Homo Conexus Morten Bay, 2013-12-21 Homo Conexus is the type of people we become as we venture forward into the network society. From the networks in our brains to the networks on our computers, networks are changing the way we think about ourselves and the world. Homo Conexus helps you make sense of this new age of information and networks.

The Potato Crop Hugo Campos, Oscar Ortiz, 2019-12-03 This book is open access under a CC BY 4.0 license. This book provides a fresh, updated and science-based perspective on the current status and prospects of the diverse array of topics related to the potato, and was written by distinguished scientists with hands-on global experience in research aspects related to potato. The potato is the third most important global food crop in terms of consumption. Being the only vegetatively propagated species among the world's main five staple crops creates both issues and opportunities for the potato: on the one hand, this constrains the speed of its geographic expansion and its options for international commercialization and distribution when compared with commodity crops such as maize, wheat or rice. On the other, it provides an effective insulation against speculation and unforeseen spikes in commodity prices, since the potato does not represent a good traded on global markets. These two factors highlight the underappreciated and underrated role of the potato as a dependable nutrition security crop, one that can mitigate turmoil in world food supply and demand and political instability in some developing countries. Increasingly, the global role of the potato has expanded from a profitable crop in developing countries to a crop providing income and nutrition security in developing ones. This book will appeal to academics and students of crop sciences, but also policy makers and other stakeholders involved in the potato and its contribution to humankind's food security.

Rebel Code Glyn Moody, 2009-02-18 Open source began as the mantra of a small group of idealistic hackers and has blossomed into the all-important slogan for progressive business and computing. This fast-moving narrative starts at ground zero, with the dramatic incubation of open-source software by Linux and its enigmatic creator, Linus Torvalds. With firsthand accounts, it describes how a motley group of programmers managed to shake up the computing universe and cause a radical shift in thinking for the post-Microsoft era. A powerful and engaging tale of innovation versus big business, Rebel Code chronicles the race to create and perfect open-source software, and provides the ideal perch from which to explore the changes that cyberculture has engendered in our society. Based on over fifty interviews with open-source protagonists such as Torvalds and open source guru Richard Stallman, Rebel Code captures the voice and the drama behind one of the most significant business trends in recent memory.

Healthy lives, healthy people Great Britain: Department of Health, 2010-11-30 The Government recognises that many lifestyle-driven health problems are at alarming levels: obesity; high rates of sexually transmitted infections; a relatively large population of drug users; rising levels of harm from alcohol; 80,000 deaths a year from smoking; poor mental health; health inequalities between rich and poor. This white paper outlines the Government's proposals to protect the population from serious health threats; help people live longer, healthier and more fulfilling lives; and improve the health of the poorest. It aims to empower individuals to make healthy choices and give communities and local government the freedom, responsibility and funding to innovate and develop ways of improving public health in their area. The paper responds to Sir Michael Marmot's strategic review of health inequalities in England post 2010 - Fair society, healthy lives (available at <http://www.marmotreview.org/AssetLibrary/pdfs/Reports/FairSocietyHealthyLives.pdf>) and adopts its life course framework for tackling the wider social determinants of health. A new dedicated public health service - Public Health England - will be created to ensure excellence, expertise and responsiveness, particularly on health protection where a national response is vital. The

paper gives a timetable showing how the proposals will be implemented and an annex sets out a vision of the role of the Director of Public Health. The Department is also publishing a fuller story on the health of England in Our health and wellbeing today (http://www.dh.gov.uk/prod_consum_dh/groups/dh_digitalassets/@dh/@en/@ps/documents/digitalasset/dh_122238.pdf), detailing the challenges and opportunities, and in 2011 will issue documents on major public health issues.

Plant Pathology Christophe Lacomme, 2015-05-19 The second edition of Plant Pathology: Techniques and Protocols covers diagnostic methods that are currently used in laboratories for a broad range of plant species and matrixes. These include serological and molecular methods that have one or more of the following characteristics: suitability for high-throughput testing, detection of a group of pathogens or of sometimes uncharacterized pathogens, detection and identification of specific pathogens, and high sensitivity. This volume discusses qualitative and quantitative tests, as well as recently developed diagnostic methods. It also provides background information on many pathogens, which are either endemic, non-endemic, or emerging and with different lifecycles that cause diseases of significant importance in a wide variety of hosts. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, background information on pathogens and the disease caused, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols and tips on troubleshooting and avoiding known pitfalls. Informative and cutting-edge, Plant Pathology: Techniques and Protocols, Second Edition is the perfect book for plant pathologists and molecular biologists who will use this information to test out the latest research in their laboratories.

Hobomok Lydia Maria Child, 2022-05-29 Hobomok is a novel by author and human rights campaigner Lydia Maria Child. It relates the marriage of a white American woman, Mary Conant, to a Native American husband and her attempt to raise their son in white society.

