Wear the Damn Mask Izzy the Frenchie,Rick Hendrix,Shane Jordan,2020-11-17 From the feisty and fabulous “Joan Rivers of the pet influencer community” (Paper Magazine), beloved social media star and canine fashion icon Izzy the Frenchie wittily explains why it’s so important we all wear face masks to battle COVID-19. French bulldog and doggy celebrity Izzy loves going out and about just like the rest of us, but she also knows how important it is to be stylish and safe. In *Wear the Damn Mask*, the four-legged “sassy fashion lover” (Vogue) shows how you can effortlessly be both. Featuring endearing and funny photos of Izzy accompanied by cheeky words of wisdom on when to wear your mask and how to properly social distance, *Wear the Damn Mask* is a laugh-out-loud, clever read that will help prevent COVID-19 from literally going to the dogs.

How to Make Tiny Paper Mache Dogs Jonni Good,2014-05 The author makes it easy for you to create a tiny paper mache dog of your own. You only need a few basic tools and some materials that you may already have lying around the house. The only thing you may need to purchase is a few feet of aluminum wire for the armature -- or use some wire you already have on hand. First, choose a pattern from the 27 breeds included in the book. Then build your armature by bending the wires, using the pattern for a guide. This makes sure that your finished sculpture will have the right proportions for your breed. Add a few bits of crumpled aluminum foil to round out the forms, with the pattern guiding you, and then twist and bend your little dog into any position you desire. With these simple steps it's easy to create a lively original sculpture of your own design. When your armature is finished, the author shows you how to make the two layers of paper mache as smooth as you want it to be. You can add wrinkles, fur, happy mouths and other details after the paper mache is dry. If you would like to paint your dog, you can use the author's recipe for an inexpensive home-made gesso to add interesting textures. Then the author gives you suggestions for painting your sculpture, including an easy way to paint brindled spots, how to give an all-white dog an interesting coat, how to emphasize heavily-textured fur with acrylic glazing liquid, and more. The author is a well-known paper mache artist who has written several popular books on the subject. She also writes tutorials and creates videos for her blog, at UltimatePaperMache.com.

Behavior Problems of the Dog and Cat Gary Landsberg,Wayne Hunthausen,Lowell

Ackerman,2012-12-14 Formerly the Handbook of Behavior Problems of the Dog and Cat, the new edition of the definitive guide to the diagnosis and treatment of behavior problems of the dog and cat has been extensively updated. It retains the highly practical approach that has proved so successful in previous editions, offering diagnostic guidelines, preventative advice, treatment guidelines and charts, case examples, client forms and handouts, and product and resource suggestions along with details

on the use of drugs and natural supplements to help optimize the behavior services offered in practice. To add to these features, the third edition is now fully referenced, there is significant new content, the book as been written with the entire hospital team in mind, and many color images have been added. The new edition welcomes a wide international mix of new contributors from Australia, Spain, Mexico and the United States. A website link gives access to the handouts and forms previously found on disk. As well as fulfilling its original purpose as a practical tool for the busy clinician, this edition offers valuable and useful support material for all those studying the field of companion animal behavior. Now in full color and using a revised format, Behavior Problems of the Dog and Cat remains the most complete, up-to-date and practical resource for the treating and diagnosing canine and feline behavior problems. Many hot new topics covered including stress and its effects on health and behavior, and pain assessment and management. Three chapters are added, dealing with canine and feline communication, how to distinguish behavioral versus medical problems, and how to deal with fear and aggression in the clinic. Now thoroughly referenced to the scientific literature. Includes updates on drugs and natural therapeutics. Pain assessment charts now included. All-new color format offers extra illustrations throughout.

Leveraging Artificial Intelligence in Global Epidemics Le Gruenwald,Sarika Jain,Sven Groppe,2021-07-28 Leveraging Artificial Intelligence in Global Epidemics provides readers with a detailed technical description of the role Artificial Intelligence plays in various stages of a disease outbreak, using COVID-19 as a case study. In the fight against epidemics, medical staff are on the front line; but behind the lines the battle is fought by researchers, and data scientists. Artificial Intelligence has been helping researchers with computer modeling and simulation for predictions about disease progression, the overall economic situation, tax incomes and population development. In the same manner, AI can prepare researchers for any emergency situation by backing the medical science. Artificial Intelligence plays a key and cutting-edge role in the preparedness for and dealing with the outbreak of global epidemics. It can help researchers analyze global data about known viruses to predict the patterns of the next pandemic and the impacts it will have. Not only prediction, AI plays an increasingly important role in assessing readiness, early detection, identification of patients, generating recommendations, situation awareness and more. It is up to the right input and the innovative ways by humans to leverage what AI can do. As COVID-19 has grabbed the world and its economy today, an analysis of the COVID-19 outbreak and the global responses and analytics will pay a long way in preparing humanity for such future situations. Provides readers with understanding of

how Artificial Intelligence can be applied to the prediction, forecasting, detection, and testing of global epidemics, using COVID-19 and other recent epidemics such as Ebola, Corona viruses, Zika, influenza, Dengue, Chikungaya, and malaria as case studies Includes background material regarding readiness for coping with epidemics, including Machine Learning models for prediction of epidemic outbreaks based on existing data Includes technical coverage of key topics such as generating recommendations to combat outbreaks, genome sequencing, AI-assisted testing, AI-assisted contact tracing, situation awareness and combating disinformation, and the role of Artificial Intelligence and Machine Learning in drug discovery, vaccine development, and drug re-purposing

Heir of the Dog Judi McCoy,2009-10-06 Professional dog walker Ellie Engleman is more than just a pal to her pooches? she can also read their minds. When Ellie and her terrier mix Rudy find the corpse of a troubled-but-harmless park-dweller in Central Park, the dog walker becomes a prime suspect for murder. When it turns out Rudy is the sole beneficiary of the victim's inheritance, Ellie, Rudy, and Detective Sam Ryder follow the trail of clues to a key to a safety deposit box that just might point to the motive and help them sniff out the real killer.

Horror Dogs Brian Patrick Duggan,2023-08-07 How did beloved movie dogs become man-killers like Cujo and his cinematic pack-mates? For the first time, here is the fascinating history of canines in horror movies and why our best friends were (and are still) painted as malevolent. Stretching back into Classical mythology, treacherous hounds are found only sporadically in art and literature until the appearance of cinema's first horror dog, Sherlock Holmes' Hound of the Baskervilles. The story intensifies through World War II's K-9 Corps to the 1970s animal horror films, which broke social taboos about the good dog on screen and deliberately vilified certain breeds--sometimes even fluffy lapdogs. With behind-the-scenes insights from writers, directors, actors, and dog trainers, here are the flickering hounds of silent films through talkies and Technicolor, to the latest computer-generated brutes--the supernatural, rabid, laboratory-made, alien, feral, and trained killers. Cave Canem (Beware the Dog)--or as one seminal film warned, They're not pets anymore.
