The Art of Madagascar 3 Barbara Robertson,2012-05-15 The Art of Madagascar 3 provides a fascinating look at the character design, development art, and special effects that make up this stunning CG movie from the artists at DreamWorks Animation. In the third installment of the Madagascar series, Alex the lion, Marty the zebra, Gloria the hippopotamus, and Melman the giraffe set out to return to New York. Dependent on the mechanical know-how of the notorious Penguins, their plan inevitably goes awry, and they find themselves stranded in Monte Carlo, where they join up with a traveling circus by chance. Led by the venerable tiger Vitaly, the animal-centered circus has seen better days. During the course of a tour through Europe that ends in a fabulous big top in the heart of London, Alex, Marty, Gloria, and Melman help Vitaly, Gia the jaguar, and Stefano the sea lion rediscover their passion for show business and reinvent the circus while being chased by the notorious animal control officer, Madame Dubois. A treat for fans of all ages, The Art of Madagascar 3 is a joyous celebration of these lovable characters and the artistry that brought them to life.

Wild Things Jack Halberstam,2020-10-02 In Wild Things Jack Halberstam offers an alternative history of sexuality by tracing the ways in which wildness has been associated with queerness and queer bodies throughout the twentieth century. Halberstam theorizes the wild as an unbounded and unpredictable space that offers sources of opposition to modernity's orderly impulses. Wildness illuminates the normative taxonomies of sexuality against which radical queer practice and politics operate. Throughout, Halberstam engages with a wide variety of texts, practices, and cultural imaginaries—from zombies, falconry, and M. NourbeSe Philip's Zong! to Maurice Sendak's Where the Wild Things Are and the career of Irish anticolonial revolutionary Roger Casement—to demonstrate how wildness provides the means to know and to be in ways that transgress Euro-American notions of the modern liberal subject. With Wild Things, Halberstam opens new possibilities for queer theory and for wild thinking more broadly.

The Queer Art of Failure Jack Halberstam,Judith Halberstam,2011-09-19 DIVProminent queer theorist offers a new theory of culture knowledge drawn from popular texts and films./div

The Nonborn King Julian May,1983-02-18 In Pliocene Europe, warring races of aliens and humans face a new threat from North America in the third novel of the Locus Award-winning sci-fi series. A group of misfits from the twenty-second century have travelled six million years back in time to the Pliocene Epoch. But instead of an uninhabited paradise, they discover a land overrun with two alien races—each possessing great psychic powers—locked in bitter war. After escaping the knightly Tanu, a group of humans forms an uneasy alliance with the dwarfish Firvulag. But even after they succeed in destroying the Tanu capital, the war is far from over. Aiken Drum, a human with awesome mental powers, has usurped the Tanu throne. Aiken faces opposition from skeptical Tanu factions, as well as the revitalized Firvulag, who now outnumber the Tanu-human coalition that Aiken has patched together. But another menace emerges to threaten Aiken's rule: a group of fearsome rogues from the year 2083, who have been living quietly in North America for decades. Led by Marc Remillard, they now seek to take advantage of the chaos in King Aiken's Many-Colored Land in order to seize control of the time-portal. The Nonborn King features the same blend of adventure, rich pageantry, humor, and fantastic eroticism that characterized The Many-Colored Land and The Golden Torc.

The Heritage Crusade and the Spoils of History David Lowenthal,1998-05-13 A paperback edition of a critically-acclaimed 1998 study of the meaning and effects of 'Heritage'.

The State of the World's Biodiversity for Food and Agriculture Food and Agriculture Organization of the United Nations,2019-03-12 The State of the World's Biodiversity for Food and Agriculture presents the first global assessment of biodiversity for food and agriculture worldwide. Biodiversity for food and agriculture is the diversity of plants, animals and micro-organisms at genetic, species and ecosystem levels, present in and around crop, livestock, forest and aquatic production systems. It is essential to the structure, functions and processes of these systems, to livelihoods and food security, and to the supply of a wide range of ecosystem services. It has been managed or influenced by farmers, livestock keepers, forest dwellers, fish farmers and fisherfolk for hundreds of generations. Prepared through a participatory, country-driven process, the report draws on information from 91 country reports to provide a description of the roles and importance of biodiversity for food and agriculture, the drivers of change affecting it and its current status and trends. It describes the state of efforts to promote the sustainable use and conservation of biodiversity for food and agriculture, including through the development of supporting policies, legal frameworks, institutions and capacities. It concludes with a discussion of needs and challenges in the future management of biodiversity for food and agriculture. The report complements other global assessments prepared under the auspices of the Commission on Genetic Resources for Food and Agriculture, which have focused on the state of genetic resources within particular sectors of food and agriculture.

