Thrilling Cities Ian Fleming,2017-07-11 'On November 2nd armed with a sheaf of visas...one suitcase...and my typewriter, I left humdrum London for the thrilling cities of the world...' In 1959, Ian Fleming, the creator of James Bond, was commissioned by the Sunday Times to explore fourteen of the world's most exotic cities. Fleming saw it all with a thriller writer's eye. From Hong Kong to Honolulu, New York to Naples, he left the bright main streets for the back alleys, abandoning tourist sites in favour of underground haunts, and mingling with celebrities, gangsters and geishas. The result is a series of vivid snapshots of a mysterious, vanished world.

Development, Governance and Environment in South Asia Mohammad Alauddin,Samiul Hasan,2016-07-27 The worst chemical disaster ever could be happening right now. In India and Bangladesh between forty and eighty million people are at risk of consuming too much arsenic from well water that might have already caused one hundred thousand cancer cases and thousands of deaths. Many millions elsewhere in South-East Asia and South America may soon suffer a similar fate. *Venomous Earth* is the story of this tragedy: the geology, the biology, the politics and the history. It starts in Ancient Greece, touches down in today's North America and takes in William Morris, alchemy, farming, medicine, mining and a cosmetic that killed two popes.

Mass Effect: Retribution Drew Karpyschyn,2010-08-19 Humanity has reached the stars, joining the vast galactic community of alien species. But beyond the fringes of explored space lurk the Reapers, a race of sentient starships bent on 'harvesting' the galaxy's organic species for their own dark purpose. The Illusive Man, leader of the pro-human black ops group Cerberus, is one of the few who know the truth about the Reapers. To ensure humanity's survival, he launches a desperate plan to uncover the enemy's strengths - and weaknesses - by studying someone implanted with modified Reaper technology. He knows the perfect subject for his horrific experiments: former Cerberus operative Paul Grayson, who wrested his daughter from the cabal's control with the help of Ascension project director Kahlee Sanders. But when Kahlee learns that Grayson is missing, she turns to the only person she can trust: Alliance war hero Captain David Anderson. Together they set out to find the secret Cerberus facility where Grayson is being held. But they aren't the only ones after him. And time is running out.

Mass Effect: Deception William C. Dietz,2012-01-31 An all-new adventure inspired by the award-winning videogame from BioWare! The universe is under siege. Every fifty thousand years, a race of sentient machines invades our galaxy to harvest all organic life-forms. They are the Reapers. Two people who know the truth are desperately searching for a way to stop the cycle: Navy admiral David Anderson and his partner, Kahlee Sanders. They have uncovered grisly evidence proving that the Reaper threat is real. But in so doing they have exposed the machinations of Cerberus, a secretive paramilitary organization, and its mysterious leader, the Illusive Man—putting David and Kahlee in mortal danger, for Cerberus will stop at nothing to protect its secrets. But along the way, they find an unlikely ally in Gillian Grayson, a young woman with extraordinary powers. Once the subject of horrifying scientific experiments, Gillian is now free—and beginning to master her deadly abilities. But after learning that Cerberus was responsible for the death of her father, Gillian swears vengeance against the group and the Illusive Man—threatening to unravel everything Kahlee and David are fighting for.

Scars, Marks & Tattoos Jacqueline Caruso,2021-03-31 I have physical scars from past surgeries, however, I have emotional scars as well. They

were buried deep inside (hidden). It wasn't until my mother died was I able to catch my breath and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

Impact and Explosion M. Y. H. Bangash,1993-07-15 Impact and Explosion: Structural Analysis and Design presents a comprehensive study of the structural dynamics of impact and explosion by providing a survey of types of aircraft, missiles, bombs, and detonators. Impact dynamics, including empirical models developed for different materials, water surfaces, and soil/rock mediums, is discussed. Other topics include load time history; explosion dynamics related to material damage capabilities; dynamic finite elements with provisions for impact and explosions; a discussion of solution procedures, acceleration, and convergence criteria; methods for designing structures resistant to impact and explosions; and how damage results due to impact or explosions. Case histories, comparative studies, numerous examples, appendices, and extensive references reinforce information presented in this important book for engineers and researchers working in government and private industry laboratories concerned with blast or impact loading effects on structures. Small firms that deal with impact loading (e.g., automobile collisions) will also find this book valuable.

This book provides helpful tips, so you can become a no-prep gamemaster. It is organized into three sections: Arcana, Three Keys, and Arrows in the Quiver. The Arcana section deals with my history and struggles with learning how to gamemaster and why I decided to stop preparing for sessions. The Three Keys

Tome of Adventure Design PoD Softcover Frog God Games, Matt J Finch, 2020-07-17 A fantasy adventure game, at its very heart, is about developing an open-ended story of the characters. The referee is in charge of the fantasy world, and the players direct the actions of their characters in that fantasy world. Neither the referee nor the group of players has complete control over what's going to happen, and the result is an evolving set of surprises for both the referee and the players. Unlike the players, as the referee and creator of the game world, most of your work is done ahead of time. To some degree or other, you have to create the groundwork for the adventure before the game starts. Even though no battle plan survives contact with the enemy - and if you're an experienced referee you know exactly what I mean - the game has to start ... with a starting point. This might just be a vague set of ideas, or it might be as complex as a set of maps with a detailed key and well thought-out encounters for the players to run into. The Tome of Adventure Design is organized as a series of books, each one providing resources at every step of the way. The vast majority of the content of each book is made up of random generation tables that we created over a quarter of a century (sigh) for our own use. It should be said up front that these are tables for deep design - in other words, most of them are too long, and contain too many unusual or contradictory entries, for use on the spot at the gaming table. There are already many excellent books of tables for use on the fly; the tables in these books are different. They work best as a tool for preparation beforehand, providing relatively vast creative resources for browsing and gathering, rather than quick-use tables designed to provide broad, fast brushstrokes. Our shorter tables tend to deliver cryptic results designed to shock the reader's creativity into filling in the gaps, whereas the longer tables are unusably vast for easy random generation, being designed to shock the reader's creativity into operation by presenting a sea of possibilities.

Naval Operations Concept 2010 United States. Navy, 2010 Describes when, where and how U.S. naval forces will contribute to preventing conflict and prevailing in war. It guides Maritime Strategy implementation in a manner consistent with national strategy, and describes the ways with which the sea services will achieve the ends articulated in A Cooperative Strategy for 21st Century Seapower. NOC 10 describes who we are as a Naval Service, what we believe, where we operate, and what we provide the Nation. In this era of strategic uncertainty, regionally concentrated and globally distributed naval forces are uniquely capable of preventing conflict and, when necessary, prevailing in war.
