3.5-Inch Rocket Launcher Super Bazooka Field Manual: FM 23-32 Department of the Army, 2013-10 The 3.5-inch rocket launcher, also known as the super bazooka, was introduced in early 1950 and saw considerable action throughout the Korean War. The success of the powerful German Panzerschreck 88mm anti-tank rocket caused the United States to completely rethink the bazooka at the close of World War II. Based on the Panzerschreck's design, the M20 was significantly larger than the 2.36-inch bazooka of WWII. Though bearing a superficial resemblance to the Nazi weapon, the M20 had greater effective range, power and accuracy. The M20 was a two-piece, smooth-bore weapon weighing only twelve pounds with an assembled length of sixty inches. It fired a shaped charge that concentrated the force of the explosion on a very small area, thus allowing the projectile to penetrate armor plate as thick as eleven inches. It boasted a range of up to 900 yards. In addition to the M20 model, the Army produced further developments designated M20A1/A1B1 and M20B1. Similar to the M20, they boasted various simplified components including latch assemblies, and in the case of the M20B1 aluminum barrels. Created in 1961, this field manual reveals a great deal about the 3.5-inch rocket launcher M20A1 and M20A1B1's design and capabilities. Intended as a manual for those charged with operation and maintenance, it details many aspects of its controls, ammunition and sighting equipment. Originally labeled restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text.

The Rocket Book Robert L. Cannon, Michael A. Banks, 1985

The Bazooka Gordon L. Rottman, 2012-06-20 Most belligerents entering World War II armed their infantry with bulky and ineffectual anti-tank rifles as their primary means of combating tanks. US planners realized that what infantrymen needed was a relatively lightweight, man-portable anti-tank weapon that was simple to operate, accurate, and capable of knocking out the average tank at a reasonable range, while also being effective against fortified buildings, pillboxes, and personnel in the open. The bazooka combined a revolutionary new anti-tank rifle-grenade warhead, a much-modified British anti-aircraft rocket motor, and a cobbled-together launcher tube and electrical firing system; its first test-firing astounded observers, and it was immediately adopted by the US armed forces. Featuring specially drawn colour artwork, this engaging study tells the story of the bazooka, which set the standard for future light anti-tank weapons and their ammunition, and was a key influence on anti-tank tactics and techniques in the post-war era.

The Assault on Peleliu Frank Hough, 2023-12-06 *The Assault on Peleliu*, first published in 1950, is a detailed recounting of the U.S. Marines' fierce battle for the Peleliu, part of the Palau Islands in the south Pacific. Facing approx. 11,000 hardened, entrenched Japanese troops, the 1st Marine Division began landing operations on September 15, 1944. A Life Decoded J. Craig Venter, 2007-10-18 The triumphant memoir of the man behind one of the greatest feats in scientific history Of all the scientific achievements of the past century, perhaps none can match the deciphering of the human genetic code, both for its technical brilliance and for its implications for our future. In *A Life Decoded*, J. Craig Venter traces his rise from an uninspired student to one of the most fascinating and controversial figures in science today. Here, Venter relates the unparalleled drama of the quest to decode the human genome—a goal he predicted he could achieve years earlier and more cheaply than the government-sponsored Human Genome Project, and one that he fulfilled in 2001. A thrilling story of detection, *A Life Decoded* is also a revealing, and often troubling, look at how science is practiced today.

U.S. Marines In Vietnam: Fighting The North Vietnamese, 1967 Maj. Gary L. Telfer, Lt.-Col. Lane Rogers, Dr. V. Keith Fleming Jr., 2016-08-09 This is the fourth volume in an operational and chronological series covering the U.S. Marine Corps' participation in the Vietnam War. It also covers the Marine Corps participation in the advisory effort, the operations of the two Special Landing Forces of the U.S. Navy's Seventh Fleet, and the services of Marines with the staff of the U.S. Military Assistance Command, Vietnam. There are additional chapters on supporting arms and logistics, and a discussion of the Marine role in Vietnam in relation to the overall American effort.

A History of Innovation: U.S. Army Adaptation in War and Peace Jon T.

Hoffman, 2010-01-15 The U.S. Army has a long record of fielding innovations that not only have enhanced its effectiveness on the battlefield but also sometimes had an impact far beyond warfare. General Editor Jon T. Hoffman has brought together eleven authors who cover the gamut from the invention of the M1 Garand rifle between the world wars through the development of the National Training Center in the 1980s. While many books lay out theories about the process of innovation or detail the history of a large-scale modernization, the collection of fourteen essays in *A History of Innovation: U.S. Army Adaptation in War and Peace* fills a different niche in the literature. This work is neither a historical account of how the Army has adapted over time nor a theoretical look at models that purport to show how innovation is best achieved. Instead, it captures a representative slice of stories of soldiers and Army civilians who have demonstrated repeatedly that determination and a good idea often carry the day in peace and war. Despite the perception of bureaucratic inertia, the institution's long history of benefiting from the inventiveness of its people indicates that it is an incubator of innovation after all.
