Strengthening the Military Family Readiness System for a Changing American Society

National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on the Well-Being of Military Families, 2019-10-25 The U.S. military has been continuously engaged in foreign conflicts for over two decades. The strains that these deployments, the associated increases in operational tempo, and the general challenges of military life affect not only service members but also the people who depend on them and who support them as they support the nation – their families. Family members provide support to service members while they serve or when they have difficulties; family problems can interfere with the ability of service members to deploy or remain in theater; and family members are central influences on whether members continue to serve. In addition, rising family diversity and complexity will likely increase the difficulty of creating military policies, programs and practices that adequately support families in the performance of military duties. Strengthening the Military Family Readiness System for a Changing American Society examines the challenges and opportunities facing military families and what is known about effective strategies for supporting and protecting military children and families, as well as lessons to be learned from these experiences. This report offers recommendations regarding what is needed to strengthen the support system for military families.

Advanced Oxidation Processes for Water and Wastewater Treatment Simon

Parsons, 2004-03-01 The suitability of Advanced Oxidation Processes (AOPs) for pollutant

degradation was recognised in the early 1970s and much research and development work has been undertaken to commercialise some of these processes. AOPs have shown great potential in treating pollutants at both low and high concentrations and have found applications as diverse as ground water treatment, municipal wastewater sludge destruction and VOCs control. Advanced Oxidation Processes for Water and Wastewater Treatment is an overview of the advanced oxidation processes currently used or proposed for the remediation of water, wastewater, odours and sludge. The book contains two opening chapters which present introductions to advanced oxidation processes and a background to UV photolysis, seven chapters focusing on individual advanced oxidation processes and, finally, three chapters concentrating on selected applications of advanced oxidation processes. Advanced Oxidation Processes for Water and Wastewater Treatment will be invaluable to readers interested in water and wastewater treatment processes, including professionals and suppliers, as well as students and academics studying in this area. Dr Simon Parsons is a Senior Lecturer in Water Sciences at Cranfield University with ten years' experience of industrial and academic research and development.

Archaeology Bjørnar Olsen, 2012-11-19 "This book exhorts the reader to embrace the materiality of archaeology by recognizing how every step in the discipline's scientific processes involves interaction with myriad physical artifacts, ranging from the camel-hair brush to profile drawings to virtual reality imaging. At the same time, the reader is taken on a phenomenological journey into various pasts, immersed in the lives of peoples from other times, compelled to engage their senses with the sights, smells, and noises of the publics and places whose remains they study. This is a refreshingly original and provocative look at the meaning of the material culture that lies at the foundation of the archaeological discipline."—Michael Brian Schiffer, author of *The Material Life*

of Human Beings “This volume is a radical call to fundamentally rethink the ontology, profession, and practice of archaeology. The authors present a closely reasoned, epistemologically sound argument for why archaeology should be considered the discipline of things, rather than its more commonplace definition as the study of the human past through material traces. All scholars and students of archaeology will need to read and contemplate this thought-provoking book.”—Wendy Ashmore, Professor of Anthropology, UC Riverside A broad, illuminating, and well-researched overview of theoretical problems pertaining to archaeology. The authors make a calm defense of the role of objects against tedious claims of 'fetishism.'—Graham Harman, author of *The Quadruple Object*

Dictionary of the British English Spelling System Greg Brooks, 2015-03-30 This book will tell all you need to know about British English spelling. It's a reference work intended for anyone interested in the English language, especially those who teach it, whatever the age or mother tongue of their students. It will be particularly useful to those wishing to produce well-designed materials for teaching initial literacy via phonics, for teaching English as a foreign or second language, and for teacher training. English spelling is notoriously complicated and difficult to learn; it is correctly described as much less regular and predictable than any other alphabetic orthography. However, there is more regularity in the English spelling system than is generally appreciated. This book provides, for the first time, a thorough account of the whole complex system. It does so by describing how phonemes relate to graphemes and vice versa. It enables searches for particular words, so that one can easily find, not the meanings or pronunciations of words, but the other words with which those with unusual phoneme-grapheme/grapheme-phoneme correspondences keep company. Other unique features of this book include teacher-friendly lists of correspondences and

various regularities not described by previous authorities, for example the strong tendency for the letter-name vowel phonemes (the names of the letters) to be spelt with those single letters in non-final syllables.

