Sebastian Brünink

Iris Folding Eileen Goddard,2005 Using the revolutionary Craft in Motion system of displaying movement on the page to demonstrate in flowing sequences, this guide shows how to create beautiful craft works using the relatively new craft of iris folding—in which paper or fabric strips are laid down in order around an aperture to create the illusion of looking at the iris of a camera. Following expert advice on ideal tools and materials for beginners, the basic techniques of iris folding are introduced. These techniques and possibilities are then brought together in six projects, which range from simple greetings cards for all occasions to scrapbook pages.

This new and accessible approach to pop-up theory and practice distills the numerous mechanisms into a logical set of 18 underlying shapes and explains the techniques for building these shapes. The author demonstrates how sophisticated pop-up designs are constructed and shows how to form a three-dimensional reference book. Invaluable for both professional and amateur designers.
