Interest Rate Models - Theory and Practice Damiano Brigo,Fabio Mercurio,2007-09-26 The 2nd edition of this successful book has several new features. The calibration discussion of the basic LIBOR market model has been enriched considerably, with an analysis of the impact of the swaptions interpolation technique and of the exogenous instantaneous correlation on the calibration outputs. A discussion of historical estimation of the instantaneous correlation matrix and of rank reduction has been added, and a LIBOR-model consistent swaption-volatility interpolation technique has been introduced. The old sections devoted to the smile issue in the LIBOR market model have been enlarged into a new chapter. New sections on local-volatility dynamics, and on stochastic volatility models have been added, with a thorough treatment of the recently developed uncertain-volatility approach. Examples of calibrations to real market data are now considered. The fast-growing interest for hybrid products has led to a new chapter. A special focus here is devoted to the pricing of inflation-linked derivatives. The three final new chapters of this second edition are devoted to credit. Since Credit Derivatives are increasingly fundamental, and since in the reduced-form modeling framework much of the technique involved is analogous to interest-rate modeling, Credit Derivatives -- mostly Credit Default Swaps (CDS), CDS Options and Constant Maturity CDS - are discussed, building on the basic short rate-models and market models introduced earlier for the default-free market. Counterparty risk in interest rate payoff valuation is also considered, motivated by the recent Basel II framework developments.

Credit Risk: Modeling, Valuation and Hedging Tomasz R. Bielecki,Marek Rutkowski,2013-03-14 The motivation for the mathematical modeling studied in this text on developments in credit risk research is the bridging of the gap between mathematical theory of credit risk and the financial practice. Mathematical developments are covered thoroughly and give the structural and reduced-form approaches to credit risk modeling. Included is a detailed study of various arbitrage-free models of default term structures with several rating grades.

This second edition features additional emphasis on the discussion of Ito calculus and Girsanovs Theorem, and the risk-neutral measure and equivalent martingale pricing approach. A new chapter on credit risk models and pricing of credit derivatives has been added. Up-to-date research results are provided by many useful exercises.

Last Girl Standing Trina Robbins,2017-08-16 Born on the cusp of WWII in 1938, at a time when other little girls dreamed of being nurses and secretaries, Trina Robbins's ambition was to be a bohemian; and indeed she did. She chronicles a life of sex, drugs, rock 'n' roll — and comics — in Last Girl Standing. Robbins describes her upbringing in Queens, New York, reading comics through her childhood in the 1940s; visiting the EC offices and becoming part of SF fandom (dating Harlan Ellison at age 16); and posing nude for men's magazines in the 1950s; living in the Village, over her own boutique where she made clothes for and interacted with rock royalty like David Crosby, Donovan, Cass Elliot; her close relationship with Paul Williams; entering the orbit of underground cartoonists like Art Spiegelman, R. Crumb, Vaughn Bodé, and Bill Griffith, when she started contributing comics to The East Village Other; and, in the '70s, moving to San Francisco, contending with the phallogocentric underground scene, marrying Kim Deitch, co-founding Wimmen's Comix, and being invited into Felch Comics (she declined); her work for the National Lampoon, Marvel Comics, and Eclipse in the 1980s; and her crisis as a cartoonist and transformation into an historian and lecturer in the '90s and 2000s. From science fiction to the Sunset Strip, from New York's underground newspapers to San Francisco's underground comix: Trina Robbins broke the rules and broke the law. From dressing Mama Cass to being pelted with jelly babies as she helped photograph the Rolling Stones's first US tour, from drunken New York nights spent with Jim Morrison to producing the very first all-woman comic book, this former Lady of the Canyon takes no prisoners in this heavily illustrated memoir.

