Meaningful Making 2 Paulo Blikstein,Sylvia Libow Martinez,Heather Allen Pang,2019-03-08 Meaningful Making 2 is a second volume of projects and strategies from the Columbia University FabLearn Fellows. This diverse group of leading K-12 educators teach in Fab Labs, makerspaces, classrooms, libraries, community centers, and museums--all with the goal of making learning more meaningful for every child. A learning revolution is in the making around the world. Enthusiastic educators are using the new tools and technology of the maker movement to give children authentic learning experiences beyond textbooks and tests. The FabLearn Fellows work at the forefront of this movement in all corners of the globe. In this book, the FabLearn Fellows share all new inspirational lesson ideas, strategies, and recommended projects across a broad range of age levels. Illustrated with color photos of real student work, the Fellows take you on a tour of the future of learning, where children make sense of the world by making things that matter to them and their communities. To read this book is to rediscover learning as it could be and should be--a joyous, mindful exploration of the world, where the ultimate discovery is the potential of every child.

The Prop Builder's Molding & Casting Handbook Thurston James,1989-11-15 The Prop Builder's Molding & Casting Handbook & break;& break;This is the first book to contain, in one comprehensive volume, every molding and casting procedure of use to the theater props builder (no matter what his or her level or proficiency). The author demonstrates the techniques involved in using more than thirty different materials ranging from papier-mache to breakaway glass. & break;& break;While the use of some materials--plaster and polyester resins, for example--is covered to some extent in other publications, information on the selection and use of rubber materials (latex, neoprene, silicone, and the urethanes) and the procedure for making breakaway windows and bottles is available only in The Prop Builder's Molding & Casting Handbook. & break;& break;Written in an easy, conversational style, the book will be useful to anyone involved with theater properties, puppetry, and costuming (as professionals or amateurs). It will also serve admirably the needs of students taking classes in those subjects. & break;& break;Completing the book is a special section on designing and building a vacuum forming machine suitable for use in constructing theater props. More than 450 photographs illustrate the step-by-step procedures explained throughout the entire text.

Van Gogh Starry Night Vincent van Gogh,Federico Castelli Gattinara,2004 This title is one in a series presenting four masterpieces by four immortal nineteenth-century French painters. Each miniature book faithfully reproduces its title painting on the front cover, and is packaged in a handsome slipcase that doubles as a picture frame. The frame can stand up on a desk or tabletop or be hung on the wall to display the book cover's striking painting. Each book's interior discusses its title painting, describing the artist's approach to his work, analyzing the picture's fine points, and showing close-up details from the painting. A final two-page spread presents a timeline capsule biography that lists significant events in the painter's life. Van Gogh--Starry Night shows and discusses Vincent Van Gogh's masterpiece, which is a mystically glowing nighttime landscape, and ranks today as one of the artist's most popular and beloved paintings.

The Soviet Army Department of the Army,2019-07-19 The Soviet Army: Operations and Tactics FM 100-2-1 This field manual is part of FM series 100-2, The Soviet Army. The other volumes are FM 100-2-2, The Soviet Army: Specialized Warfare and Rear Area Support, and FM 100-2-3, The Soviet Army: Troops, Organization and Equipment. These manuals cannot stand alone, but should be used interchangeably. These field manuals serve as the definitive source of unclassified information on Soviet ground forces and their interaction with other services in combined arms warfare. These

manuals represent the most current unclassified information and they will be updated periodically. More information would become available in the event of war or national emergency. Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a HUBZONE SDVOSB. <https://usgovpub.com>

Introductory Grammar of Amharic Wolf Leslau, 2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

