*Browning .50-caliber Machine Guns* Gordon L. Rottman,2011-01-01 The Browning “50-cal” has become the longest serving weapon in the US inventory. The “fifty” has been employed in every imaginable role for a machine gun. It is considered such an effective and reliable weapon that few countries ever attempted to develop an equivalent weapon. Even the Japanese created a copy of it during World War II when the US was producing literally thousands every month to use in every theater. This is a history of the development of this famous weapon, its most critical operational use and the variants that have been produced to keep it at the forefront of the action.

*Browning .30-caliber Machine Guns* Gordon L. Rottman,2014-02-20 First adopted in 1917, the rugged and reliable Browning .30-caliber machine gun remained in US service into the Vietnam era, and is still occasionally found in use elsewhere even today. Produced in both water-cooled and air-cooled versions, it has been employed in every imaginable role for a machine gun – antipersonnel, antiaircraft, mounted on aircraft as both defensive and offensive armament, defensive armament aboard vehicles (armored and soft-skin), mounted on watercraft, and others. Employing gripping first-hand testimony and featuring specially commissioned illustrations and detailed photographs, many in color, this lively study of the Browning .30-caliber machine gun reveals the origins, combat history and legacy of this versatile and dependable weapon.

Browning Machine Gun Caliber .50 Hb, M2 U.S Army,2008-07-01 What makes a heavy machine gun designed and developed in the latter days of World War I still relevant to modern militaries? Reliability, durability and longevity, coupled with a hard-hitting, accurate .50-caliber cartridge designed specifically for this machine gun from the .30-06 cartridge - one of the most successful, versatile and popular rifle cartridges ever.

How It Works Fred Zeglin,2021-05 History of the Browning .50 Caliber M2 machine gun written by Fred Zeglin adds to the reprint of these training manuals. Original manuals were prepared for the Ordnance Department during WW II. They were used for training courses for armorers and gunners respectively. This reprint contains two publications. The first and larger of the two was designed to aid in training armorers. The second was a much smaller format and was used to train gunners with very similar information in a condensed form. Both books have become collectable among fans of the Ma Deuce. Anyone who loves history or has an interest in the tools that helped win the second World War will enjoy these books. Lots of illustrations add to the value and interest as well.

*The M60 Machine Gun* Kevin Dockery,2012-11-20 The US M60 General Purpose Machine Gun, known as “the Pig,” was developed in the years after World War II from two revolutionary German designs. Adopted in 1957, the M60 came into its own in the jungles, hamlets, and city streets of Southeast Asia during the Vietnam War. “Humping the Pig” became common in US military squads, with at least one soldier equipped with an M60 and every squad member carrying ammunition for it. The M60 design transformed infantry tactics as squads took advantage of the immediate volume of fire offered by the design. Although it has now been replaced by the M240 series of weapons in US infantry and mechanized units, the M60 is still in common use with the US armed forces. Meanwhile, its iconic status has been assured by its frequent appearance in many popular films and television shows, from Full Metal Jacket to The A Team. Featuring specially commissioned full-color artwork, this is the full story of the M60, the innovative squad base-of-fire weapon that has equipped the US military from the jungles of Vietnam to the deserts of Iraq.
