*Overcoming School Refusal* Joanne Garfi,2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. *Human-Computer Interaction* Andrew Sears,Julie A. Jacko,2009-03-02 Hailed on first publication as a compendium of foundational principles and cutting-edge research, The Human-Computer Interaction Handbook has become the gold standard reference in this field. Derived from select chapters of this groundbreaking resource, Human-Computer Interaction: Designing for Diverse Users and Domains emphasizes design for users as such as children, older adults, and individuals with physical, cognitive, visual, and hearing impairments. It also discusses HCI in the context of specific domains including healthcare, games, and the aerospace industry. Topics include the role of gender in HCI, information technology and older adults, motor vehicle driver interfaces, and user-centered design in games. While human-computer interaction may have emerged from within computing, significant contributions have come from a variety of fields including industrial engineering, psychology, education, and graphic design. No where is this more apparent then

when designing solutions for users as diverse as children, older adults, and individuals with physical, cognitive, visual, or hearing impairments.

**Mechademia 3** Frenchy Lunning, 2014-11-01 Dramatic advances in genetics, cloning, robotics, and nanotechnology have given rise to both hopes and fears about how technology might transform humanity. As the possibility of a posthuman future becomes increasingly likely, debates about how to interpret or shape this future abound. In Japan, anime and manga artists have for decades been imagining the contours of posthumanity, creating dazzling and sometimes disturbing works of art that envision a variety of human/nonhuman hybrids: biological/mechanical, human/animal, and human/monster. Anime and manga offer a constellation of posthuman prototypes whose hybrid natures require a shift in our perception of what it means to be human. *Limits of the Human*—the third volume in the Mechademia series—maps the terrain of posthumanity using manga and anime as guides and signposts to understand how to think about humanity's new potentialities and limits. Through a wide range of texts—the folklore-inspired monsters that populate Mizuki Shigeru's manga; Japan's Gothic Lolita subculture; Tezuka Osamu's original cyborg hero, Atom, and his manga version of Fritz Lang's *Metropolis* (along with Ôtomo Katsuhiro's 2001 anime film adaptation); the robot anime, *Gundam*; and the notion of the uncanny in *Ghost in the Shell 2: Innocence*, among others—the essays in this volume reject simple human/nonhuman dichotomies and instead encourage a provocative rethinking of the definitions of humanity along entirely unexpected frontiers.
