Why It's OK to Love Bad Movies Matthew Strohl, 2022-01-06 Most people are too busy to keep up with all the good movies they'd like to see, so why should anyone spend their precious time watching the bad ones? In *Why It's OK to Love Bad Movies*, philosopher and cinematic bottom feeder Matthew Strohl enthusiastically defends a fondness for disreputable films. Combining philosophy of art with film criticism, Strohl flips conventional notions of good and bad on their heads and makes the case that the ultimate value of a work of art lies in what it can add to our lives. By this measure, some of the worst movies ever made are also among the best. Through detailed discussions of films such as *Troll 2*, *The Room*, *Batman & Robin*, *Twilight*, *Ninja III: The Domination*, and a significant portion of Nicolas Cage's filmography, Strohl argues that so-called bad movies are the ones that break the rules of the art form without the aura of artistic seriousness that surrounds the avant-garde. These movies may not win any awards, but they offer rich opportunities for creative engagement and enable the formation of lively fan communities, and they can be a key ingredient in a fulfilling aesthetic life. Key Features: Written in a humorous, approachable style, appealing to readers with no background in philosophy. Elaborates the rewards of loving bad movies, such as forming unlikely social bonds and developing refinement without narrowness. Discusses a wide range of beloved bad movies, including *Plan 9 from Outer Space*, *The Core*, *Battlefield Earth*, and *Freddy Got Fingered*. Contains the most extensive discussion of Nicolas Cage ever included in a philosophy book.

The Hitchhiker's Guide to the Galaxy Douglas Adams, 2009-09-01 'One of the greatest achievements in comedy. A work of staggering genius' - David Walliams An international phenomenon and pop-culture classic, *The Hitchhiker's Guide to the Galaxy* has been a radio show, TV series, novel, stage play, comic book and film. Following the galactic (mis)adventures of Arthur Dent, *Hitchhiker's* in its various incarnations has captured the imaginations of curious minds around the world . . . It's an ordinary Thursday lunchtime for Arthur Dent until his house gets demolished. The Earth follows shortly afterwards to make

way for a new hyperspace express route, and his best friend has just announced that he's an alien. At this moment, they're hurtling through space with nothing but their towels and an innocuous-looking book inscribed, in large friendly letters, with the words: DON'T PANIC. The weekend has only just begun . . . This 42nd Anniversary Edition includes exclusive bonus material from the Douglas Adams archives, and an introduction by former Doctor Who showrunner, Russell T Davies. Continue Arthur Dent's intergalactic adventures in the rest of the trilogy with five parts: The Restaurant at the End of the Universe, Life, the Universe and Everything, So Long, and Thanks for All the Fish, and Mostly Harmless.

How Emotions Are Made Lisa Feldman Barrett, 2017-03-07 Preeminent psychologist Lisa Barrett lays out how the brain constructs emotions in a way that could revolutionize psychology, health care, the legal system, and our understanding of the human mind. "Fascinating . . . A thought-provoking journey into emotion science."—The Wall Street Journal "A singular book, remarkable for the freshness of its ideas and the boldness and clarity with which they are presented."—Scientific American "A brilliant and original book on the science of emotion, by the deepest thinker about this topic since Darwin."—Daniel Gilbert, best-selling author of *Stumbling on Happiness* The science of emotion is in the midst of a revolution on par with the discovery of relativity in physics and natural selection in biology. Leading the charge is psychologist and neuroscientist Lisa Feldman Barrett, whose research overturns the long-standing belief that emotions are automatic, universal, and hardwired in different brain regions. Instead, Barrett shows, we construct each instance of emotion through a unique interplay of brain, body, and culture. A lucid report from the cutting edge of emotion science, *How Emotions Are Made* reveals the profound real-world consequences of this breakthrough for everything from neuroscience and medicine to the legal system and even national security, laying bare the immense implications of our latest and most intimate scientific revolution.

