Cloud Computing Brian J.S. Chee,Curtis Franklin Jr.,2010-04-07 Modern computing is no longer about devices but is all about providing services, a natural progression that both consumers and enterprises are eager to embrace. As it can deliver those services, efficiently and with quality, at compelling price levels, cloud computing is with us to stay. Ubiquitously and quite definitively, cloud computing is

Emerging Solutions for Future Manufacturing Systems Luis M. Camarinha-Matos,2004-09-13 Industries and particularly the manufacturing sector have been facing difficult challenges in a context of socio-economic turbulence characterized by complexity as well as the speed of change in causal interconnections in the socio-economic environment. In order to respond to these challenges companies are forced to seek new technological and organizational solutions. In this context two main characteristics emerge as key properties of a modern automation system – agility and distribution. Agility because systems need not only to be flexible in order to adjust to a number of a-priori defined scenarios, but rather must cope with unpredictability. Distribution in the sense that automation and business processes are becoming distributed and supported by collaborative networks. Emerging Solutions for Future Manufacturing Systems includes the papers selected for the BASYS'04 conference, which was held in Vienna, Austria in September 2004 and sponsored by the International Federation for Information Processing (IFIP).

Agent-Based Manufacturing S.M. Deen,2013-04-17 Low-volume high-variety products like personalized cars or customized engines will be the key issues for manufacturing in the 21st century. The necessary control technology is based on the concept of holons, which are the units of production and behave as autonomous and cooperative agents, providing flexibility, adaptability, agility, and dynamic reconfigurability. This book presents the latest research results in agent-based manufacturing as carried out by researchers in academia and industry within the international Holonic Manufacturing Systems project. As this project was driven by industry, the results presented here are of vital interest not just to researchers in agent technologies or distributed artificial intelligence, but also to engineers and professionals in industry who have to respond to rapid changes and new demands in production.

Applied Psychology for Project Managers Monika Wastian,Lutz Rosenstiel,Michael A. West,Isabell Braumandl,2015-02-24 This book offers an essential manual for project managers, project management offices (PMO's), trainers and consultants, addressing the psychological side of project management. Written by leading scholars in organizational psychology and by top experts in project management, it covers all major psychological topics that are key to project success. The book features dedicated chapters on leadership and teamwork, including virtual and intercultural cooperation, commitment and motivation of project teams. It adds a psychological perspective to personnel management, decision-making, information and knowledge management and communication in project work. Power, influencing tactics and other aspects of stakeholder management are covered, as well as project coaching, innovation and creativity, self-management and the management of conflicts, risks and crises.

How Slippery Is a Banana Peel? Rebecca Donnelly,2021-01-19 Rebecca Donnelly's How Slippery Is a Banana Peel? is a picture book companion to Cats Are a Liquid celebrating the science and the slipperiness of banana peels—a perfect introduction to friction, featuring illustrations by Misa Saburi. Volcanoes roar, But banana peels race. Rockets soar, Like bananas through space. A group of kid-experimenters at a science fair explore the slipperiness of banana peels—a perfect introduction to scientific concepts! It's funny and STEM-inspired, with back matter on friction and a kitchen science experiment. These playful and mischievous banana peels will capture the imagination of readers.

Virtual Organizations Luis M. Camarinha-Matos,Hamideh Afsarmanesh,Martin Ollus,2006-06-18 The area of Virtual Organizations as a main component of the new discipline of Collaborative Networks has been the focus of research globally. The fast evolution of the information and communication technologies and in particular the so-called Internet technologies, also represents an important motivator for the emergence of new forms of collaboration. However, the research in many of these cases is highly fragmented, considering that each project is focused on solving specific problems. As such, there is no effective consolidation/harmonization among them in order to have an effective impact and facilitate the interaction among the involved experts. This book represents a contribution to the consolidation of the already vast amount of empirical knowledge and practical experience. A synthesis of results collected from the analysis of numerous projects and industry case studies is presented, with focus on: Principles and models, ICT infrastructures and tools, Implementation issues, and Case studies.

Multi-Agent-Systems and Applications II Vladimír Mařík,2002 This book presents a collection of thoroughly refereed papers drawn together from three meetings on multi-agent systems. Five of the tutorial lectures included were presented at the ACAI/EASSS 2001 summer school on MAS, held in Prague, Czech Republic, in July 2001; seven revised reviewed student papers dealing with various aspects of MAS are included as well. A workshop on Adaptability and Embodiment using MAS, AEMAS 2001, also held in Prague, Czech Republic, concurrently with the ACAI/EASSS summer school, is represented by three papers. Finally, a further nine papers were selected from an International Workshop on Industrial Applications of Holonic and Multi-Agent Systems, HoloMAS 2001, held in Munich, Germany, in September 2001.

