Greene's Protective Groups in Organic Synthesis Peter G. M. Wuts, Theodora W. Greene, 2012-12-20 The Fourth Edition of *Greene's Protective Groups in Organic Synthesis* continues to be an indispensable reference for controlling the reactivity of the most common functional groups during a synthetic sequence. This new edition incorporates the significant developments in the field since publication of the third edition in 1998, including... New protective groups such as the fluorous family and the uniquely removable 2-methoxybenzenesulfonyl group for the protection of amines New techniques for the formation and cleavage of existing protective groups, with examples to illustrate each new technique Expanded coverage of the unexpected side reactions that occur with protective groups New chart covering the selective deprotection of silyl ethers 3,100 new references from the professional literature The content is organized around the functional group to be protected, and ranges from the simplest to the most complex and highly specialized protective groups.

The Domestic and the Foreign in Architecture Ruth Baumeister, Sang Lee, 2007 For centuries, across nations, dialogue between the domestic and the foreign has affected and transformed architecture. Today these dialogues have become highly intensified. *The Domestic and the Foreign in Architecture* examines how these exchanges manifest themselves in contemporary architecture, in terms of its aesthetic potential and its practice, which, in turn, are impacted by broad economic, cultural and political issues. This book traces how diverse cultural encounters inevitably modify conventional categories, standards and codes of architecture, such as domestic identity, its political and economic representations and the negotiations with what is deemed foreign. Theoretical reflections by distinguished scholars are accompanied by interviews with some of the most influential architects practicing today, as well as stunning visual presentations by professional photographers.

Unbriable Bosnia and Herzegovina Damir Arsenijević, 2014 This volume affirms the transformative impulse of the February protests and plenums that took place in Bosnia and Herzegovina in 2014. It brings together a range of interventions that materialize a common emancipatory frame in which politics is recuperated against the dominant bureaucratic management of the status quo. The fight for the commons upholds life that refuses to be bribed into accepting the dominant oppression and corruption as the only possibility of social existence in Bosnia and Herzegovina today. Local and international challenges will entail building and proving in everyday life solidarity that targets practices of exclusion, inequality, and injustice. The protests and plenums in Bosnia and Herzegovina mark a new and hopeful moment in asserting a more equitable and just sociality - a fight that is local in its early achievements but global and universal in its implications. Damir Arsenijević is a Leverhulme Trust Fellow at De Montfort University, Leicester, leading a project 'Love after Genocide'.

Asymmetric Phase Transfer Catalysis Keiji Maruoka, 2008-03-31 Edited by the leading expert on the topic, this is the first book to present the latest developments in this exciting field. Alongside the theoretical aspects, the top contributors provide practical protocols to give readers additional important information otherwise unavailable. A must for every synthetic chemist in academia and industry.

Free-Radical Synthesis and Functionalization of Heterocycles Yannick Landaï, 2018-05-03 This volume describes the recent developments in the free-radical mediated synthesis and elaboration of heterocycles. The first chapter, dealing with radical cascade processes illustrates the power and the beauty of radical chemistry with some striking examples of total synthesis of complex natural heterocycles. As organic chemists strive towards sustainability, radical chemistry has recently seen major advances and efforts in this direction, including C-H activation of arenes and unactivated alkyl groups. Photochemical activation, for a long time the preferred mode of activation in radical chemistry has also seen an unexpected revival with the advent of visible light metal- and organocatalyzed photoredox processes. A survey of these emerging areas is provided along with the concepts at the origin of these developments. The venerable Minisci reaction allows for direct access to functionalized heterocycles. This process has lately seen an interesting renaissance and is discussed in this volume. Addition of heteroatom-centered radicals onto unsaturated systems constitutes another powerful method to construct heterocycles. Examples of such a strategy are

proposed along with the formation of various heterocycles relying on homolytic substitution at sulfur, phosphorus and selenium. Additionally free-radical functionalization of reactive functional groups including isonitriles, isothiocyanates and related unsaturated systems which offer a straightforward route towards useful aromatic and non-aromatic heterocycles are discussed. Finally, as metals are able to trigger single electron transfer both in reductive and oxidative modes this provides another possibility for the synthesis of heterocycles. Significant research efforts have focused on the use of samarium, copper and other metals to access a broad variety of heterocycles in a single pot process, starting from readily available raw material. Examples and mechanistic insights are discussed by experts in this area.