The Dare Harley Laroux,2023-10-31 Jessica Martin is not a nice girl. As Prom Queen and Captain of the cheer squad, she'd ruled her school mercilessly, looking down her nose at everyone she deemed unworthy. The most unworthy of them all? The freak, Manson Reed: her favorite victim. But a lot changes after high school. A freak like him never should have ended up at the same Halloween party as her. He never should have been able to beat her at a game of Drink or Dare. He never should have been able to humiliate her in front of everyone. Losing the game means taking the dare: a dare to serve Manson for the entire night as his slave. It's a dare that Jessica's pride - and curiosity - won't allow her to refuse. What ensues is a dark game of pleasure and pain, fear and desire. Is it only a game? Only revenge? Only a dare? Or is it something more? The Dare is an 18+ erotic romance novella and a prequel to the Losers Duet. Reader discretion is strongly advised. This book contains graphic sexual scenes, intense scenes of BDSM, and strong language. A full content note can be found in the front matter of the book.

The Last Mermaid Shana Abé,2008-04-29 Shana Abé has entranced countless readers with her passion-filled novels of adventure, intrigue, and romance. Now the author of The Secret Swan delivers a gift from the sea: three hauntingly beautiful tales connected by a legend, a locket, and a love beyond time. 531 a.d.: The tiny island of Kell is said to be enchanted, inhabited by an extraordinary creature who comforts shipwrecked sailors passing into the next world. Prince Aedan of the Isles believes in no such nonsense—until he awakens on Kell itself and meets the sensuous siren who rescued him from the sea. 1721: Ronan MacMhuirich, Earl of Kell, is the target of an unlikely assassin: Leila, a mysterious woman from an exotic land. But his irresistibly beautiful would-be slayer is in just as much danger as Ronan when she falls for this man with a magic of his own. 2004: What do you do when you inherit a Scottish island you never knew existed—and find yourself pursued by a handsome stranger who wants to buy it from you? That’s what happens to Ruri Kell when she accepts Iain MacInnes’s invitation to visit her birthright, and listens to a proposition as sinfully tempting as everything else about him. Three seductive love stories, three passionate couples, all linked by one of the most romantic myths of all.

Incomplete Information and Heterogeneous Beliefs in Continuous-time Finance Alexandre C. Ziegler,2012-11-02 After a brief review of the existing incomplete information literature, the effect of incomplete information on investors' exptected utility, risky asset prices, and interest rates is described. It is demonstrated that increasing the quality of investors' information need not increase their expected utility and the prices of risky assets. The impact of other factors is discussed in detail. It is also demonstrated that financial markets in general do not aggregate information efficiently, a fact that can explain the equity premium puzzle.

Hot Comb Ebony Flowers,2020-10-14 AN AUSPICIOUS DEBUT EXAMINING THE CULTURE OF HAIR FROM THE RONA JAFFE FOUNDATION AWARD-WINNING CARTOONIST Hot Comb offers a poignant glimpse into Black women’s lives and coming of age stories as seen across a crowded, ammonia-scented hair salon while ladies gossip and bond over the burn. The titular story “Hot Comb” is about a young girl’s first perm—a doomed ploy to look cool and to stop seeming “too white” in the all-black neighborhood her family has just moved to. In “Virgin Hair” taunts of “tender-headed” sting as much as the perm itself. It’s a scenario that repeats fifteen years later as an adult when, tired of the maintenance, Flowers shaves her head only to be hurled new put-downs. The story “My Lil Sister Lena” traces the stress resulting from being the only black player on a white softball team. Her hair is the team curio, an object to touched, a subject to be discussed and debated at the will of her teammates, leading Lena to develop an anxiety disorder of pulling her own hair out. Among the series of cultural touchpoints that make you both laugh and cry, Flowers recreates classic magazine ads idealizing women’s needs for hair relaxers and product. “Change your hair form to fit your life form” and “Kinks and Koils Forever” call customers from the page. Realizations about race, class, and the imperfections of identity swirl through Flowers’ stories and ads, which are by turns sweet, insightful, and heartbreaking. Flowers began drawing comics while earning her PhD, and her early mastery of sequential storytelling is nothing short of sublime. Hot Comb is a propitious display of talent from a new cartoonist who has already made her mark.

The Great Women Cartoonists Trina Robbins,2001 Robbins began her cartooning career in the underground in 1966, and has become not only a major artist but the foremost pop historian of women in comics. To keep her survey to a reasonable size, she has neglected cartoons writers unless they were working with a cartoonist, and defines cartoons as two or more panels, continuity, or speech balloons inside the panel. c.