Programming Industrial Control Systems Using IEC 1131-3 Robert W. Lewis,1998 This revised edition includes all IEC proposed amendments and corrections for the planned 1999 revision of IEC 1131-3, as agreed by the IEC working group. It accurately describes the languages and concepts, and interprets the standard for practical implementation and applications.

No Period Harry Turtledove,2020-11-30 A man sets out to tell a story of his ex, which in turns becomes a story of the world. If only he could change that story—find the moment where it all began and alter the past. But what if he can't find the beginning—or even the end? At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Securing the Cloud Curtis Franklin Jr.,Brian Chee,2023-01-09 This book present the principles of cloud computing security. From a definition of terms to key issues for service contracts, it's a must-have companion for anyone charged with protecting cloud-based assets or using cloud-based security to protect traditional computing assets.

Understanding Agent Systems Mark d'Inverno, Michael Luck, 2013-12-20 Mark d'Inverno and Michael Luck present a formal approach to dealing with agents and agent systems in this second edition of Understanding Agent Systems. The Z specification language is used to establish an accessible and unified formal account of agent systems and inter-agent relationships. In particular, the framework provides precise and unambiguous meanings for common concepts and terms for agent systems, allows for the description of alternative agent models and architectures, and serves as a foundation for subsequent development of increasingly refined agent concepts. The practicability of this approach is verified by applying the formal framework to three detailed case studies. The book will appeal equally to researchers, students, and professionals in industry.

Networked RFID George Roussos, 2008-10-17 This book introduces the technologies and techniques of large-scale RFID-enabled mobile computing systems. The discussion is set in the context of specific system case studies where RFID has been the core enabling technology in retail, metropolitan transportation, logistics and e-passport applications. RFID technology fundamentals are covered including operating principles, core system components and performance trade-offs involved in the selection of specific RFID platforms.

Handbook Of Manufacturing Yong Huang, Lihui Wang, Steven Y Liang, 2019-10-08 Handbook of Manufacturing provides a comprehensive overview of fundamental knowledge on manufacturing, covering various processes, manufacturing-related metrology and quality assessment and control, and manufacturing systems. Many modern processes such as additive manufacturing, micro- and nano-manufacturing, and biomedical manufacturing are also covered in this handbook. The handbook will help prepare readers for future exploration of manufacturing research as well as practical engineering applications.

Working with Men in Health and Social Care Brid Featherstone, Mark Rivett, Jonathan Scourfield, 2007-08-01 'Working with Men in Health and Social Care is a very welcome contribution to the stock of books on men and masculinities. It is especially useful for those interested in direct practice and policy applications in the fields of welfare, and for those who work with the problems men create, the problems men experience, and their interconnections' - Jeff Hearn, co-editor Men and Masculinities, University of Huddersfield and Linköping University Working with Men in Health and Social Care is an important and timely book that introduces the complex issues and debates involved in working with men in a range of professional settings. The authors locate academic and popular discourse on masculinities within the specific context of health and social care settings, critically analysing the theory and policy that underpin and inform practice, and continually linking theoretical frameworks to 'real-life' practice examples. Section 1 contextualises the topic with a discussion of gender theory, social policy and the occupational culture of relevant organisations Section 2 provides a summary of practice models, examining practice with men as individuals, as well as in groups, families and communities Section 3 is organised according to specific groups of service users and includes chapters on fathers, abusive men, physical and mental health, boys, and older men This thought-provoking and topical book will be essential reading for students and academics in social work, health care, probation, counselling, and allied disciplines, and for those facing the reality of working with men in their day-to-day practice.

Rigorous State-Based Methods Alexander Raschke, Dominique Méry, 2021-05-22 This book constitutes the proceedings of the 8th International Conference on Rigorous State-Based Methods, ABZ 2021, which was planned to take place in Ulm, Germany, during June 6-11, 2021. The conference changed to an online format due to the COVID-19 pandemic. The 6 full and 8 short papers included in this volume were carefully reviewed and selected from 18 submissions. The proceedings also include 3 PhD symposium contributions. They deal with state-based and machine-based formal methods, mainly Abstract State Machines (ASM), Alloy, B, TLA+, VDM, and Z.

The Mislaid Magician Or Ten Years After Patricia C. Wrede, Caroline Stevermer, 2009-05 A dastardly kidnapper, enchanted dogs, and suspicious explosions highlight the third book about Kate and Cecy of Sorcery and Cecelia.