Mostly Harmless Douglas Adams, 2009-09-23 Now celebrating the 42nd anniversary of *The Hitchhiker's Guide to the Galaxy*, soon to be a Hulu original series! "Hitchhiker fans rejoice! . . . [Here's] more of the same zany nonsensical mayhem."—The New York Times Book Review It's easy to get disheartened when your planet has been blown up and the woman you love has vanished due to a misunderstanding about space/time. However, instead of being disheartened, Arthur Dent makes the terrible mistake of starting to enjoy life a bit—and immediately all hell breaks loose. Hell takes a number of forms: there's the standard Ford Prefect version, in the shape of an all-new edition of *The Hitchhiker's Guide to the Galaxy*, and a totally unexpected manifestation in the form of a teenage girl who startles Arthur Dent by being his daughter when he didn't even know he had one. Can Arthur save the Earth from total multidimensional obliteration? Can he save the Guide from a hostile alien takeover? Can he save his daughter, Random, from herself? Of course not. He never works out exactly what is going on. Will you? "Douglas Adams is a terrific satirist. . . . He is anything but harmless."—The Washington Post Book World

The Hitchhiker's Guide to the Galaxy Douglas Adams, 2005 Chronicles the journeys, notions, and acquaintances of reluctant galactic traveler Arthur Dent, accompanied by never-before-published material from the late author's archives as well as commentary by famous fans.

Digital Material Marianne van den Boomen, 2009 This is a compelling study of the often controversial role and meaning of the new media and digital cultures in contemporary society. Three decades of societal and cultural alignment of new media yielded to a host of innovations, trials, and problems, accompanied by versatile popular and academic discourse. New Media Studies crystallized internationally into an established

academic discipline, which begs the question: where do we stand now; which new issues have emerged now that new media are taken for granted, and which riddles remain unsolved; and, is contemporary digital culture indeed all about 'you', or do we still not really understand the digital machinery and how it constitutes us as 'you'. From desktop metaphors to Web 2.0 ecosystems, from touch screens to blogging to e-learning, from role-playing games to Cybergoth music to wireless dreams, this timely volume offers a showcase of the most up-to-date research in the field from what may be called a 'digital-materialist' perspective.

Fun and Software Olga Goriunova, 2016-05-19 Fun and Software offers the untold story of fun as constitutive of the culture and aesthetics of computing. Fun in computing is a mode of thinking, making and experiencing. It invokes and convolutes the question of rationalism and logical reason, addresses the sensibilities and experience of computation and attests to its creative drives. By exploring topics as diverse as the pleasure and pain of the programmer, geek wit, affects of play and coding as a bodily pursuit of the unique in recursive structures, Fun and Software helps construct a different point of entry to the understanding of software as culture. Fun is a form of production that touches on the foundations of formal logic and precise notation as well as rhetoric, exhibiting connections between computing and paradox, politics and aesthetics. From the formation of the discipline of programming as an outgrowth of pure mathematics to its manifestation in contemporary and contradictory forms such as gaming, data analysis and art, fun is a powerful force that continues to shape our life with software as it becomes the key mechanism of contemporary society. Including chapters from leading scholars, programmers and artists, Fun and Software makes a major contribution to the field of software studies and opens the topic of software to some of the most pressing concerns in contemporary theory.

Self-Tracking Gina Neff, Dawn Nafus, 2016-06-24 What happens when people turn their everyday experience into data: an introduction to the essential ideas and key challenges of self-tracking. People keep track. In the eighteenth century, Benjamin Franklin kept charts of time spent and virtues lived up to. Today, people use technology to self-track: hours slept, steps taken, calories consumed, medications administered. Ninety million wearable sensors were shipped in 2014 to help us gather data about our lives. This book examines how people record, analyze, and reflect on this data, looking at the tools they use and the communities they become part of. Gina Neff and Dawn Nafus describe what happens when people turn their everyday experience—in particular, health and wellness-related experience—into data, and offer an introduction to the essential ideas and key challenges of using these technologies. They consider self-tracking as a social and cultural phenomenon, describing not only the use of data as a kind of mirror of the self but also how this enables people to connect to, and learn from, others. Neff and Nafus consider what's at

stake: who wants our data and why; the practices of serious self-tracking enthusiasts; the design of commercial self-tracking technology; and how self-tracking can fill gaps in the healthcare system. Today, no one can lead an entirely untracked life. Neff and Nafus show us how to use data in a way that empowers and educates.

