The Official 9mm Makarov Pistol Manual James F. Gebhardt, 1994-06-01

The Makarov Pistol Henry C. Brown, Cameron S. White, Edwin H. Lowe, 2018-06-25 The Makarov Pistol entered service as the primary service pistol in the armed forces and security services of the Soviet Union in 1951. It continues to serve in the forces of the Russian Federation and the former Soviet Union, and of nations around the world. The Makarov Pistol has served around the world in conflicts and security duties in all climates and terrains, and can claim the distinction of being the first firearm to be carried into space. The Makarov Pistol was manufactured under license by China and Bulgaria, for

both military and police, and commercial markets. Chinese and Bulgarian manufactured Makarov Pistols are well known to collectors, each for different reasons. Chinese military and police Type 59 Pistols were produced for a very short period of time, had a very limited service life, and were never officially exported as surplus, making the few rare samples available, the most coveted of Makarov Pistols for the collector. Similarly, commercial Chinese Makarov Pistols were exported for only a short period in the late 1980s and early 1990s, making these the rarer of commercial Makarovs and collectibles in their own right. In contrast, Bulgarian Makarovs, in both military and police, and commercial versions, were exported in large quantities into the early years of the 21st century, making these the workhorse Makarovs of conflicts around the world, and a standard item for the Makarov collector and shooter. While collectors have been documenting and recording the many aspects of Chinese and Bulgarian Makarov Pistols over the last 25 years, little has been known of their design and production beyond speculation and 'gun show wisdom'. For the first time, this information is presented in a systematic manner, based on research using a wide range of documentary and open source information. Information about the Chinese Makarov in particular, its production and service life, is based on research from Chinese language sources and is presented for the first time for the English language reader. This book also reviews examples of 'craft production' Makarovs, the so-called 'Khyber Pass' copies, each one a unique hand crafted copy, and a trophy of the conflicts of the 21st century. This book describes the craft production of small arms in the Khyber Pass region of Pakistan, and the distinguishing features of Khyber Pass Makarovs. 'The Makarov Pistol: China, Bulgaria & Khyber Pass Copies' is the second volume of

a two volume series documenting the history, features, manufacturing variations and markings of the Makarov Pistol, its accessories and documentation available to the collector. This is a series by collectors, for collectors, and it is the first comprehensive collector's review of the Makarov Pistol.

The Makarov Pistol Henry C Brown, Cameron S White, 2016-09-23 The Makarov Pistol entered service as the primary service pistol in the armed forces and security services of the Soviet Union in 1951. It continues to serve in the forces of the Russian Federation, and the former Soviet Union, and of nations around the world. It has been estimated that some 5 million Makarov pistols had been produced in the Soviet Union and Russian Federation alone up 2002, and production continues for military, police and civil markets in Russia to this day. Additionally, the Makarov Pistol was also produced under license in East Germany, Bulgaria and China. The Makarov Pistol has served around the world in conflicts and security duties in all climates and terrains, and can claim the distinction of being the first firearm to be carried into space. Despite the large numbers and the widespread use of the Makarov Pistol, it remained a rare and little known firearm among western collectors until the end of the Cold War. In the 1990s however, large numbers of Makarov Pistols, accessories and its previously unobtainable 9x18mm cartridge were exported to the west with the end of the Cold War and the collapse of the Eastern Bloc, opening up a new field of firearms collecting. While collectors have been documenting and recording the many aspects of the Makarov Pistol over the last 25 years, this information has never been systematically consolidated into a handy reference book - until now. This book documents the Makarov

Pistols produced by the Soviet Union and Russian Federation, and the Pistole M, the version produced in East Germany. This is the first volume of a two volume series documenting the history, features, manufacturing variations and markings of the Makarov Pistol, its accessories, documentation and other collectibles available to the collector. This is a book by collectors, for collectors, and it is the first comprehensive collector's review of the Makarov Pistol.

