**The Nature of Technology** W. Brian Arthur, 2010 The Nature of Technology will change the way you think about this fundamental subject forever. W. Brian Arthur's many years of thinking and writing about technology have culminated in a unique understanding of his subject. Here he examines the nature of technology itself: what is it and how does it evolve? Giving rare insights into the evolution of specific technologies and a new framework for thinking about others, every sentence points to some further truth and fascination. At a time when we are ever more reliant on technological solutions for the world's problems, it is extraordinary how little we actually understand the processes that lead to innovation and invention. Until now. This will be a landmark book that will define its subject, and inspire people to think about technology in depth for the very first time.

**Cold War Modern** David Crowley, Jane Pavitt, 2008 Modern life after 1945 seemed to promise both utopia and catastrophe. Both could, it seemed, be achieved at the 'push of a button'. Published to accompany a major V & A exhibition, 'Cold War Modern: Design 1945-1970', this book explores how the politics of the Cold War shaped architecture and design. Reassessing 'classic' designs and introducing many little-known objects.

**Lux Noctis** Reuben Wu, 2018-09 Lux Noctis depicts landscapes unbound by time and space, influenced by ideas of planetary exploration, 19th century sublime romantic painting, and science fiction. **Reframing Modernism: Painting from Southeast Asia, Europe and Beyond** Low

Sze Wee, Horikawa Lisa, Phoebe Scott, 2016-03-31 What is modernism in Southeast Asia? What is modern art, as embodied in the paintings of Southeast Asia? These questions and more are answered in *Reframing Modernism: Painting from Southeast Asia, Europe and Beyond*, published in conjunction with the exhibition of the same name. Featuring 217 works, in full colour, by 51 Southeast Asian and European artists, from the Centre Pompidou and National Gallery Singapore, as well as other Southeast Asian collections in the region and beyond, this catalogue tells the compelling story of modernism as it developed across continents, and reveals artists' powerful, and sometimes surprising, responses to modernity.

Bubbletecture Sharon Francis, 2019-03-27 Following in the footsteps of Nanotecture, Mobitecture, and Pet-tecture, a fascinating and fun guide to everything inflatable. Although inflatable objects have been around for more than 200 years, architects, artists, and designers keep rediscovering this deceptively simple – often playful, and occasionally bizarre – technology. Bubbletecture brings together inflatables in every conceivable size, shape, and hue across the realms of architecture, design, art, and fashion. From inflatable dresses and hats to buildings employing cutting-edge technologies, from ingenious chairs, lights, bowls, and even egg cups to children's toys and provocative art installations, Bubbletecture demonstrates that inflatable design is simply irresistible.

*Trash Animals* Kelsi Nagy, Phillip David Johnson II, 2013-04-01 Why are some species admired or beloved while others are despised? An eagle or hawk circling overhead inspires awe while urban pigeons shuffling underfoot are kicked away in revulsion. Fly fishermen consider carp an unwelcome trash fish, even though the trout they hope to catch are often equally non-native. Wolves and coyotes are feared and hunted in numbers wildly disproportionate to the dangers they pose to humans and livestock. In *Trash Animals*, a diverse group of environmental writers explores the natural history of wildlife species deemed filthy, unwanted, invasive, or worthless, highlighting the vexed relationship humans have with such creatures. Each essay focuses on a so-called trash species—gulls, coyotes, carp, cockroaches, magpies, prairie dogs, and lubber grasshoppers, among others—examining the biology and behavior of each in contrast to the assumptions widely held about them. Identifying such animals as trash tells us nothing about problematic wildlife but rather reveals more about human expectations of, and frustrations with, the natural world. By establishing the unique place that maligned species occupy in the contemporary landscape and in our imagination, the contributors challenge us to look closely at these animals, to reimagine our ethics of engagement with such wildlife, and to question the violence with which we treat them. Perhaps our attitudes reveal more about humans than they do about the animals. Contributors: Bruce Barcott; Charles Bergman, Pacific Lutheran U; James E. Bishop, Young Harris College; Andrew D. Blechman; Michael P. Branch, U of Nevada, Reno; Lisa Couturier; Carolyn Kraus, U of Michigan–Dearborn; Jeffrey A.
