The Maxim Gorky MEGAPACK® Maxim Gorky, 2017-12-09 Alexei Maximovich Peshkov (1868–1936), primarily known as Maxim (or Maksim) Gorky, was a Russian and Soviet writer, a founder of the socialist realism literary method and a political activist. Around fifteen years before success as a writer, he frequently changed jobs and roamed across the Russian Empire; these experiences would later influence his writing. Gorky's most famous works were *The Lower Depths* (1902), *Twenty-six Men and a Girl*, *The Song of the Stormy Petrel*, *The Mother*, *Summerfolk* and *Children of the Sun*. He had an association with fellow Russian writers Leo Tolstoy and Anton Chekhov; Gorky would later write his memoirs on both of them. Gorky was active with the emerging Marxist social-democratic movement. He publicly opposed the Tsarist regime, and for a time closely associated himself with Vladimir Lenin and Alexander Bogdanov's Bolshevik wing of the party. For a significant part of his life, he was exiled from Russia and later the Soviet Union. In 1932, he returned to Russia on Joseph Stalin's personal invitation and died in June 1936. This volume includes 61 classic novels and stories: MAXIME GORKY, by Ivan Strannik INTRODUCTION, by G.K. The Maxim Chronicles Doug Jordan, 2016-06-19 A story about a year in the life of a dog and his various families. Maxim was a Standard Poodle who lived for a time in Israel only to return to Ottawa as a 'teenager' and learn to accept a whole new family. A memoir full of humour and information as Max and his family enter the world of conformation shows, and finally becoming a champion, in more ways than one. Clearly narrative therapy, it may also prove therapeutic to the reader as well.

Politeness: Theoretical approaches and language practice - Brown and Levinson reviewed Hanno Frey, 2003-04-14 Seminar paper from the year 1999 in the subject English Language and Literature Studies - Linguistics, grade: 1,3 (A), University of Hamburg (FB Anglistics), 13 entries in the bibliography, language: English, abstract: Effective communication is a key process in everyday life. Not only do we need to communicate about business and public affairs but also about ourselves and the things which concern us personally. In each case, it is highly interesting to analyse how we try to convey the information we want to get across: Naturally enough, we make use of conventional language but we are also creative and constantly invent new words, phrases and formulations. This, according to Blank, is due to the fact that: Linguistic (and even non-linguistic) communication can be seen as a process whereby people try to maximize their communicative success by minimalizing their linguistic effort (1993, p. 6). Sometimes, however, we diverge from the maximally effective way of communication and, naturally-enough, the question arises, why we do so. The divergence, however, which seems to be highly irrational as far as efficiency is concerned will turn out to be highly rationally motivated - with politeness being the main reason for this process. In the following, I will (1) sketch out the maxims according to which effective communication takes place and (2) analyse the reasons why it is sometimes advisable to intentionally counteract to the requisite maxims. For this purpose, I will refer to different works of well known linguists, especially to the model of politeness suggested by Brown and Levinson (1987). It is the final aim of this paper to reanalyse the model put forward by these two linguists and, thereby, evaluate to what extent their model covers politeness phenomena.

The 5 revised full papers and 1 revised short contribution selected from 11 submissions are presented with 2 invited papers. \*The conference was held virtually due to the COVID-19 pandemic.

**Clarity versus politeness in written communication** Ilona Gaul, 2006-04-20 Seminar paper from the year 2006 in the subject English Language and Literature Studies - Linguistics, grade: 1,3, University of Marburg (Institution für Anglistik und Amerikanistik), course: Hauptseminar "Strategic Writing in English as a Second Language", language: English, abstract: The following paper seeks to be an empirical approach to the usage of clear and polite expressions in written communication. The material concerned are think-aloud-protocols, so-called TAPs, and respective letters written by students in their Hauptstudium who got the task to write to an imaginary guest professor and record their thoughts while doing this. The letters were first written in English (L2) and afterwards in German (L1) but since the main

concept of politeness is very similar in these two languages and a detailed analysis of cultural differences would reach beyond the scope of this paper only the English letters are concerned here. The students were supposed to remind the professor of correcting their term paper early because the credit was needed for the registration to their final exams. Obviously, this task requires to deal with the conflict between polite behaviour and a precise presentation of facts. As it will be shown it is on the one hand often not easy to be friendly and polite when one simultaneously wants to get an important message across. On the other hand there is the danger of creating a negative impression if one exaggerates politeness. Since I am one of the students who had to write an imaginary letter and especially since I already had to write similar letters in reality and am likely to have to do it again I am really interested in the study of politeness. The close relation between theory and practice here makes the topic very attractive. 32 letters were written and afterwards ranked into a quality scale ranging from high top to deep low. From each of these categories at least one letter will be picked out for a detailed analysis. The paper is based on the theoretical background of three different models of politeness by Lakoff, Leech and Brown and Levinson which have in common that they are all linked somehow to Grice's Cooperative Principle while Brown and Levinson's approach seems to be the most elaborate one. The four Gricean maxims have to be adhered to in a communicative act for the sake of clarity but as it will be shown they are often violated in favour of polite speech. All of these models can be criticized more or less but since the purpose of this paper is a strong focus on the empirical part those criticisms will not be taken into consideration here.