Raising Red Flags N.R. Jenzen-Jones, Jonathan Ferguson, 2014-11-18 This report examines the significant range of arms and munitions carried and employed throughout the conflict by armed individuals on all sides. It also examines, somewhat less extensively, the range of armoured vehicles and aircraft observed in the conflict. This report examines over 100 distinct weapons systems, over 60 different types of munitions, and over 70 different models of armoured fighting vehicles, as well as miscellaneous associated materiel, in the context of the ongoing conflict in Ukraine. Particular attention is paid to items which may indicate flows of arms and munitions into and within the affected areas of Ukraine. Beginning with an assessment of the arms and munitions employed during the initial unrest in Kiev, in February 2012, the report documents relevant materiel up until the time of publication

We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. Toward Combined Arms Warfare Jonathan Mallory House, 1985

My Life with the Taliban Abdul Salam Zaeef, 2010-01-01 This is the autobiography of Abdul Salam Zaeef, a senior former member of the Taliban. His memoirs, translated from Pashto, are more than just a personal account of his extraordinary life. *My Life with the Taliban* offers a counter-narrative to the standard accounts of Afghanistan since 1979. Zaeef describes growing up in rural poverty in Kandahar province. Both of his parents died at an early age, and the Russian invasion of 1979 forced him to flee to Pakistan. He started fighting the jihad in 1983, during which time he was associated with many major figures in the anti-Soviet resistance, including the current Taliban head Mullah Mohammad Omar. After the war Zaeef returned to a quiet life in a small village in Kandahar, but chaos soon overwhelmed Afghanistan as factional fighting erupted after the Russians pulled out. Disgusted by the lawlessness that ensued, Zaeef was one among the former mujahidin who were closely involved in the discussions that led to the emergence of the Taliban,

in 1994. Zaeef then details his Taliban career as civil servant and minister who negotiated with foreign oil companies as well as with Afghanistan's own resistance leader, Ahmed Shah Massoud. Zaeef was ambassador to Pakistan at the time of the 9/11 attacks, and his account discusses the strange phoney war period before the US-led intervention toppled the Taliban. In early 2002 Zaeef was handed over to American forces in Pakistan, notwithstanding his diplomatic status, and spent four and a half years in prison (including several years in Guantanamo) before being released without having been tried or charged with any offence. My Life with the Taliban offers a personal and privileged insight into the rural Pashtun village communities that are the Taliban's bedrock. It helps to explain what drives men like Zaeef to take up arms against the foreigners who are foolish enough to invade his homeland.

Collected Works of Velimir Khlebnikov: Letters and theoretical writings
Велимир Хлебников, 1987 Dubbed by his fellow Futurists the King of Time, Velimir Khlebnikov (1885-1922) spent his entire brief life searching for a new poetic language to express his convictions about the rhythm of history, the correspondence between human behavior and the language of the stars. The result was a vast body of poetry and prose that has been called hermetic, incomprehensible, even deranged. Of all this tragic generation of Russian poets (including Blok, Esenin, and Mayakovsky), Khlebnikov has been perhaps the most praised and the more censured. This first volume of the Collected Works, an edition sponsored by the Dia Art Foundation, will do much to establish the counterimage of Khlebnikov as an honest, serious writer. The 117 letters published here for the first time in English reveal an ebullient, humane, impractical, but deliberate working artist. We read of the continuing involvement with his family throughout his vagabond life (pleas to his

smartest sister, Vera, to break out of the mold, pleas to his scholarly father not to condemn and to send a warm overcoat); the naive pleasure he took in being applauded by other artists; his insistence that a young girl's simple verses be included in one of the typically outrageous Futurist publications of the time; his jealous fury at the appearance in Moscow of the Italian Futurist Marinetti; a first draft of his famous zoo poem (O Garden of Animals!); his seriocomic but ultimately shattering efforts to be released from army service; his inexhaustibly courageous confrontation with his own disease and excruciating poverty; and always his deadly earnest attempt to make sense of numbers, language, suffering, politics, and the exigencies of publication. The theoretical writings presented here are even more important than the letters to an understanding of Khlebnikov's creative output. In the scientific articles written before 1910, we discern foreshadowings of major patterns of later poetic work. In the pan-Slavic proclamations of 1908-1914, we find explicit connections between cultural roots and linguistic ramifications. In the semantic excursions beginning in 1915, we can see Khlebnikov's experiments with consonants, nouns, and definitions spelled out in accessible, if arid, form. The essays of 1916-1922 take us into the future of Planet Earth, visions of universal order and accomplishment that no longer seem so farfetched but indeed resonate for modern readers.

