the German Sonderbueroll as the model for Project Blue Book.

*Arming the Luftwaffe* Daniel Uziel,2011-11-16 During World War II, aviation was among the largest industrial branches of the Third Reich. About 40 percent of total German war production, and two million people, were involved in the manufacture of aircraft and air force equipment. Based on German records, Allied intelligence reports, and eyewitness accounts, this study explores the military, political, scientific and social aspects of Germany’s wartime aviation industry: production, research and development, Allied attacks, foreign workers and slave labor, and daily life and working conditions in the factories. Testimony from Holocaust survivors who worked in the factories provides a compelling new perspective on the history of the Third Reich.

**Visions of Victory** Gerhard L. Weinberg,2005-04-11 Visions of Victory, first published in 2005, explores the views of eight leaders of the major powers of World War II - Hitler, Mussolini, Tojo, Chiang Kai-shek, Stalin, Churchill, de Gaulle, and Roosevelt. He compares their visions of the future in the event of victory. While the leaders primarily focused on fighting and winning the war, their decisions were often shaped by their aspirations for the future. What emerges is a startling picture of postwar worlds. After exterminating the Jews, Hitler intended for all Slavs to die so Germans could inhabit Eastern Europe. Mussolini and Hitler wanted extensive colonies in Africa. Churchill hoped for the re-emergence of British and French empires. De Gaulle wanted to annex the northwest corner of Italy. Stalin wanted to control Eastern Europe. Roosevelt's vision included establishing the United Nations. Weinberg's comparison of the individual portraits of the war-time leaders is a highly original and compelling study of history that might have been.

**Japan 1941** Eri Hotta,2013-10-29 A groundbreaking history that considers the attack on Pearl Harbor from the Japanese perspective and is certain to revolutionize how we think of the war in the Pacific. When Japan launched hostilities against the United States in 1941, argues Eri Hotta, its leaders, in large part, understood they were entering a war they were almost certain to lose. Drawing on material little known to Western readers, and barely explored in depth in Japan itself, Hotta poses an essential question: Why did these men—military men, civilian politicians, diplomats, the emperor—put their country and its citizens so unnecessarily in harm’s way? Introducing us to the doubters, schemers, and would-be patriots who led their nation into this conflagration, Hotta brilliantly shows us a Japan rarely glimpsed—eager to avoid war but fraught with tensions with the West, blinded by reckless militarism couched in traditional notions of pride and honor, tempted by the gambler’s dream of scoring the biggest win against impossible odds and nearly escaping disaster before it finally proved inevitable. In an intimate account of the increasingly heated debates and doomed diplomatic overtures preceding Pearl Harbor, Hotta reveals just how divided Japan’s leaders were, right up to (and, in fact, beyond) their eleventh-hour decision to attack. We see a ruling cadre rich in regional ambition and hubris: many of the same leaders seeking to avoid war with the United States continued to adamantly advocate Asian expansionism, hoping to advance, or at least maintain, the occupation of China that began in 1931, unable to end the second Sino-Japanese War and unwilling to acknowledge Washington’s hardening disapproval of their continental incursions. Even as Japanese diplomats continued to negotiate with the Roosevelt administration, Matsuoka Yosuke, the egomaniacal foreign minister who relished paying court to both Stalin and Hitler, and his facile supporters cemented Japan’s place in the fascist alliance with Germany and Italy—unaware (or unconcerned) that in so doing they destroyed the nation’s bona fides with the West. We see a dysfunctional political system in which military leaders reported to both the civilian government and the emperor, creating a structure that facilitated intrigues and stoked a jingoistic rivalry between Japan’s army and navy. Roles are recast and blame reexamined as Hotta analyzes the actions and motivations of the hawks and skeptics among Japan’s elite. Emperor Hirohito and General Hideki Tojo are newly appraised as we discover how the two men fumbled for a way to avoid war before finally acceding to it. Hotta peels back seventy years of historical mythologizing—both Japanese and Western—to expose all-too-human Japanese leaders torn by doubt in the months preceding the attack, more concerned with saving face than saving lives, finally drawn into war as much by incompetence and lack of political will as by bellicosity. An essential book for any student of the Second World War, this compelling reassessment will forever change the way we remember those days of infamy.

**Explicatio Formarum Litterarum** Rutherford Aris,1990

**Gotterdammerung - Luftwaffe Wrecks and Relics** Brett Green,2006 Many of the photographs in this book were taken by advancing Allied troops in North Africa and Europe from 1942 onwards, others show aircraft shot down over England or come from Germany after the collapse of the Third Reich. They therefore form a valuable repository of information on aircraft, often from lesser-known units, at various stages of the War.

**Manhattan Beach, 1957** Yves H.,2003 John Reed is bored with his life and his uneventful police career in a sleepy town in Missouri, until a girl is found dead in the nearby forest. The event triggers John's suppressed memories of the summer of 1957, when he was on his way to Las Vegas and crossed paths with a girl that was on the run, trying to get to the resort at Manhattan beach. They traveled together for a few days by stealing cars, until the police and her uncle caught up to them, with tragic results. As he investigates the brutal murders of several young girls, the past and present begin to blur in his mind.