Make: Props and Costume Armor Shawn Thorsson, 2016-09-21 Have you been trying to think of a way to conquer your local comic convention through cosplay? Do you gaze with envious eyes upon the fan-made suits of armored awesomeness strolling around every year on Halloween? Do you have a spot on your wall, bookshelf, or desk that desperately needs to be filled with a screen-accurate replica of your favorite science-fiction or fantasy weapon? If so, look no further. We've got just the book for you! In this book, master prop maker Shawn Thorsson uses his unique blend of humor and insight to turn years of painful experience into detailed explanations. He'll show you many of the tools, methods, and processes that you can use to create professional-looking science fiction and fantasy props and armor. The ultimate collision of creative imagination and practical maker skills, making props and costume armor involves sculpting, molding, casting, 3D printing, CNC fabrication, painting, and countless other techniques and technologies. In this book, you'll learn: Basic fabrication methods using inexpensive, commonly-available tools and materials Simple, low-cost methods to make foam armor out of easy-to-find foam mats How to use the popular Pepakura software to build 3D models with paper Multiple molding and casting techniques How to build a vacuforming machine to make armor from plastic sheet stock Painting and weathering techniques that will bring your props to life Just enough safety advice to keep you from losing body parts along the way Whether you're just a beginner or a seasoned builder with countless projects behind you, this book is sure to be an invaluable addition to your workshop library.

Wild City Thomas Hynes, 2020-05-26 An illustrated guide to 40 of the most well-known, surprising, notorious, mythical, and sublime non-human citizens of New York City, and love letter to its surprising ecological diversity. From refugee parrots and prodigal beavers to gorgeous Fifth Avenue hawks and vengeful groundhogs, Wild City tells the funny, quirky, and memorable stories of forty of New York City's most surprising nonhuman citizens. This unconventional wildlife guide and concise environmental history of the Big Apple includes tales of the well-known, notorious, and legendary creatures who are as much New Yorkers as their human counterparts. A celebration of some of the

city's most surprising residents and a love letter to this always evolving metropolis, Wild City is an enchanting illustrated volume that is a must-have for every Big Apple devotee and animal lover.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Dear Bill William Anderson, William Burling, 1997 (From the Synopsis) The letters passing back and forth between these two Bills trace their day-by-day wartime adventures (and occasional misadventures)

Respiratory Protective Equipment at Work Great Britain, Health and Safety Executive Staff, Great Britain. Health and Safety Executive, 2013 This fourth edition provides guidance on why respiratory protective equipment (RPE) should be used, what the law says and how to select RPE that is adequate and suitable. It also includes a useful dos and don'ts list for the management and supervision of RPE use. The guidance is aimed principally at employers and the self-employed who wear, or are responsible for workers who wear, RPE. It will also be useful for health and safety specialists, manufacturers and suppliers of RPE. It has been prepared in consultation with industry and updates the 2005 edition

Macromolecules: Structure and Function Finn Wold, 1971 In this book we discuss the status of the structure-function analysis of biological macromolecules and macromolecular complexes. The ultimate goal of the analysis must be to explain all the functional properties of the molecules in question in terms of their completely defined three-dimensional structure, and the analysis thus contains three separate components: the determination of structure, the determination and quantitation of function, and final correlation of this information into the structure-function model. The first component, the structural analysis, is reviewed only briefly, and this book therefore leans heavily on Barker's and Van Holde's books in this series for proper background and documentation for this component. The second component, the analysis of functional properties, is given broader consideration (Chapters 1, 2, 5, and 9), but the main emphasis has been the step-by-step

development of the structure-function models. It is hoped that this approach will clearly illustrate the typical progression of scientific model building from the first clear definition of the problem and the statement of the hypothesis through ever-increasing refinements of experimental tests toward the final answer. It is also hoped that the statements of philosophy, principles, and scientific method that are the bases for this approach are of broad enough validity to survive even after its models have become obsolete. With this approach, it is essential to inform the reader in unequivocal terms that this book is not a summary of final conclusions and complete stories which can be submitted to memory. Each system discussed should be considered very critically, and the models should be evaluated in terms of the available evidence. The only facts are the experimental data; the interpretation of this data into models is only convincing to the extent that it makes logical sense to the individual examining it. Since both space and common sense prohibits a continuous reiteration of this statement throughout the book, be prepared to encounter some models and hypotheses which are based on sound experimental evidence as well as some which have no experimental basis at all. In neither case are they facts, but in either case they represent ideas which can be subjected to further experimental tests. If the book helps to sharpen this critical evaluation of both ideas and the experimental test of the hypotheses, one of its major purposes has been fulfilled.