Genomics and Breeding for Climate-Resilient Crops Chittaranjan Kole, 2013-06-18 Climate change is expected to have a drastic impact on agronomic conditions including temperature, precipitation, soil nutrients, and the incidence of disease pests, to name a few. To face this looming threat, significant progress in developing new breeding strategies has been made over the last few decades. The first volume of Genomics and Breeding for Climate-Resilient Crops presents the basic concepts and strategies for developing climate-resilient crop varieties. Topics covered include: conservation, evaluation and utilization of biodiversity; identification of traits, genes and crops of the future; genomic and molecular tools; genetic engineering; participatory and evolutionary breeding; bioinformatics tools to support breeding; funding and networking support; and intellectual property, regulatory issues, social and political dimensions.

Generalized Estimating Equations James W. Hardin, Joseph M. Hilbe, 2002-07-30 Although powerful and flexible, the method of generalized linear models (GLM) is limited in its ability to accurately deal with longitudinal and clustered data. Developed specifically to accommodate these data types, the method of Generalized Estimating Equations (GEE) extends the GLM algorithm to accommodate the correlated data encountered in heal

Some Faces in the Crowd Budd Schulberg, 2012-07-31 Twenty gritty stories by the Academy Award-winning writer of On the Waterfront and A Face in the Crowd. Despite growing up among Hollywood's most powerful producers and movie stars in the 1920s and '30s, Budd Schulberg was always a populist at heart. In this collection of his best short fiction, Schulberg takes readers from the halls of privilege in Los Angeles to smoky dives and dockyard slums in New York. His eye for detail and nose for trouble render characters as vividly as a Weegee photograph. These stories also represent the great clash

of people and ideas in mid-century America. The collection includes "The Arkansas Traveler," the story Schulberg adapted into the influential, prescient film A Face in the Crowd starring Andy Griffith. This ebook features an illustrated biography of Budd Schulberg including rare images and never-before-seen documents from the author's estate.

Standards for the Growing, Harvesting, Packing, and Holding of Produce for Human Consumption (US Food and Drug Administration Regulation) (Fda) (2018 Edition) The Law The Law Library,2018-09-23 Standards for the Growing, Harvesting, Packing, and Holding of Produce for Human Consumption (US Food and Drug Administration Regulation) (FDA) (2018 Edition) The Law Library presents the complete text of the Standards for the Growing, Harvesting, Packing, and Holding of Produce for Human Consumption (US Food and Drug Administration Regulation) (FDA) (2018 Edition). Updated as of May 29, 2018 To minimize the risk of serious adverse health consequences or death from consumption of contaminated produce, the Food and Drug Administration (FDA or we) is establishing science-based minimum standards for the safe growing, harvesting, packing, and holding of produce, meaning fruits and vegetables grown for human consumption. FDA is establishing these standards as part of our implementation of the FDA Food Safety and Modernization Act. These standards do not apply to produce that is rarely consumed raw, produce for personal or on-farm consumption, or produce that is not a raw agricultural commodity. In addition, produce that receives commercial processing that adequately reduces the presence of microorganisms of public health significance is eligible for exemption from the requirements of this rule. The rule sets forth procedures, processes, and practices that minimize the risk of serious adverse health consequences or death, including those reasonably necessary to prevent the introduction of known or reasonably foreseeable biological hazards into or onto produce and to provide reasonable assurances that the produce is not adulterated on account of such hazards. We expect the rule to reduce foodborne illness associated with the consumption of contaminated produce. This book contains: - The complete text of the Standards for the Growing, Harvesting, Packing, and Holding of Produce for Human Consumption (US Food and Drug Administration Regulation) (FDA) (2018 Edition) - A table of contents with the page number of each section

Genetics and Genomics of Soybean Gary Stacey,2008-05-07 Soybean genomics is of great interest as one of the most economically important crops and a major food source. This book covers recent advances in soybean genome research, including classical, RFLP, SSR, and SNP markers; genomic and cDNA libraries; functional genomics platforms; genetic and physical maps; and gene expression profiles. The book is for researchers and students in plant genetics and genomics, plant biology and pathology, agronomy, and food sciences.

ACCA Paper P2 – Corporate Reporting (GBR) Practice and Revision Kit BPP Learning Media,2010-01-01 The Association of Chartered Certified Accountants (ACCA) is the global body for professional accountants. With over 100 years of providing world-class accounting and finance qualifications, the ACCA has significantly raised its international profile in recent years and now supports a BSc (Hons) in Applied Accounting and an MBA.BPP Learning Media is an ACCA Official Publisher. P2 is a very challenging paper which builds on the knowledge and skills acquired at earlier levels in the preparation and analysis of financial reports for single entities and groups. It takes these areas to a higher level, putting into context the role of the accountant as a professional steward and adviser, who is responsible to the stakeholders of an organisation.It has five main sections: 1. Regulatory and ethical framework and current issues 2. Reporting the financial performance of entities 3. Group financial statements 4. Specialised entities 5. Analysis of the financial performance of entitiesThe main new topics introduced at this level relate to group accounts, but other topics are tested with a different emphasis and in more depth than at the Fundamentals Level.We provide material

for both International and UK streams. Question practice is essential for all papers, but for P2, there is a strong 'fear factor'. Questions look intimidating, and it is only once you get into the detail that you realise that there are easy marks and more complicated parts that are not essential to get a pass. Our practice and revision kit follows the order of the text and there are a large number of questions on all syllabus topics. Our kit gives ample opportunity to practice the long, 50 mark case studies, which will be the compulsory Section A question in the exam. Three mock exams, including the December 2007 exam, also reflect this format. As a gentle introduction to many of the topics, there are preparation questions giving instructions in basic techniques. Most questions have marking schemes, so that you can see that the examiner awards marks for these techniques. BPP Learning Media is the publisher of choice for many ACCA students and tuition providers worldwide. Join them and plug into a world of expertise in ACCA exams.

