Bishop Endings Efstratios Grivas, 2017-10-15 Proper handling of Bishops in the Endgame is an important feature in today's chess and a must for every chess player who wants to climb the world's chess hierarchy. This book deals with all important themes and ideas on the world of Bishop endings.

Pump Up Your Rating Axel Smith, 2013-09-27 Any man in the street knows how to increase his physical strength, but among most chess players confusion reigns when it comes to improving their playing strength. Axel Smith's training methods have guided his friends, teammates and pupils to grandmaster norms and titles. Hard work will be required, but Axel Smith knows how you can Pump Up Your Rating. Every area of chess is covered - opening preparation, through middlegame play, to endgame technique. Smith delves into both the technical and psychological sides of chess, and shows how best to practise and improve.

Slow Travel and Tourism Janet Dickinson, Les Lumsdon, 2010-09-23 It is widely recognized that travel and tourism can have a high environmental impact and make a major contribution to climate change. It is therefore vital that ways to reduce these impacts are developed and implemented. 'Slow travel' provides such a concept, drawing on ideas from the 'slow food' movement with a concern for locality, ecology and quality of life. The aim of this book is to define slow travel and to discuss how some underlining values are likely to pervade new forms of sustainable development. It also aims to provide insights into the travel experience; these are explored in several chapters which bring new knowledge about sustainable transport tourism from across the world. In order to do this the book explores the concept of slow travel and sets out its core ingredients, comparing it with related frameworks such as low-carbon tourism and sustainable tourism development. The authors

explain slow travel as holiday travel where air and car transport is rejected in favour of more environmentally benign forms of overland transport, which generally take much longer and become incorporated as part of the holiday experience. The book critically examines the key trends in tourism transport and recent climate change debates, setting out the main issues facing tourism planners. It reviews the potential for new consumption patterns, as well as current business models that facilitate hyper-mobility. This provides a cutting edge critique of the 'upstream' drivers to unsustainable tourism. Finally, the authors illustrate their approach through a series of case studies from around the world, featuring travel by train, bus, cycling and walking. Examples are drawn from Europe, Asia, Australia and the Americas. Cases include the Eurostar train (as an alternative to air travel), walking in the Appalachian Trail (US), the Euro-Velo network of long-distance cycling routes, canoe tours on the Gudena River in Denmark, sea kayaking in British Columbia (Canada) and the Oz Bus Europe to Australia.

Tourism in the City Nicola Bellini, Cecilia Pasquinelli, 2016-08-29 This book critically explores the interconnections between tourism and the contemporary city from a policy-oriented standpoint, combining tourism perspectives with discussion of urban models, issues, and challenges. Research-based analyses addressing managerial issues and evaluating policy implications are described, and a comprehensive set of case studies is presented to demonstrate practices and policies in various urban contexts. A key message is that tourism policies should be conceived as integrated urban policies that promote tourism performance as a means of fostering urban quality and the well-being of local communities, e.g., in terms of quality spaces, employment, accessibility, innovation, and learning opportunities. In addition to highlighting the significance of urban tourism in relation to key urban challenges, the book reflects on the risks and tensions associated with its development,

including the rise of anti-tourism movements as a reaction to touristification, cultural commodification, and gentrification. Attention is drawn to asymmetries in the costs and benefits of the city tourism phenomenon, and the supposedly unavoidable trade-off between the interests of residents and tourists is critically questioned.

Chess Strategy for the Tournament Player Lev Alburt,Sam Palatnik,2010-06-01 Top grandmasters demystify chessboard planning, giving you the practical, game-winning strategic techniques you could spend years gathering on your own. Chess strategy is the long-term planning at the heart of winning chess. Each important idea is clearly explained using games carefully chosen for their instructive clarity and power. This is the fifth but stand-alone volume of the Comprehensive Chess Course, the series that brings readers of English the once strictly guarded Russian training methods.

Practical Endgame Play - Mastering the Basics Efstratios Grivas,2008 A comprehensive guide to all fundamental chess endings, and a godsend for those looking to improve their endgame play. Crucially, the emphasis is just as much on practical play as it is on theoretical understanding.

A New Era Michael Khodarkovsky,Leonid Aleksandrovich Shamkovich,1997 May, 1997. It was the match that stunned the world: Chess Champion Garry Kasparov was beaten by the massively parallel computer, Deep Blue - an opponent Kasparov had vanquished in 1996. But unlike his human opponent, Deep Blue could be redesigned in the intervening year. The result: the first player - computer or human - ever to win a match against the chess genius. Kasparov's own move-by-move analysis of these games in *A New Era* shows just how much IBM has improved the breed, and how they were spoiling for a fight in this momentous rematch. Yet not all the World Champion's rivals are

machines. Two years before, Garry Kasparov defeated challenger Viswanathan Anand in eighteen demanding and gripping games. Here, for the first time, are move-by-move analyses by International Grandmaster Leonid Shamkovich and by Master - and Kasparov second - Michael Khodarkovsky, which provide insight into the mind of the World Champion as he prepared for his matches against Deep Blue.

U.S. Marine Close Combat Fighting Handbook United States Marine Corps.,2011-01-26 There are currently more than 200,000 active-duty U.S. Marines and another 40,000 in the reserves. These Marines depend on the skills and techniques taught in this concise manual—and now you can too! Today's Marines operate in conflict situations that change from low intensity to high intensity over a matter of hours. This fully-illustrated guide features both the lethal and nonlethal techniques needed to responsibly handle any situation without unnecessarily escalating the violence. The U.S. Marine Close Combat Fighting Handbook explains the methods to quickly neutralize any attacker in close quarters and teaches you how to use any part of the human body as a weapon. It covers breaking a fall, defending against headlocks and chokes, protecting against punches and kicks, surviving armed attackers and more.

Pawn Endings Yuri Averbakh,Ilya Maizelis,2019-02-15 At age 97, Yuri Averbakh is the World's Oldest still living chess grandmaster and is still active in chess. In the ending, the advantage of a single insignificant pawn can frequently prove decisive, as that pawn inexorably pushes forward and is finally able to reach the last rank and is able to transform itself into a queen.

The Woodpecker Method Axel Smith,Hans Tikkanen,2019-02-07 The Woodpecker Method is

the name given by Axel Smith to a training system developed by his compatriot Hans Tikkanen. After training with his method in 2010, Tikkanen achieved three GM norms within a seven-week period. This book contains everything you need to carry out your own Woodpecker training. Smith and Tikkanen explain how to get the maximum benefit from the method, before presenting over 1100 puzzles and solutions.

Questioning in the Secondary School Dr George A Brown, Prof E C Wragg, 2003-07-13 The ability to ask intelligent and searching questions, to use questioning for different purposes and to know what to do with the answers is crucial to teachers of all subjects and age groups. Sometimes a whole lesson can be built around one or two key questions. Ted Wragg and George Brown explore the wide range of questions that teachers can ask, from those requiring simple recall of information right up to those that stimulate complex reasoning, imagination and speculation. The book explores the various strategies open to teachers and, through a combination of activities and discussion points, helps them to: * reflect upon their use of questions * develop their approaches to preparing, using and evaluating questions * explore ways to encourage pupils to ask questions. This book is one of a set of eight innovative yet practical resource books for teachers, focussing on the classroom and covering vital skills for primary and secondary teachers. The books are strongly influenced by the findings of numerous research projects during which hundreds of teachers were observed at work. The first editions of the series were bestsellers and these revised second editions will be equally welcomed by teachers eager to improve their teaching skills.