Technics and Civilization Lewis Mumford, 2010-10-30 *Technics and Civilization* first presented its compelling history of the machine and critical study of its effects on civilization in 1934—before television, the personal computer, and the Internet even appeared on our periphery. Drawing upon art, science, philosophy, and the history of culture, Lewis Mumford explained the origin of the machine age and traced its social results, asserting that the development of modern technology had its roots in the Middle Ages rather than the Industrial Revolution. Mumford sagely argued that it was the moral, economic, and political choices we made, not the machines that we used, that determined our then industrially driven economy. Equal parts powerful history and polemic criticism, *Technics and Civilization* was the first comprehensive attempt in English to portray the development of the machine age over the last thousand years—and to predict the pull the technological still holds over us today. “The questions posed in the first paragraph of *Technics and Civilization* still deserve our attention, nearly three quarters of a century after they were written.”—*Journal of Technology and Culture*

Blood and Earth Kevin Bales, 2016-01-19 For readers of such crusading works of nonfiction as Katherine Boo’s *Beyond the Beautiful Forevers* and Tracy Kidder’s *Mountains Beyond Mountains* comes a powerful and captivating examination of two entwined global crises: environmental destruction and human trafficking—and an inspiring, bold plan for how we can solve them. A leading expert on modern-day slavery, Kevin Bales has traveled to some of the world’s most dangerous places documenting and battling human trafficking. In the course of his reporting, Bales began to

notice a pattern emerging: Where slavery existed, so did massive, unchecked environmental destruction. But why? Bales set off to find the answer in a fascinating and moving journey that took him into the lives of modern-day slaves and along a supply chain that leads directly to the cellphones in our pockets. What he discovered is that even as it destroys individuals, families, and communities, new forms of slavery that proliferate in the world's lawless zones also pose a grave threat to the environment. Simply put, modern-day slavery is destroying the planet. The product of seven years of travel and research, *Blood and Earth* brings us dramatic stories from the world's most beautiful and tragic places, the environmental and human-rights hotspots where this crisis is concentrated. But it also tells the stories of some of the most common products we all consume—from computers to shrimp to jewelry—whose origins are found in these same places. *Blood and Earth* calls on us to recognize the grievous harm we have done to one another, put an end to it, and recommit to repairing the world. This is a clear-eyed and inspiring book that suggests how we can begin the work of healing humanity and the planet we share. Praise for *Blood and Earth* "A heart-wrenching narrative . . . Weaving together interviews, history, and statistics, the author shines a light on how the poverty, chaos, wars, and government corruption create the perfect storm where slavery flourishes and environmental destruction follows. . . . A clear-eyed account of man's inhumanity to man and Earth. Read it to get informed, and then take action."—Kirkus Reviews (starred review) "[An] exposé of the global economy's 'deadly dance' between slavery and environmental disaster . . . Based on extensive travels through eastern Congo's mineral mines, Bangladeshi fisheries, Ghanaian gold mines, and Brazilian forests, Bales reveals the appalling truth in graphic detail. . . . Readers will be deeply disturbed to learn how the links connecting slavery, environmental issues, and modern convenience are forged."—Publishers Weekly "This well-researched and vivid book studies the

connection between slavery and environmental destruction, and what it will take to end both.”—Shelf Awareness (starred review) “This is a remarkable book, demonstrating once more the deep links between the ongoing degradation of the planet and the ongoing degradation of its most vulnerable people. It’s a bracing reminder that a mentality that allows throwaway people also allows a throwaway earth.”—Bill McKibben, author of *Eaarth: Making a Life on a Tough New Planet*

A Historical Review and Analysis of Army Physical Readiness Training and Assessment

Whitfield East, 2013-12 The Drillmaster of Valley Forge—Baron Von Steuben—correctly noted in his Blue Book how physical conditioning and health (which he found woefully missing when he joined Washington's camp) would always be directly linked to individual and unit discipline, courage in the fight, and victory on the battlefield. That remains true today. Even an amateur historian, choosing any study on the performance of units in combat, quickly discovers how the levels of conditioning and physical performance of Soldiers is directly proportional to success or failure in the field. In this monograph, Dr. Whitfield Chip East provides a pragmatic history of physical readiness training in our Army. He tells us we initially mirrored the professional Armies of Europe as they prepared their forces for war on the continent. Then he introduces us to some master trainers, and shows us how they initiated an American brand of physical conditioning when our forces were found lacking in the early wars of the last century. Finally, he shows us how we have and must incorporate science (even when there exists considerable debate!) to contribute to what we do—and how we do it—in shaping today's Army. Dr. East provides the history, the analysis, and the pragmatism, and all of it is geared to understanding how our Army has and must train Soldiers for the physical demands of combat. Our culture is becoming increasingly “unfit, due to poor nutrition, a lack of adequate and formal exercise, and too much technology. Still, the Soldiers who come to our Army from our society will be

asked to fight in increasingly complex and demanding conflicts, and they must be prepared through new, unique, and scientifically based techniques. So while Dr. East's monograph is a fascinating history, it is also a required call for all leaders to better understand the science and the art of physical preparation for the battlefield. It was and is important for us to get this area of training right, because getting it right means a better chance for success in combat.