Father Duffy's Story Francis Patrick Duffy, 1919

33 Men Jonathan Franklin, 2011-02-14 Award-winning journalist Jonathan Franklin chronicles the harrowing account of the 33 Chilean miners who were trapped underground for fourteen weeks in the fall of 2010. A resident of Chile since 1994, award-winning investigative reporter Jonathan Franklin gained access to the miners, their families, rescuers, and government officials that other journalists could only dream of. He developed such a bond of trust with the miners that they described in great detail the dramatic first seventeen days of their confinement. Once the miners were rescued, Franklin interviewed virtually all of them—at their homes, at his house, on horseback, and at the beach. The result is *33 Men*, the most authoritative book on the Chilean mine disaster. Written with the author's renowned eye for detail, it captures the remarkable story of the miners who grasped the essence of the human spirit in order to survive their entrapment, and the men and women who literally moved a mountain to set them free.

Plant Genetics and Molecular Biology Rajeev K. Varshney, Manish K.

Pandey, Annapurna Chitikineni, 2018-09-04 This book reviews the latest advances in multiple fields of plant biotechnology and the opportunities that plant genetics, genomics and molecular biology have offered for agriculture improvement. Advanced technologies can dramatically enhance our capacity in understanding the molecular basis of traits and utilizing the available resources for accelerated development of high yielding, nutritious, input-use efficient and climate-smart crop varieties. In this book, readers will discover the significant advances in plant genetics, structural and functional genomics, trait and gene discovery, transcriptomics, proteomics, metabolomics, epigenomics, nanotechnology and analytical & decision support tools in breeding. This book appeals to researchers, academics and other stakeholders of global agriculture.

438 Days Jonathan Franklin, 2015-11-17 The miraculous account of the man who survived alone and adrift at sea longer than anyone in recorded history. For fourteen months, Alvarenga survived constant shark attacks. He learned to catch fish with his bare hands. He built a fish net from a pair of empty plastic bottles. Taking apart the outboard motor, he fashioned a huge fishhook. Using fish vertebrae as needles, he stitched together his own clothes. Based on dozens of hours of interviews with Alvarenga and interviews with his colleagues, search and rescue officials, the medical team that saved his life and the remote islanders who nursed him back to health, this is an epic tale of survival. Print run 75,000.

Intelligence and Cognition: Contemporary Frames of Reference S.H

Irvine, S.K. Newstead, 2012-12-06 In December, 1984 a NATO-sponsored Advanced Study Institute entitled Human Assessment: Cognition and Motivation took place in Athens. It succeeded in attracting a great many of the most eminent scholars and researchers in this area, both as lecturers and participants. The contributors to this book are mostly members of staff who taught at the

Institute. The chapters they have written are designed to provide an introduction to the principal issues that arise in the study of the assessment of intelligence and cognition. Since most of the protagonists are represented in this book the student is provided with an excellent overview. Many different people are responsible for preparation of a book such as this. We would like to express particular thanks to Siobhan Breslin and Julie Coleman, who typed the text despite an unfriendly and unreliable word-processing system. Thanks are also due to Steve Gill who helped with the preparation of the figures. Finally, as a mark of respect for his achievements and leadership in the field of mental measurement, we dedicate this volume to Norman Frederiksen. Sidney H. Irvine Stephen E. Newstead Plymouth, September 1985. -VII- CONTENTS Preface VII Contributors to this volume XI Functions and constants in mental measurement: Chapter 1 A taxonomic approach. 1 Sidney H. Irvine Human cognition and intelligence: Towards an Chapter 2 integrated theoretical perspective. 27 John M. Verster Chapter 3 Synopsis of a triarchic theory of human intelligence.

The GMO Handbook Sarad R. Parekh, 2004-05-15 A comprehensive and accessible survey of the best current accomplishments of GMO research in all their complexity and ramifications. The authors introduce the fundamentals of biotechnology as a scientific discipline, show how GMO research is conducted today, discuss the problems that have arisen from genetic technology and the tools needed to resolve them, and describes how GMO-derived technology may impact our lives in the future. On the technical side, the authors examine a wide range of current technologies employed for constructing GMOs, and describe approaches to novel research, appropriate protocols, and the process of constructing and screening a GMO. The discussion of plant and animal cells covers new strategies employed and the large-scale expression and purification of recombinant products in cultured cells. Social political, and legal issues are also discussed.