The Second Home Christina Clancy, 2020-06-02 A novel of family and place and belonging. —Rebecca Makkai, Pulitzer Prize finalist Tender and suspenseful. —Chloe Benjamin, New York Times bestselling author Some places never leave you... After a disastrous summer spent at her family's home on Cape Cod when she is seventeen, Ann Gordon is very happy to never visit Wellfleet again. If only she'd stayed in Wisconsin, she might never have met Anthony Shaw, and she would have held onto the future she'd so carefully planned for herself. Instead, Ann ends up harboring a devastating secret that strains her relationship with her parents, sends her sister Poppy to every corner of the world chasing waves (and her next fling), and leaves her adopted brother Michael estranged from the family. Now, fifteen years later, her parents have died, and Ann and Poppy are left to decide the fate of the beach house that's been in the Gordon family for generations. For Ann, the once-beloved house is forever tainted with bad memories. And while Poppy loves the old saltbox on Drummer Cove, owning a house means settling, and she's not sure she's ready to stay in one place. Just when the sisters decide to sell, Michael re-enters their lives with a legitimate claim to a third of the estate. He wants the house. But more than that, he wants to set the record straight about what happened that long-ago summer that changed all of their lives forever. As the siblings reunite after years apart, their old secrets and lies, longings and losses, are pulled to the surface. Is the house the one thing that can still bring them together—or will it tear them apart, once and for all? Told through the shifting perspectives of Ann, Poppy, and Michael, this assured and affecting debut captures the ache of nostalgia for summers past and the powerful draw of the places we return to again and again. It is about second homes, second families, and second chances. Tender and compassionate, incisive and heartbreaking, *The Second Home* is the story of a family you'll quickly fall in love with, and won't soon forget.

Dava Shastri's Last Day Kirthana Ramisetty, 2021-11-30 In this novel full of music, magnetism, and familial obligation (Emma Straub, author of *All Adults Here*) a dying billionaire matriarch leaks news of her death early so she can examine her legacy—a decision that horrifies her children and inadvertently exposes secrets she has spent a lifetime keeping. Dava Shastri, one of the world's wealthiest women, has always lived with her sterling reputation in mind. A brain cancer diagnosis at the age of seventy, however, changes everything, and Dava decides to take her death—like all matters of her life—into her own hands. Summoning her four adult children to her private island, she discloses shocking news: in addition to having a terminal illness, she has arranged for the news of her death to break early, so she can read her obituaries. As someone who dedicated her life to the arts and the empowerment of women, Dava expects to read articles lauding her philanthropic work. Instead, her death reveals two devastating secrets, truths she thought she had buried forever. And now the whole world knows, including her children. In the time she has left, Dava must come to terms with the decisions that have led to this moment—and make peace with those closest to her before it's too late. Compassionately written and chock-full of humor and heart, this powerful novel examines public versus private legacy, the complexities of love, and the never-ending joys—and frustrations—of family. For We Are Many Dennis E. Taylor,2017-03-18 Bobiverse fans: a signed limited edition of all three books in a boxed set, signed by the author, is now available on Amazon. Look for The Bobiverse [Signed Limited Edition] on Amazon Bob Johansson didn't believe in an afterlife, so waking up after being killed in a car accident was a shock. To add to the surprise, he is now a sentient computer and the controlling intelligence for a Von Neumann probe. Bob and his copies have been spreading out from Earth for 40 years now, looking for habitable planets. But that's the only part of the plan that's still in one piece. A system-wide war has killed off 99.9% of the human race; nuclear winter is slowly making the Earth uninhabitable; a radical group wants to finish the job on the remnants of humanity; the Brazilian space probes are still out there, still trying to blow up the competition; And the Bobs have discovered a spacefaring species that sees all other life as food. Bob left Earth anticipating a life of exploration and blissful solitude. Instead he's become a sky god to a primitive native species, the only hope for getting humanity to a new home, and possibly the only thing that can prevent every living thing in the local sphere from ending up as dinner.

Outland Dennis E. Taylor,2019-07 When the Yellowstone supervolcano erupts, it's up to six college students and their experimental physics project to prevent the end of civilization. When an experiment to study quantum uncertainty goes spectacularly wrong, physics student Bill Rustad and his friends find that they have accidentally created an inter-dimensional portal. They connect to Outland-an alternate Earth with identical geology, but where humans never evolved. The group races to establish control of the portal before the government, the military, or evildoers can take it away. Then everything changes when the Yellowstone supervolcano erupts in an explosion large enough to destroy civilization and kill half the planet. The team has just hours to get as many people as possible across to Outland before a lethal cloud of ash overwhelms them. Nothing has prepared the refugees for what they find-a world of few resources and unprecedented dangers. Somehow, they must learn to survive, because Outland may be not just a safe haven-it could be their new home. This 2019 edition has been substantially revised by the author.
