*The Roman Imperial Mausoleum in Late Antiquity*

Mark J. Johnson,2014-06-02 This book is the first comprehensive study of the mausolea of the later Roman emperors. Constructed between ca. AD 244 and 450 and bridging the transition from paganism to Christianity within the empire, these important buildings shared a common design, that of domed rotunda. Mark Johnson examines the symbolism and function of the mausolea, demonstrating for the first time that these monuments served as temples and shrines to the divinized emperors. Through an examination of literary sources and the archaeological record, he identifies which buildings were built as imperial tombs. Each building is examined to determine its place in the development of the type as well as for its unique features within the group. Recognizing the strong relationship between the mausolea built for pagan and Christian emperors, Johnson also analyzes their important differences.

**Tanks** Richard Ogorkiewicz,2015-02-20 From an internationally acclaimed expert in the field comes a detailed, analytical and comprehensive account of the worldwide evolution of tanks, from their inception a century ago to the present day. With new ideas stemming from the latest academic research, this study presents a reappraisal of the development of tanks and their evolution during World War I and how the surge in technological development during World War II and the subsequent

Cold War drove developments in armour in Europe and America, transforming tanks into fast, resilient and powerful fighting machines. From the primitive, bizarre-looking Mark V to the Matilda and from the menacing King Tiger to the superlative M1 Abrams, Professor Ogorkiewicz shows how tanks gradually acquired the enhanced capabilities that enabled them to become what they are today - the core of combined-arms, mechanized warfare.

Designing the T-34 Peter Samsonov, 2019-12-27  
When the German army launched Operation Barbarossa - the invasion of the Soviet Union - on June 22, 1941, it was expecting to face and easily defeat outdated and obsolete tanks and for the most part it did, but it also received a nasty shock when it came up against the T-34. With its powerful gun and sloped armour, the T-34 was more than a match for the best German tanks at that time and the Germans regarded it with awe. German Field Marshal von Kleist, who commanded the latter stages of Barbarossa, called it "the finest tank in the world". Using original wartime documents author and historian Peter Samsonov, creator of the Tank Archives blog, explains how the Soviets came to develop what was arguably the war's most revolutionary tank design.

**The Star Rover** Jack London, 1915 The Star Rover is an imaginative flight into man's history, rendered in London's most realistic terms. It is the story of Darrell Standing, condemned to solitary confinement in a corrupt prison, who learns to free his soul from his body and escape his pain, to go winging off through space and time.-From dust jacket.

**The Sweetpotato** Gad Loebenstein, George Thottappilly, 2009-03-21 In the last four decades

of the twentieth century the use of sweetpotato was diversified beyond their classification as subsistence, food security, and famine-relief crop. In developing countries they serve both as human food and for feeding livestock. In Western countries they appeal to health conscious consumers because of their nutritional aspects. The sweetpotato is very high in nutritive value, and merits wider use on this account alone. The book has 2 parts. A general one giving up-to-date information on the history, botany, cultivars, genetic engineering, propagation, diseases and pests, nutritional data and marketing; and a second part presenting data on sweetpotato growing practices in different areas of the world. The information should be useful to researchers, practitioners and crop administrators in different countries.

**Tigers in Combat** Wolfgang Schneider, 2020-09-01 . Hundreds of photos--many of them rare--of Tiger tanks and their crews • Color illustrations by Jean Restayn focus on markings, camouflage, and insignia • Inventories and timelines for each unit In this follow-up to *Tigers in Combat I* (0-8117-3171-5), Wolfgang Schneider turns his attention to the Tiger tanks of the Waffen-SS and the Wehrmacht's named units, such as the Großdeutschland Division, Company Hummel, and Tiger Group Meyer. Based on combat diaries, the text tells the history of each unit, but most of the book is devoted to photos of the tanks and the men who manned them. It offers as unique and comprehensive a look at these lethal machines as is possible decades after World War II.

**Jane's World War II Tanks and Fighting Vehicles** Leland S. Ness, 2002 This is the land equivalent of Jane's Battleships, a comprehensive encyclopaedia of all the combat vehicles of World War II from Somaliland to Japan. *The British Reconnaissance Corps in World War II* Richard Doherty, 2007-03-27 Osprey's study of Britain's Reconnaissance Corps of World War II (1939-1945). Either creeping through the landscape or mounted in armored cars and Bren carriers, Reconnaissance Regiments became a vital addition to all British infantry divisions. After the disastrous defeat in France in 1940, at the hands of German forces with strong reconnaissance units mounted in light armored vehicles, the Bartholomew Committee called for the formation of a British equivalent. This was achieved by forming the new elite Reconnaissance Corps. Their spearhead role meant that they were consistently at the forefront of all dramatic action, and most famously served with the 1st and 6th Airborne at Arnhem and with the Chindits in Burma. Within every theater of war, ranging from the jungles to the deserts, the Reconnaissance Corps made a critical contribution to the Allied war effort. However, with the disbandment of the Corps at the end of the war, their record has been unjustly forgotten. With a selection of rare and unpublished frontline photographs taken from private collections, this fascinating new insight into a forgotten elite unit of the British Army recounts the experiences of those soldiers who operated ahead of the army throughout the course of the war.

**Tiger I & Tiger II** Anthony Tucker-Jones, 2013-07-17 A pictorial history and analysis

of the infamous World War II German tanks. The German Tiger I and Tiger II (known to the Allies as the King Tiger or Royal Tiger) were the most famous and formidable heavy tanks of the Second World War. In their day, their awesome reputation inspired such apprehension among Allied soldiers that the weaknesses of these brilliant but flawed designs tended to be overlooked. Anthony Tucker-Jones, in this illustrated history, tells the story of their conception and development and reconsiders their operational history, and he dispels the myths that have grown up around them. The Tigers were over-engineered, required raw materials that were in short supply, and were time-consuming to manufacture and difficult to recover from the battlefield. Only around 1,300 of the Tiger I and fewer than 500 of the Tiger II were produced, so they were never going to make anything more than a local impact on the outcome of the fighting on the Western and Eastern fronts. Yet the myth of the Tigers, with their 88mm guns, thick armor, and brutal profiles, has grown over time to the extent that they are regarded as the deadliest tanks of the Second World War. Anthony Tucker-Jones's expert account of these remarkable fighting vehicles is accompanied by a series of color plates showing the main variants of the designs and the common ancillary equipment and unit markings. His book is an essential work of reference for enthusiasts.

Airborne Warfare James Maurice Gavin, 2020-04-13  
To every member of the 82nd Airborne Division who dropped as part of the American paratroop landings during World War Two, they breathed a little easier knowing their commander Jumpin' Jim Gavin would be jumping with them. General Gavin's paratroops drop-landed and fought in Sicily, Normandy on D-Day and during the abortive attempt to capture the Rhine bridges during Operation Market-Garden. He shared the risks of all his men

parachuting into enemy territory, often only armed with his GI issue rifle. His memoirs are an outstanding addition to the literature of the Airborne in World War II.
