- 🔍 **INTERNATIONAL MACROECONOMICS IN THE WAKE OF THE GLOBAL FINANCIAL CRISIS** LAURENT FERRARA,IGNACIO HERNANDO,DANIELA MARCONI,2018-06-13 This book collects selected articles addressing several currently debated issues in the field of international macroeconomics. They focus on the role of the central banks in the debate on how to come to terms with the long-term decline in productivity growth, insufficient aggregate demand, high economic uncertainty and growing inequalities following the global financial crisis. Central banks are of considerable importance in this debate since understanding the sluggishness of the recovery process as well as its implications for the natural interest rate are key to assessing output gaps and the monetary policy stance. The authors argue that a more dynamic domestic and external aggregate demand helps to raise the inflation rate, easing the constraint deriving from the zero lower bound and allowing monetary policy to depart from its current ultra-accommodative position. Beyond macroeconomic factors, the book also discusses a supportive financial environment as a precondition for the rebound of global economic activity, stressing that understanding capital flows is a prerequisite for economic-policy decisions.

- 🔍 **CLOSING THE CANCER DIVIDE** FELICIA MARIE KNAUL,2012-12-17 Cancer has become a leading cause of death and disability and a serious yet unforeseen challenge to health systems in low- and middle-income countries. A protracted and polarized cancer transition is under way and fuels a concentration of preventable risk, illness, suffering, impoverishment from ill health, and death among poor populations. Closing this cancer divide is an equity imperative. The world faces a huge, unperceived cost of failure to take action that requires an immediate and large-scale global response. Closing the Cancer Divide presents strategies for innovation in delivery, pricing, procurement, finance, knowledge-building, and leadership that can be scaled up by applying a diagonal approach to health system strengthening. The chapters provide evidence-based recommendations for developing programs, local and global policy-making, and prioritizing research. The cases and frameworks provide a guide for developing responses to the challenge of cancer and other chronic illnesses. The book summarizes results of the Global Task Force on Expanding Access to Cancer Care and Control in Developing Countries, a collaboration among leaders from the global health and cancer care communities worldwide, originally convened by Harvard University. It includes contributions from civil society, global and national policy-makers, patients and practitioners, and academics representing an array of fields.

- 🔍 **THINKING DESIGN** S BALARAM,2011-01-06 Thinking Design looks at 'design' in its broadest sense and shows how design originates in 'human need' which is not only physical but also psychological, socio-cultural, ecological and spiritual. The book calls for broad-based, socially integrated designs with a large global vision that offer creative solutions to a variety of subjects rather than providing multiplicity of objects. Exploring the course taken by design during the time of Gandhi and in the following era, the author advocates the need for service - or process-oriented designs in contrast to product-oriented designs. A remarkable feature of the book is the way its narrative is enlivened with case studies detailing design inventions, interspersed with tales of Mullah Nasiruddin that provide a tongue-in-cheek take on aspects of design.

NEW FRONTIERS IN ORGANOSELENIUM COMPOUNDS Eder Jo Lenard, Claudio Santi, Luca Sancineto, 2018-06-29 This book presents recent advances in and perspectives on the use of organoselenium compounds, primarily highlighting the new frontiers in the field of green chemistry, their therapeutic and biological relevance and new materials. Throughout its 200 pages, readers will find an updated and comprehensive review of new aspects of organoselenium chemistry and biochemistry. Fully referenced and written in an easy to read style, it offers readers a primary resource for including organoselenium derivatives in their projects. This book will be of interest to specialists, students and researchers involved in a broad range of fields, from synthetic green chemistry to medicinal chemistry and the chemistry of natural products. The connection between organoselenium compounds and green chemistry, despite having only recently emerged, is one of the subjects of this book. The first chapter highlights the use of Se-containing molecules as reagents and catalysts in new green protocols to access important organic transformations. The book provides a wealth of examples of bioactive Se-containing molecules, especially focusing on those with potential therapeutic uses. The second chapter focuses on the state of the art concerning the role of organoselenium compounds as antioxidants, GPx mimics, and derivatives endowed with different bioactive properties. "ORGANOSELENIUM IN NATURE" is the title of the third chapter, which equips readers with essential information on the main natural organoselenium compounds and where they are found. Selected aspects of the metabolism of selenium in plants and microorganisms are also discussed. In closing, the book includes a chapter dedicated to recent advances concerning the nonbonding interactions between organochalcogen compounds. This is currently a hot topic in selenium chemistry and biochemistry, and here readers will find key insights into the chalcogen bond and its role in the biological activity of organoselenium compounds.

PoC or GTFO Manul Laphroaig, 2017-10-31 This highly anticipated print collection gathers articles published in the much-loved International Journal of Proof-of-Concept or Get The Fuck Out. PoC||GTFO follows in the tradition of Phrack and Uninformed by publishing on the subjects of offensive security research, reverse engineering, and file format internals. Until now, the journal has only been available online or printed and distributed for free at hacker conferences worldwide. Consistent with the journal's quirky, biblical style, this book comes with all the trimmings: a leatherette cover, ribbon bookmark, bible paper, and gilt-edged pages. The book features more than 80 technical essays from numerous famous hackers, authors of classics like Reliable Code Execution on a Tamagotchi, ELFs are Dorky, Elves are Cool, Burning a Phone, Forget Not the Humble Timing Attack, and A Sermon on Hacker Privilege. Twenty-four full-color pages by Ange Albertini illustrate many of the clever tricks described in the text.

EDWARD ALBEE'S AT HOME AT THE ZOO Edward Albee, 2008 When you emerge from this impish comic playwright's glittering tribute to Moliere, written entirely in verse, your head will be so dizzy with syncopated rhyme that you'll almost expect to find yourself speaking and thinking in chiming couplets...[Ives] add the truism that families come in all shapes and sizes is illuminated with haunting beauty...in this exquisitely wrought comedy-drama...a piercing portrait of the contemporary social architecture, in which the distance between people can be widened or collapses

A PEOPLE AND A NATION Mary Beth Norton, 1999 This spirited narrative challenges students to think about the meaning of American history. Thoughtful inclusion of the lives of everyday people, cultural diversity, work, and popular culture preserves the text's basic approach to American history as a story of all the American people. The seventh edition maintains the emphasis on the unique social history of the United States and engages students through cutting-edge research and scholarship. New content includes expanded coverage of modern history (post-1945) with discussion of foreign relations, gender analysis, and race and racial relations. Chapter-based links to the World Connect US history to global events and provide web links for further research while end-of-chapter legacies for a People and a Nation focus on meaningful events or movements relevant to present-day issues or controversies.
