Sustainable Surfing Gregory Borne, Jess Ponting, 2017-03-16 Whilst being an ambiguous and contested concept, sustainability has become one of the twenty-first century's most pervasive ideas, as humanity's increasing impact on the environment, as well as increasing social and economic inequalities, have local and global consequences. Surfing is a globally recognised cultural phenomenon whose unique connection with nature and rapid expansion into a multibillion pound industry offers exciting synergies for exploring various dimensions of sustainability. This book is the first to bring together the world's foremost experts on the themes of sustainability and surfing. Drawing upon cutting edge theory and research, this book offers multidisciplinary perspectives and methodological approaches on the social, environmental and economic components of sustainable surfing. Contributions provide unique discussions that bridge the gap between theory and practice, exploring topics such as sustainable surf tourism, surf-econometrics, surf activism, surfing governance, the surfing industry, and technological advancements. Each chapter produces in-depth insights to provide foundational insights of the relationship between sustainability and surfing. This book will appeal to multiple audiences in different disciplines and sectors. Practitioners will benefit from the insights presented in this volume, while both undergraduate and postgraduate students will find this volume an invaluable companion, including those working in geography, environmental studies, sport sciences, and leisure and tourism studies.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and

that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Surfing and Sustainability Gregory Borne, 2018-07-04 Surfing and Sustainability presents a new way of understanding the impact of surfing on the environment, society and the economy, providing important insights into the field of sustainability and arguing that the activity of surfing offers a unique opportunity to explore the ambiguity of sustainability. The book contextualises surfing within current debates on sustainability and applies

these debates to an innovative theoretical framework drawn from elements of a risk society and sociotechnical transitions. The book discusses the capacity of surfing to influence behaviour, both at an individual and organisational level, exploring sustainability from a range of perspectives including industry, the charity sector, media and celebrity culture. Featuring a range of international case studies, it analyses the greening of the surf industry through topics such as ECOBOARD surfboard manufacturing, business innovation and branding, environmental activism, information technology and surf forecasting, as well as the expansion of artificial wave technology. The book also considers the future directions of surfing and how the inclusion of surfing in the 2020 Olympic Games will impact sustainability debates. This is important reading for academics and scholars, as well as undergraduate and postgraduate students working and studying in sports studies, sociology, geography, economics, psychology, marine science, coastal management and economics. It is also a valuable resource for practitioners across the globe.

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

It includes addresses of publishers, suppliers, agencies and organizations which should be useful for teachers.

Surf Science Tony Butt,2014 Have you ever wondered where surfing waves come from, what makes every wave different, why some peel perfectly and others just close out; why, some days, the waves come in sets and other days they don't, and how the tides, the wind and the shape of the sea floor affect the waves for surfing? If you have, this book is for you. Now in its third edition, Surf Science is the first book to talk in depth about the science of waves from a surfer's point of view. It fills the gap between surfing books and waves textbooks, and will help you learn how to predict surf. Surf Science is also a useful introduction to oceanography and the science of waves. You don't need a scientific background to read it - just curiosity and a fascination for waves.

City Lights Stories A. Collection of Stories by Regenerate, 2013-05 You are holding a collection of stories, the aim of this collection is to equip and inspire you to make a positive impact in your own community, through relationships and creative initiatives. In this material, you will read about Dave and Will who developed gardens on wasteland in inner city London council estates, encouraging residents to be part of the process of renewal and creativity by growing plants and vegetables. Will hosts community harvest feasts, bringing together local residents to eat their own locally-grown produce. Andy in his 20s, started a lunch club for isolated elderly people, rallying his student friends to help serve homemade meals in a borrowed church hall. Pauline responded to a news bulletin about the lack of housing for refugees and asylum seekers, by setting up homes across North London to provide safe housing. Annie set up regular meals in her church building for homeless people and rough sleepers. Mark started a football club for local lads from an estate in London, most of whom were from extremely difficult backgrounds and not in education or employment. Countless others have weeded gardens for families referred by social services, mentored children in foster care and painted a wall in a refuge. Abroad, Mick and Ruby moved into an inner city slum community in the heart of Manila for 9 years with their young children. At the heart of City Lights are stories and friendships.