The First Global Integrated Marine Assessment United Nations,2017-04-17 The World Ocean Assessment - or, to give its full title, The First Global Integrated Marine Assessment - is the outcome of the first cycle of the United Nations' Regular Process for Global Reporting and Assessment of the State of the Marine Environment, including Socioeconomic Aspects. The Assessment provides vital, scientifically-grounded bases for the consideration of ocean issues, including climate change, by governments, intergovernmental agencies, non-governmental agencies and all other stakeholders and policymakers involved in ocean affairs. Together with future assessments and related initiatives, it will support the implementation of the recently adopted 2030 Agenda for Sustainable Development, particularly its ocean-related goals. Moreover, it will also form an important reference text for marine science courses.

Corporate Crime in the Pharmaceutical Industry (Routledge Revivals) John Braithwaite,2013-10-08 First published in 1984, this book examines corporate crime in the pharmaceutical industry. Based on extensive research, including interviews with 131 senior executives of pharmaceutical companies in the United States, the United Kingdom, Australia, Mexico and Guatemala, the book is a major study of white-collar crime. Written in the 1980s, it covers topics such as international bribery and corruption, fraud in the testing of drugs and criminal negligence in the unsafe manufacturing of drugs. The author considers the implications of his findings for a range of strategies to control corporate crime, nationally and internationally.

Handbook of Venoms and Toxins of Reptiles Stephen P. Mackessy,2021-05-24 A decade after publication of the first edition, Handbook of Venoms and Toxins of Reptiles responds to extensive changes in the field of toxinology to endure as the most comprehensive review of reptile venoms on the market. The six sections of this new edition, which has nearly doubled in size, complement the original handbook by presenting current information from many of the leading researchers and physicians in toxinology, with topics ranging from functional morphology, evolution and ecology to crystallography, -omics technologies, drug discovery and more. With the recent recognition by the World Health Organization of snakebite as a neglected tropical disease, the section on snakebite has been expanded and includes several chapters dealing with the problem broadly and with new technologies and the promises these new approaches may hold to counter the deleterious effects of envenomation. This greatly expanded handbook offers a unique resource for biologists, biochemists, toxicologists, physicians, clinicians, and epidemiologists, as well as informed laypersons interested in the biology of venomous reptiles, the biochemistry and molecular biology of venoms, and the effects and treatment of human envenomation.

Herbal Drugs: Ethnomedicine to Modern Medicine Kishan Gopal Ramawat,2008-11-25 Considerable progress has been made in our healthcare system, in particular with respect to sensitive diagnostic tools, reagents and very effective and precise drugs. On the other hand, high-throughput screening technology can screen vast numbers of compounds against an array of targets in a very short time, and leads thus - tained can be further explored. In developing countries, the exploding population exerts pressure not only on natural resources but also on the human population - self, whose members strive to become successful and advance in society. This leads to increased blood pressure, anxiety, obesity-associated lipid disorders, cardiov- cular diseases and diabetes. Most of these diseases result in disturbed family life, including sexual behaviour. Despite technological developments, herbal drugs still occupy a preferential place in a majority of the population in the Third World and terminal patients in the West. Herbal drugs, in addition to being cost effective and easily accessible, have been used since time immemorial and have passed the test of time without having any side effects. The multitarget effects of herbs (holistic approaches) are the fun- mental basis of their utilization. This approach is already used in traditional systems of medicine like Ayurveda, which has become more popular in the West in recent years. However, the integration of modern science with traditional uses of herbal drugs is of the utmost importance if ones wishes to use ancient knowledge for the betterment of humanity.

Popular Conservatism and the Culture of National Government in Inter-War Britain Geraint Thomas,2020-11-05 This radical new reading of British Conservatives' fortunes between the wars explores how the party adapted to the challenges of mass democracy after 1918. Geraint Thomas offers a fresh perspective on the relationship between local and national Conservatives' political strategies for electoral survival, which ensured that Conservative activists, despite their suspicion of coalitions, emerged as champions of the cross-party National Government from 1931 to 1940. By analysing the role of local campaigning in the age of mass broadcasting, Thomas re-casts inter-war Conservatism. Popular Conservatism thus emerges less as the didactic product of Stanley Baldwin's consensual public image, and more concerned with the everyday material interests of the electorate. Exploring the contributions of key Conservative figures in the National Government, including Neville Chamberlain, Walter Elliot, Oliver Stanley, and Kingsley Wood, this study reveals how their pursuit of the 'politics of recovery' enabled the Conservatives to foster a culture of programmatic, activist government that would become prevalent in Britain after the Second World War.

