Under the Sea Origami Duy Nguyen, 2005 From a slithering electric eel to a ferocious barracuda, Duy Nguyen shows you simple paper folding techniques for crafting extraordinary sea creatures. These striking projects, specially designed for Under the Sea Origami, are fun to make using Nguyen's instructions. You don't have to dive under the sea to spot dolphins because these mammals enjoy jumping out of the water. Your origami model will emulate this graceful leaping motion once you create its intricately-folded arched back, fins, and snout. With a long, wide body and whip-like tail, the stingray is a most distinctive-looking fish. It appears to be in mid-flight even though it's nimbly swimming in the water. The hammerhead shark is easily recognized by the shape of its skull. A large tail, made by using mountain and valley folds, rises dramatically to give the hammerhead a great silhouette. The origami blue shark, on the other hand, will attract attention because of its large gaping mouth! To complete the swordfish, you'll need to attach two pieces of folded paper together. Anyone might be frightened by the appearance of a creature that has a swordlike beak and pointy head, unless it was made of paper like this one is! The squid is as fun to create as the swordfish. Its creepy tentacles will take shape after you cut the valley-folded tail into

layers. You will find that these unusual origami projects are among the most original ever designed. Book jacket.

Jungle Animal Origami Duy Nguyen, 2004 Explains how to create numerous jungle animals, including vultures, gorillas, lions, zebras, gazelles, and elephants.

The Life and Times of Pancho Villa Friedrich Katz, 1998 Based on archival research, this study of Pancho Villa aims to separate myth from history. Just-in-time Teaching Scott Simkins, Mark H. Maier, 2010 Just-in-Time Teaching (JiTT) is a pedagogical approach that requires students to answer questions related to an upcoming class a few hours beforehand, using an online course management system. While the phrase just in time may evoke shades of slap-dash work and cut corners, JiTT pedagogy is just the opposite. It helps students to view learning as a process that takes time, introspection, and persistence. Students who experience JiTT come to class better prepared, and report that it helps to focus and organize their out-of-class studying. Their responses to JiTT questions make gaps in their learning visible to the teacher prior to class, enabling him or her to address learning gaps while the material is still fresh in students' minds - hence the label just in time. JiTT questions differ from traditional homework problems in being

designed not only to build cognitive skills, but also to help students confront misconceptions, make connections to previous knowledge, and develop metacognitive thinking practices. Students consequently spend more time on course concepts and ideas, but also read their textbooks in ways that result in more effective and deeper learning. Starting the class with students' work also dramatically changes the classroom-learning environment, creating greater student engagement. This book demonstrates that JiTT has broad appeal across the academy. Part I provides a broad overview of JiTT, introducing the pedagogy and exploring various dimensions of its use without regard to discipline. Part II of the book demonstrates JiTT's remarkable cross-disciplinary impact with examples of applications in physics, biology, the geosciences, economics, history, and the humanities. Souviens-Toi. . . Sydney Eneeh Quarter,2020-08 Élevée dans une famille profondément religieuse, Claire se donne tout entière à sa foi. Pourtant, dès son mariage, ressortent les démons du passé demeurés pendant des années enfouis au plus profond d'elle et dont elle ne soupçonnait pas l'existence. Un événement tragique va l'amener à questionner ses croyances et mettre en doute la sincérité des personnes de son entourage. Elle entame alors un voyage qui, petit à petit, l'amènera à réfléchir sur ce qui a toujours été pour elle «la vérité». Mais réussira-t-elle à en sortir indemne? Et surtout, quelle est cette ombre mystérieuse qui vient lui rendre visite la nuit?

The Conquest of Mexico Hugh Thomas,2004-11 Hugh Thomas' account of the collapse of Montezuma's great Aztec empire under the onslaughts of Cort's' conquistadors is one of the great historical works of our times. A thrilling and sweeping narrative, it also bristles with moral and political issues. After setting out from Spain - against explicit instructions - in 1519, some 500 conquistadors destroyed their ships and fought their way towards the capital of the greatest empire of the New World. When they finally reached Tenochtitlan, the huge city on lake Texcoco, they were given a courtly welcome by Montezuma, who believed them to be gods. Their later abduction of the emperor, their withdrawal and the final destruction of the city make the Conquest one of the most enthralling and tragic episodes in world history.
