F-22 Raptor Steve Pace,1999 Provides history on America's next generation of fighter plane, known as the F-22 Raptor.

Lockheed Martin F/A-22 Raptor Jay Miller,2005 Initially referred to as the Advanced Tactical Fighter (ATF), the F-22 was designed to meet a USAF requirement for 750 new fighters to replace the F-15 Eagle. Work began in the early 1980s, and competition selection resulted in orders for flying demonstration prototypes of the YF-22 and the Northrop YF-23. The first of two prototypes was flown on 29th September 1990, and extensive testing and evaluation took place during that decade. In 1993 an air-to-ground attack role using precision-guided munitions was added to the original air superiority role, and the designation has been changed to F/A-22 to reflect this. The F-22 is designed to supercruise at up to Mach 1.5 without use of the afterburner, and its unusual layout is

designed for agility as well as to incorporate stealth characteristics. A planned two-seat trainer version, the F-22B was cancelled, but production deliveries are now taking place, with service introduction planned for 2005. Author Jay Miller has followed the program closely to produce an extensively researched and well-illustrated review of this topical new fighter in the well-established and acclaimed Aerofax style and depth.

Lessons Learned from the F/A-22 and F/A-18 E/F Development Programs Obaid Younossi,2005 How can the Air Force and the other services profit from the experience of these two

programs? Although the F/A-18E/F is an upgrade of an existing airframe and the F/A-22 is a new platform, the authors believe their divergent histories have lessons to teach acquisition decisionmakers. The authors present a history of the two programs and conclude that decisionmakers can reduce risk and improve acquisition by taking several steps, including setting realistic schedule and cost estimates and establishing a stable and experienced development team.

F-22 Model Glenn Hoover, 2018-10-27 This book contains detailed instructions on building the F-22 Raptor 1/48 scale model aircraft from Hasegawa. A spiral bound version is available at glennhoovermodels.com You really need this book to successfully build this model. This model has over 600 kit and aftermarket parts with hundreds of decals. Can any sane modeler keep track of this build? The likelihood of you missing a part or doing a step out of order where you can't go back and fix because it's too late are high. In addition to the kit's instructions, there are 6 aftermarket kits each with their own instruction. Can you imagine merging all of these instructions? Well, I've done that for you and more. I take the model kit instructions from Hasegawa and break them up into individual steps. I reorder the steps so that the small pieces (antennas, etc.) are assembled last which reduces the risk of damage when building the model. The steps are organized to insert the paint and decal steps in the best spot. I also incorporate Eduard's Photo Etch sets 48619, 48669, 49514, and 49534 along with Hasegawa's QG39 PE set and Wolfpack's Nozzle Set in with Hasegawa's instructions. As most modelers know, it can be tricky to go back and forth between the

model kit instructions and the aftermarket kit instructions. I took out the guesswork and did that for you. The aftermarket steps are color coded making them easy to skip if you just have the basic model. This book provides a little history of the Raptor, photos of the model kit contents including the aftermarket kits, a detailed list of tools that I used to build this model, along with a list of paints. The actual instruction section contains 1208 steps and 140 plus figures over 194 pages that tell you what to dry fit, glue, and/or paint for each individual piece. Each step instruction shows the source (i.e., either Hasegawa or aftermarket instruction) along with a block to mark that you completed the step. The major instruction sequence for this model is 1. Cockpit 2. Main Weapon Bay 3. Sub-weapon Bay 4. Nose Landing Gear Wheel Well 5. Main Landing Gear Wheel Well 6. Engine Exhausts 7. Engine Intake 8. Join Upper & Lower Fuselage Sections 9. Flaps and Stabilizer Dry Fit 10. Paint Prep with Canopy 11. Camo Paint 12. Decals 13. Exhaust Nozzles 14. Landing Gear 15. Weapons Bay Doors 16. Canopy 17. Pilot 18. Engine Covers 19. Landing Gear. I provide an index of the individual sprue parts that show where in the book the part is mentioned. This index was a great way to make sure that no pieces were overlooked. Finally, there are several pages of in-process photos with assembly tips and the final photos of my build for reference. This book is a great checklist to make your build go smoothly. Of course, you can feel free to use different tools, paint, weathering, etc. or even add your own diorama. I did a lot of research and didn't see anything this detailed about a model build. Most articles or videos concentrate on parts of their build or just give a summary review. I wanted to go down to the piece level and take you thru the whole build. Anyway, I hope you find this book useful. See a 16-page sample along with photos of finished models and other books at glennhoovermodels.com.

Lockheed-Martin F-22 Raptor Mike Wallace, William G. Holder, 1998 It's called the Raptor.

The F-22 will be the U.S. Air Force's premier fighter for the first decades of the 21st century. Like other expensive military programs, the F-22 endured continuous scrutiny throughout its development - the aircraft that evolved was worth the wait. The F-22 is definitely top gun - it is more agile than current U.S. aircraft, has stealth capability, and is flexible in both air-to-air and air-to-ground attack missions. The Raptor is planned to start operational service with the U.S. Air Force in the year 2004, and when on-line, will provide a capability far beyond that of any other fighter aircraft.