Artisans in the North Carolina Backcountry Johanna Miller Lewis, 2021-12-14 During the quarter of a century before the thirteen colonies became a nation, the northwest quadrant of North Carolina had just begun to attract permanent settlers. This seemingly primitive area may not appear to be a likely source for attractive pottery and ornate silverware and furniture, much less for an audience to appreciate these refinements. Yet such crafts were not confined to urban centers, and artisans, like other colonists, were striving to create better lives for themselves as well as to practice their trades. As Johanna Miller Lewis shows in this pivotal study of colonial history and material culture, the growing population of Rowan County required not only blacksmiths, saddlers, and tanners but also a great variety of skilled craftsmen to help raise the standard of living. Rowan County's rapid expansion was in part the result of the planned settlements of the Moravian Church. Because the Moravians maintained careful records, historians have previously credited church artisans with greater skill and more economic awareness than non-church craftsmen. Through meticulous attention to court and private records, deeds, wills, and other sources, Lewis reveals the Moravian failure to keep up with the pace of development occurring elsewhere in the county. Challenging the

traditional belief that southern backcountry life was primitive, Lewis shows that many artisans held public office and wielded power in the public sphere. She also examines women weavers and spinsters as an integral part of the population. All artisans—Moravian and non-Moravian, male and female—helped the local market economy expand to include coastal and trans-Atlantic trade. Lewis's book contributes meaningfully to the debate over self-sufficiency and capitalism in rural America.

Something Old, Something New Henry A. Leonard, 2006 Changes in the world over the past two decades have created a dynamic situation--volatile, unpredictable, and novel in many respects--making the conduct of military operations more complex and varied than in the past. This report examines the nature of demands on Army officers in the contemporary operating environment and their implications for leader development. How will the Army prepare its future leaders for the new

demands that will inevitably be placed on them?

Our Appalachia Laurel Shackelford, Bill Weinberg, 2014-10-17 Many books have been written about Appalachia, but few have voiced its concerns with the warmth and directness of this one. From hundreds of interviews gathered by the Appalachian Oral History Project, editors Laurel Shackelford and Bill Weinberg have woven a rich verbal tapestry that portrays the people and the region in all their variety. The words on the page have the ring of truth, for these are the people of Appalachia speaking for themselves. Here they recollect an earlier time of isolation but of independence and neighborliness. For a nearer time they tell of the great changes that took place in Appalachia with the growth of coal mining and railroads and the disruption of old ways. Persisting through the years and sounding clearly in the interviews are the dignity of the Appalachian people and their close ties with the land, despite the exploitation and change they have endured. When first published, *Our Appalachia* was widely praised. This new edition again makes available an authentic source of social history for all those with an interest in the region.

Mass Effect: Retribution Drew Karpysyn, 2010-08-19 Humanity has reached the stars, joining the vast galactic community of alien species. But beyond the fringes of explored space lurk the Reapers, a race of sentient starships bent on 'harvesting' the galaxy's organic species for their own dark purpose. The Illusive Man, leader of the pro-human black ops group Cerberus, is one of the few who know the truth about the Reapers. To ensure humanity's survival, he launches a desperate plan to uncover the enemy's strengths - and weaknesses - by studying someone implanted with modified Reaper technology. He knows the perfect subject for his horrific experiments: former Cerberus operative Paul Grayson, who wrested his daughter from the cabal's control with the help of Ascension project director Kahlee Sanders. But when Kahlee learns that Grayson is missing, she turns to the only person she can trust: Alliance war hero Captain David Anderson. Together they set out to find the secret Cerberus facility where Grayson is being held. But they aren't the only ones after him. And time is running out.

English-Lahu Lexicon James A. Matisoff, 2006-07 Lahu is an important minority language of Southeast Asia, belonging to the Lolo-Burmese subgroup of the Sino-Tibetan language family. It is spoken by over 500,000 people in China, Burma, Thailand, Laos and Vietnam. This English-Lahu Lexicon (ELL) is a computer-aided but manually edited reversal of the author's monumental Lahu-

English dictionary (The Dictionary of Lahu, UCPL #111, 1988, xxv + 1436 pp.). English-Lahu Lexicon contains nearly 5400 head-entries and well over 10,000 carefully arranged subentries. Every Lahu expression is provided with a form-class designation to indicate its grammatical function. Eight useful Appendices (e.g. Plant and Animal Names) round out the volume's 450 pages.
