Reexamining Military Acquisition Reform Christopher H. Hanks,2005 In the Department of Defense, 63 distinct acquisition reform (AR) initiatives were undertaken from 1989 to 2002. By looking at what the AR movement was in the 1990s (by describing the initiatives launched under its name) and by letting acquisition personnel describe in their own words how their work was affected by those initiatives, the authors seek to shed light on what the AR movement has and has not accomplished in terms of changing the way the acquisition process works.

**Recalibrating U.S. Strategy toward Russia** Kathleen H. Hicks,Lisa Sawyer Samp,2017-04-12 These are turbulent times for American foreign policy. Nowhere are the challenges facing the United States more evident than in U.S. policy toward Russia. Drawing on scholars across several disciplines and perspectives, CSIS conducted a year-long study that sought to achieve two goals. First, to provide policymakers with a clearer understanding of Russia’s strategic motivations and objectives, along with the tools it uses to advance its goals. Second, to lay out a comprehensive strategy to secure U.S. and transatlantic interests in the face of the complex Russia challenge set.

**Air Operations in Israel's War Against Hezbollah** Benjamin S. Lambeth,2011 In response to a surprise incursion by Hezbollah combatants into northern Israel and their abduction of two Israeli soldiers, Israel launched a campaign that included the most complex air offensive to have taken place in the history of the Israeli Air Force (IAF). Many believe that the inconclusive results of this war represent a failure of air power. The author demonstrates that this conclusion is an oversimplification of a more complex reality. He assesses the main details associated with the Israeli Defense Forces' (IDF's) campaign against Hezbollah to correct the record regarding what Israeli air power did and did not accomplish (and promise to accomplish) in the course of contributing to that campaign. He considers IAF operations in the larger context of the numerous premises, constraints, and ultimate errors in both military and civilian leadership strategy choice that drove the Israeli government's decisionmaking throughout the counteroffensive. He also examines the IDF's more successful operation against the terrorist organization Hamas in the Gaza Strip in December 2008 and January 2009, to provide points of comparison and contrast in the IDF's conduct of the latter campaign based on lessons learned and assimilated from its earlier combat experience in Lebanon.--Publisher description.

We are printing this in black and white to keep the price low. It presents many of the acquisition programs currently fielded or in development. The U.S. Army Acquisition Corps, with its 36,000 professionals, bears a unique responsibility for the oversight and systems management of the Army's acquisition lifecycle. With responsibility for hundreds of acquisition programs, civilian and military professionals collectively oversee research, development and acquisition activities totaling more than \$20 billion in Fiscal Year 2016 alone. Why buy a book you can download for free? We print this so you don't have to. We at 4th Watch Publishing are former government employees, so we know how government employees actually use the standards. When a new standard is released, somebody has to print it, punch holes and put it in a 3-ring binder. While this is not a big deal for a 5 or 10-page document, many DoD documents are over 400 pages and printing a large document is a time- consuming effort. So, a person that's paid \$25 an hour is spending hours simply printing out the tools needed to do the job. That's time that could be better spent doing mission. We publish these documents so you can focus on what you are there for. It's much more cost-effective to just order the latest version from Amazon.com.