Rennyō and the Roots of Modern Japanese Buddhism Mark L. Blum, Shin'ya Yasutomi, 2006 Rennyō Shōnin (1415-1499) is considered the 'second founder' of Shin Buddhism. This book deals with the major questions surrounding the phenomenal growth of Hongōji under Rennyō's leadership, such as the source of charisma, the soteriological implications of his thought against the background of other movements in Pure Land Buddhism, and more.

Nisyros Volcano Volker Jörg Dietrich, Evangelos Lagios, 2018-08-03 This book presents the first compilation of scientific research on the island of Nisyros, involving various geoscientific disciplines. Presenting a wealth of illustrations and maps, including a geological map of the volcano, it also provides valuable insights into the geothermal potential of Greece. The island of Nisyros is a Quaternary volcano located at the easternmost end of the South Aegean Volcanic Arc. The island is nearly circular, with an average diameter of 8 km, and covers an area of approximately 42 km². It lies above a base of Mesozoic limestone and a thin crust, with the mantle-crust transition located at a depth of approximately 27 km. The volcanic edifice of Nisyros comprises a succession of calc-alkaline lavas and pyroclastic rocks, as well as a summit caldera with an average diameter of 4 km. Nisyros marks the most recent volcano in the large prehistoric volcanic field between Kos-Yali-Strongyli-Pyrgousa-Pachia-Nisyros, where the largest eruption ("Kos Plateau Tuff") in the history of the eastern Mediterranean devastated the Dodecanese islands 161,000 years ago. Although the last volcanic activity on Nisyros dates back at least 20,000 to 25,000 years, it encompasses an active hydrothermal system underneath the volcano with temperatures of roughly 100°C at the Lakki plain, the present-day caldera floor and 350°C at a depth of 1,550 m. A high level of seismic unrest, thermal waters and fumarolic gases bear testament to its continuous activity, which is due to a large volume of hot rocks and magma batches at greater depths, between 3,000 and 8,000 m. Violent hydrothermal eruptions accompanied by major earthquakes occurred in 1873 and 1888 and left behind large, "world-wide unique" explosion craters in the old caldera. Through diffuse soil degassing, the discharge of all hydrothermal craters in the Lakki plain releases 68 tons of hydrothermal-volcanic derived CO₂ and 42 MW of thermal energy per day. This unique volcanic and hydrothermal environment is visited daily by hundreds of tourists.

The Science and Practice of Lithium Therapy Gin S. Malhi, Marc Masson, Frank Bellivier, 2016-11-24 This book provides a clear and comprehensive guide to the clinical prescription of lithium that draws upon evidence-based knowledge of its mechanisms of action. The book is divided into two parts, on the science of lithium and the practice of lithium therapy. The former covers aspects such as the properties of the lithium ion, pharmacokinetics and pharmacodynamics, impact on neurotransmission, and gene expression modulation. The section on practice includes discussion of variability in response to lithium, use of lithium in the treatment of bipolar disorders, its value in suicide prevention, administration during pregnancy and in the pediatric age group, and side effects. Lithium is arguably the only true mood stabilizer, and its

multifaceted effects across many clinical domains have given rise to a resurgence of interest in recent years, fuelled by both researchers and clinicians. Nevertheless, its use remains constrained by exaggerated concerns about potential side-effects. In reality, lithium is a simple molecule that is relatively straightforward to administer and monitor and has potentially profound benefits at a fraction of the cost of contemporary agents. This book dispels the many myths and concerns that surround its use and will be of interest for clinicians and researchers worldwide, and those that are recipients of lithium therapy.

Dissenting Japan William Andrews, 2016-08-15 Conformist, mute and malleable? Andrews tackles head-on this absurd caricature of Japanese society in his fascinating history of its militant sub-cultures, radical societies and well-established traditions of dissent Following the March 2011 tsunami and Fukushima nuclear crisis, the media remarked with surprise on how thousands of demonstrators had flocked to the streets of Tokyo. But mass protest movements are nothing new in Japan and the post-war period experienced years of unrest and violence on both sides of the political spectrum: from demos to riots, strikes, campus occupations, faction infighting, assassinations and even international terrorism. This is the first comprehensive history in English of political radicalism and counterculture in Japan, as well as the artistic developments during this turbulent time. It chronicles the major events and movements from 1945 to the new flowering of protests and civil dissent in the wake of Fukushima. Introducing readers to often ignored aspects of Japanese society, it explores the fascinating ideologies and personalities on the Right and the Left, including the student movement, militant groups and communes. While some elements parallel developments in Europe and America, much of Japan's radical recent past (and present) is unique and offers valuable lessons for understanding the context to the new waves of anti-government protests the nation is currently witnessing.