The Russian Military and the Georgia War Ariel Cohen, Robert E.

Hamilton, 2011 In this monograph, the authors state that Russia planned the war against Georgia in August 2008 aiming for the annexation of Abkhazia, weakening the Saakashvili regime, and prevention of NATO enlargement. According to them, while Russia won the campaign, it also exposed its own military as badly needing reform. The war also demonstrated weaknesses of the

NATO and the European Union security systems.

Current Concepts in Forensic Entomology Jens Amendt, M. Lee Goff, Carlo P. Campobasso, Martin Grassberger, 2010-01-06 Forensic Entomology deals with the use of insects and other arthropods in medico legal investigations. We are sure that many people know this or a similar definition, maybe even already read a scientific or popular book dealing with this topic. So, do we really need another book on Forensic Entomology? The answer is 13, 29, 31, 38, and 61. These are not some golden bingo numbers, but an excerpt of the increasing amount of annual publications in the current decade dealing with Forensic Entomology. Comparing them with 89 articles which were published during the 1990s it illustrates the growing interest in this very special intersection of Forensic Science and Entomology and clearly underlines the statement: Yes, we need this book because Forensic Entomology is on the move with so many new things happening every year. One of the most attractive features of Forensic Entomology is that it is multidisciplinary. There is almost no branch in natural science which cannot find its field of activity here. The chapters included in this book highlight this variety of researches and would like to give the impetus for future work, improving the development of Forensic Entomology, which is clearly needed by the scientific community. On its way to the courtrooms of the world this discipline needs a sound and serious scientific background to receive the acceptance it deserves.

Polysaccharide Based Graft Copolymers Susheel Kalia, M.W. Sabaa, 2013-05-23 Renowned experts give all essential aspects of the techniques and applications of graft copolymers based on polysaccharides. Polysaccharides are the most abundant natural organic materials and polysaccharide based graft copolymers are of great importance and widely used in various fields.

Natural polysaccharides have recently received more attention due to their advantages over synthetic polymers by being non-toxic, biodegradable and available at low cost. Modification of polysaccharides through graft copolymerization improves the properties of polysaccharides. Grafting is known to improve the characteristic properties of the backbones. Such properties include water repellency, thermal stability, flame resistance, dye-ability and resistance towards acid-base attack and abrasion. Polysaccharides and their graft copolymers find extensive applications in diversified fields. Applications of modified polysaccharides include drug delivery devices, controlled release of fungicides, selective water absorption from oil-water emulsions, purification of water etc.

The Great Gamble Gregory Feifer, 2009-01-06 The Soviet war in Afghanistan was a grueling debacle that has striking lessons for the twenty-first century. In *The Great Gamble*, Gregory Feifer examines the conflict from the perspective of the soldiers on the ground. During the last years of the Cold War, the Soviet Union sent some of its most elite troops to unfamiliar lands in Central Asia to fight a vaguely defined enemy, which eventually defeated their superior numbers with unconventional tactics. Although the Soviet leadership initially saw the invasion as a victory, many Russian soldiers came to view the war as a demoralizing and devastating defeat, the consequences of which had a substantial impact on the Soviet Union and its collapse. Feifer's extensive research includes eye-opening interviews with participants from both sides of the conflict. In gripping detail, he vividly depicts the invasion of a volatile country that no power has ever successfully conquered. Parallels between the Soviet invasion of Afghanistan and the U.S. invasions of Afghanistan and Iraq are impossible to ignore—both conflicts were waged amid vague ideological rhetoric about freedom. Both were roundly condemned by the outside world for trying to impose their favored forms of government on countries with very different ways of life. And both seem destined to end on uncertain terms. A groundbreaking account seen through the eyes of the men who fought it, *The Great Gamble* tells an

unforgettable story full of drama, action, and political intrigue whose relevance in our own time is greater than ever.