Software Architecture for Big Data and the Cloud Ivan Mistrik, Rami Bahsoon, Nour Ali, Maritta Heisel, Bruce Maxim, 2017-06-12 Software Architecture for Big Data and the Cloud is designed to be a single resource that brings together research on how software architectures can solve the challenges imposed by building big data software systems. The challenges of big data on the software architecture can relate to scale, security, integrity, performance, concurrency, parallelism, and dependability, amongst others. Big data handling requires rethinking architectural solutions to meet functional and non-functional requirements related to volume, variety and velocity. The book's editors have varied and complementary backgrounds in requirements and architecture, specifically in software architectures for cloud and big data, as well as expertise in software engineering for cloud and big data. This book brings together work across different disciplines in software engineering, including work expanded from conference tracks and workshops led by the editors. Discusses systematic and disciplined approaches to building software architectures for cloud and big data with state-of-the-art methods and techniques Presents case studies involving enterprise, business, and government service deployment of big data applications Shares guidance on theory, frameworks, methodologies, and architecture for cloud and big data

**Optimal dynamic taxes** Michail Ju. Golosov, Maxim Troshkin, Aleh Tsyvinski, 2011 We study optimal labor and savings distortions in a lifecycle model with idiosyncratic shocks. We show a tight connection between its recursive formulation and a static Mirrlees model with two goods, which allows us to derive elasticity-based expressions for the dynamic optimal distortions. We derive a generalization of a savings distortion for non-separable preferences and show that, under certain conditions, the labor wedge tends to zero for sufficiently high skills. We estimate skill distributions using individual data on the U.S. taxes and labor incomes. Computed optimal distortions decrease for sufficiently high incomes and increase with age.

*Strategic Change Management. Workbased Assignment for Diploma in Strategic Leadership (DSM/MBA)* Maxim Weinmann, 2016-02-23 Seminar paper from the year 2015 in the subject Business economics - Business Management, Corporate Governance, grade: 82%, European College of Business and Management (ECBM) London, language: English, abstract: LIGAPRODUCTION (LPRO) is a full-service provider which produces and distributes high-quality point-of-sale (POS) items such as shop-window campaigns, in-store elements, store-construction elements or event productions. For our national and international clients, we offer unique custom-made items and prototypes, as well as large series productions with worldwide logistics. The concentration of six different production workshops and an in-house logistics unit under one roof, an ultra-modern infrastructure and integrated processes and information technology (IT) systems guarantee maximum flexibility and reduced transaction costs while ensuring efficient production for our clients. Throughout the project, our project management has been in constant contact with our clients and has managed all production workshops, as well as the logistics and installation unit. As a result of increasing operational fields and responsibilities, as well as the growth in total and dutiable shipments, the current IT system in the logistics department needs to be replaced with a new IT solution based on AEB's Assist 4.

**A Critical Evaluation of Politeness Research in English and German** Friederike Brons, 2012-02 Bachelor Thesis from the year 2011 in the subject Didactics - English - Miscellaneous, grade: 1,0, University of Wuppertal (Anglistik/Amerikanistik), language: English, abstract: As a way of establishing a general framework of the development of politeness research, I will give an overview of different theories: the first being the conversationalist maxim view, including the work of Grice, Lakoff and Leech; and the second being the face-saving view of politeness, including Brown and Levinson's model. Then, I will investigate how politeness is realised in German and English. For this purpose, I will firstly consider cultural specificities that determine linguistic politeness, examining dimensions of cross-cultural difference as proposed by Juliane House and critically evaluate these dimensions. Secondly, I will look at how politeness is reflected in the realisation of the speech act of request, drawing on results from a contrastive study on politeness markers by Juliane House and Gabriele Kasper. These will subsequently be compared to findings gained in other empirical works. Following the critical evaluation, I will also take a closer look at the significant role of modal particles in the modification of requests in order to account for some of the prevalent linguistic choices observed in the contrastive study. Finally, the paper ends with a summarising conclusion.