The Meiji Restoration Robert Hellyer, Harald Fuess, 2020-05-07 This volume examines the Meiji Restoration through a global history lens to re-interpret the formation of a globally-cast, Japanese nation-state.

Japanese Art Joan Stanley-Baker, 2000 Traces the history of Japanese painting, calligraphy, architecture, sculpture, and other arts from the prehistoric period to modern times.

Organofluorine Compounds Tamejiro Hiyama, 2013-03-09 In view of increasing interest in organofluorine compounds, this book was undertaken to describe biological and physical properties of organofluorine compounds, synthetic methods of these, their roles in pharmaceutical, agrochemical and material sciences. In particular, the book will emphasize on the usefulness of fluorination reaction, availability of fluorination agents, so that even graduate students who are unfamiliar to this field can understand and participate in this fascinating heteroatom chemistry.

The Narrow Road to the Deep North and Other Travel Sketches Matsuo Basho, 2020-02-27 'It was with awe That I beheld Fresh leaves, green leaves, Bright in the sun' When the Japanese haiku master Basho composed *The Narrow Road to the Deep North*, he was an ardent student of Zen Buddhism, setting off on a series of travels designed to strip away the trappings of the material world and bring spiritual enlightenment. He writes of the seasons changing, the smell of the rain, the brightness of the moon and the beauty of the waterfall, through which he sensed the mysteries of the universe. These writings not only chronicle Basho's travels, but they also capture his vision of eternity in the transient world around him. Translated with an Introduction by Nobuyuki Yuasa

Bashō's Haiku Matsuo Bashō, 2012-02-01 2005 CHOICE Outstanding Academic Title Basho's Haiku offers

the most comprehensive translation yet of the poetry of Japanese writer Matsuo Bashō (1644–1694), who is credited with perfecting and popularizing the haiku form of poetry. One of the most widely read Japanese writers, both within his own country and worldwide, Bashō is especially beloved by those who appreciate nature and those who practice Zen Buddhism. Born into the samurai class, Bashō rejected that world after the death of his master and became a wandering poet and teacher. During his travels across Japan, he became a lay Zen monk and studied history and classical poetry. His poems contained a mystical quality and expressed universal themes through simple images from the natural world. David Landis Barnhill's brilliant book strives for literal translations of Bashō's work, arranged chronologically in order to show Bashō's development as a writer. Avoiding wordy and explanatory translations, Barnhill captures the brevity and vitality of the original Japanese, letting the images suggest the depth of meaning involved. Barnhill also presents an overview of haiku poetry and analyzes the significance of nature in this literary form, while suggesting the importance of Bashō to contemporary American literature and environmental thought.

Sengoku Mark T. Arsenault, 2003-06-01 The Sengoku: Character Sheets book contains 41 illustrated and revised, two-sided character sheets, plus 11 additional blank (un-illustrated) character sheets. Features 41 illustrations of popular character profession templates -- samurai, bushi, priests, mystics, shinobi and more!

Natural Heritage from East to West Niki Evelpidou, Tomás Figueiredo, Francesco Mauro, Vahap Tecim, Andreas Vassilopoulos, 2010-01-19 Cumulative global transformations, occurring daily, affect important aspects of our life. Characteristic cultural and natural heritage, including sites of priceless value, is under constant threat. There are growing pressures, of both natural and human origin, such as wars, conflicts, natural or technological disasters and the effects of global climate change. These provoke the continuous degradation of many sites included in the World Heritage List. In consequence, immediate strategic measures must be taken. Natural heritage is our legacy from the past, that we inherited from our ancestors and pass on to future generations. It is vital to realize its value and protect it by all possible means, enforcing innovative and sustainable action plans that promote global international co-operation. This book aims to address specific natural heritage sites in Europe, from West to East. The six countries of study interest are Portugal, Malta, Greece, Italy, Romania and Turkey. For each case, the corresponding current status is presented. This is accompanied by recommended action plans for protection and conservation, training initiatives that improve the public awareness of natural heritage issues and efforts to estimate the natural/environmental value of the sites. The book is the overall result of an interregional initiative aiming to promote convergence, provoke public interest and recommend action for radical changes in our attitude towards heritage conservation.