Gene-Culture Interactions Heewon Kwon,Joni Y. Sasaki,2019-02-07 Examining the interconnections between genes and culture is crucial for a more complete understanding of psychological processes. Genetic predispositions may predict different outcomes depending on one's cultural context, and culture may predict different outcomes depending on genetic predispositions - that is, genes and culture interact. Less is understood, however, about how genes and culture interact, or the psychological mechanisms through which gene-culture interactions occur. In this Element, Heewon Kwon and Joni Y. Sasaki review key findings and theories in gene-culture interaction research. They then go on to discuss current issues and future directions in gene-culture research that may illuminate the path toward an explanatory framework.

The Strike Out King Julian Devries,2013-10 This is a new release of the original 1948 edition.

Great Powers, Small Wars Larisa Deriglazova,2020-03-03 A sophisticated appraisal of the problem of asymmetric conflict in the post-World War II period. In a sophisticated combination of quantitative research and two in-depth case studies, Larisa Deriglazova surveys armed conflicts post World War II in which one power is much stronger than the other. She then focuses on the experiences of British decolonization after World War II and the United States in the 2003 Iraq war. Great Powers, Small Wars employs several large databases to identify basic characteristics and variables of wars between enemies of disproportionate power. Case studies examine the economics, domestic politics, and international factors that ultimately shaped military events more than military capacity and strategy.

Substance Abuse Alan David Kaye,Nalini Vadivelu,Richard D. Urman,2014-12-01 This book is written for any clinician who encounters substance abuse in a patient and wonders what to do. Experts from a cross-section of specialties and health professions provide up-to-date, evidence-based guidance on how non-expert clinicians can recognize, understand, and approach the management of substance abuse in their patients. They detail the range of treatments available and whether and how they work. The central importance of using a carefully selected multimodal approach that is tailored to the individual patient is emphasized throughout and illustrated in case scenarios from actual clinical practice.

Pelvic Organ Dysfunction in Neurological Disease Clare J. Fowler, Jalesh N. Panicker, Anton Emmanuel, 2010-11-04 Pelvic Organ Dysfunction in Neurological Disease describes the neurological control of human bladder, bowel and sexual function and then details the dysfunctions which may arise as a consequence of various neurological diseases. Easy to read, the book will be of value to any healthcare professional managing patients in whom pelvic organ functions have been compromised by neurological disease. The book provides a structured approach to present day understanding of the neurological control of pelvic organs and the investigation and management of each type of organ dysfunction. A unique feature of this book is that it addresses the impact of specific neurological disorders on all three functions. The authors have all been associated with the Department of Uro-Neurology at the National Hospital for Neurology and Neurosurgery, London since it was established 20 years ago. This book is a timely review of their accumulated knowledge and the latest literature.

The French Colonial Mind: Violence, military encounters and colonialism Martin Thomas, 2011-01-01 Violence was prominent in France's conquest of a colonial empire, and the use of force was integral to its control and regulation of colonial territories. What, if anything, made such violence distinctly colonial? And how did its practitioners justify or explain it? These are issues at the heart of *The French Colonial Mind: Violence, Military Encounters, and Colonialism*. The second of two linked volumes, this book brings together prominent scholars of French colonial history to explore the many ways in which brutality and killing became central to the French experience and management of empire. Sometimes concealed or denied, at other times highly publicized and even celebrated, French violence was so widespread that it was in some ways constitutive of colonial identity. Yet such violence was also destructive: destabilizing for its practitioners and lethal or otherwise devastating for its victims. The manifestations of violence in the minds and actions of imperialists are investigated here in essays that move from the conquest of Algeria in the 1830s to the disintegration of France's empire after World War II. The authors engage a broad spectrum of topics, ranging from the violence of first colonial encounters to conflicts of decolonization. Each considers not only the forms and extent of colonial violence but also its dire effects on perpetrators and victims. Together, their essays provide the clearest picture yet of the workings of violence in French imperialist thought.
